

# 100% Pass 2026 Amazon Newest SAP-C02: Authorized AWS Certified Solutions Architect - Professional (SAP-C02) Exam Dumps

2025 Latest Pass4guide SAP-C02 PDF Dumps and SAP-C02 Exam Engine Free Share: [https://drive.google.com/open?id=12qLl1PE4qu9Bl\\_1TaLfSkBarqb-vGd2s](https://drive.google.com/open?id=12qLl1PE4qu9Bl_1TaLfSkBarqb-vGd2s)

The Pass4guide product here is better, cheaper, higher quality and unlimited for all time; kiss the days of purchasing multiple Amazon braindumps repeatedly, or renewing SAP-C02 training courses because you ran out of time. Now you can learn SAP-C02 skills and theory at your own pace and anywhere you want with top of the SAP-C02 braindumps, you will find it's just like a piece of cake to pass SAP-C02 exam.

Amazon SAP-C02 certification exam is a highly sought-after credential for professionals who specialize in cloud computing and solutions architecture. AWS Certified Solutions Architect - Professional (SAP-C02) certification is designed to validate an individual's expertise in designing and deploying scalable, highly available, and fault-tolerant systems on the Amazon Web Services (AWS) platform. SAP-C02 Exam is designed to test the candidate's knowledge and skills in various domains, such as designing and deploying scalable and highly available systems, migration of complex multi-tier applications, implementation of AWS services, and more.

## Authorized SAP-C02 Exam Dumps Reliable IT Certifications | SAP-C02: AWS Certified Solutions Architect - Professional (SAP-C02)

The Amazon SAP-C02 certification exam is one of the hottest certifications in the market. This Amazon SAP-C02 exam offers a great opportunity to learn new in-demand skills and upgrade your knowledge level. By doing this successful SAP-C02 AWS Certified Solutions Architect - Professional (SAP-C02) exam candidates can gain several personal and professional benefits.

## Amazon AWS Certified Solutions Architect - Professional (SAP-C02) Sample Questions (Q368-Q373):

### NEW QUESTION # 368

An online gaming company needs to optimize the cost of its workloads on AWS. The company uses a dedicated account to host the production environment for its online gaming application and an analytics application.

Amazon EC2 instances host the gaming application and must always be available. The EC2 instances run all year. The analytics application uses data that is stored in Amazon S3. The analytics application can be interrupted and resumed without issue.

Which solution will meet these requirements MOST cost-effectively?

- A. Use On-Demand Instances for the online gaming application. Use Spot Instances for the analytics application. Set up a catalog in AWS Service Catalog to provision services at a discount.
- **B. Purchase an EC2 Instance Savings Plan for the online gaming application instances. Use Spot Instances for the analytics application.**
- C. Use Spot Instances for the online gaming application and the analytics application. Set up a catalog in AWS Service Catalog to provision services at a discount.
- D. Purchase an EC2 Instance Savings Plan for the online gaming application instances. Use On-Demand Instances for the analytics application.

**Answer: B**

### NEW QUESTION # 369

A company wants to send data from its on-premises systems to Amazon S3 buckets. The company created the S3 buckets in three different accounts. The company must send the data privately without the data traveling across the internet. The company has no existing dedicated connectivity to AWS. Which combination of steps should a solutions architect take to meet these requirements? (Select TWO.)

- A. Establish a networking account in the AWS Cloud. Create a private VPC in the networking account. Peer VPCs from the accounts that host the S3 buckets with the VPC in the network account.
- **B. Establish a networking account in the AWS Cloud. Create a private VPC in the networking account. Set up an AWS Direct Connect connection with a private VIF between the on-premises environment and the private VPC.**
- C. Create an Amazon S3 gateway endpoint in the networking account.
- D. Establish a networking account in the AWS Cloud. Create a private VPC in the networking account. Set up an AWS Direct Connect connection with a public VIF between the on-premises environment and the private VPC.
- **E. Create an Amazon S3 interface endpoint in the networking account.**

**Answer: B,E**

Explanation:

<https://aws.amazon.com/premiumsupport/knowledge-center/s3-bucket-access-direct-connect/>

### NEW QUESTION # 370

A company is collecting data from a large set of IoT devices. The data is stored in an Amazon S3 data lake. Data scientists perform analytics on Amazon EC2 instances that run in two public subnets in a VPC in a separate AWS account.

The data scientists need access to the data lake from the EC2 instances. The EC2 instances already have an assigned role with permissions to access Amazon S3.

According to company policies, only authorized networks are allowed to have access to the IoT data.

Which combination of steps should a solutions architect take to meet these requirements?

(Choose two.)

- A. Create an S3 access point in the data scientists' AWS account for the data lake.
- B. Update the EC2 instance role. Add a policy with a condition that allows the s3:GetObject action when the value for the s3:DataAccessPointArn condition key is a valid access point ARN.
- **C. Add an S3 bucket policy with a condition that allows the s3:GetObject action when the value for the s3:DataAccessPointArn condition key is a valid access point ARN.**
- D. Update the VPC route table to route S3 traffic to an S3 access point.
- **E. Create a gateway VPC endpoint for Amazon S3 in the data scientists' VPC.**

**Answer: C,E**

### NEW QUESTION # 371

A company that uses AWS Organizations is creating several new AWS accounts. The company is setting up controls to properly allocate AWS costs to business units. The company must implement a solution to ensure that all resources include a tag that has a key of costcenter and a value from a predefined list of business units.

The solution must send a notification each time a resource tag does not meet these criteria. The solution must not prevent the creation of resources.

Which solution will meet these requirements with the LEAST operational overhead?

- A. Create an organization tag policy that ensures that all resources have the costcenter tag with a valid business unit value. Select the option to prevent operations when tags are noncompliant. Create an Amazon EventBridge (Amazon CloudWatch Events) rule that monitors all events for noncompliant tag policies. Configure the rule to send notifications through Amazon Simple Notification Service (Amazon SNS).
- B. Create an IAM policy for all actions that create AWS resources. Add a condition to the policy that `awsResourceTag/costcenter` must exist and must contain a valid business unit value. Create an Amazon EventBridge (Amazon CloudWatch Events) rule that monitors IAM service events and Amazon EC2 service events for noncompliant tag policies. Configure the rule to send notifications through Amazon Simple Notification Service (Amazon SNS).
- C. Create an IAM policy for all actions that create AWS resources. Add a condition to the policy that `aws:RequestTag/costcenter` must exist and must contain a valid business unit value. Create an Amazon EventBridge (Amazon CloudWatch Events) rule that monitors IAM service events and Amazon EC2 service events for noncompliant tag policies. Configure the rule to send notifications through Amazon Simple Notification Service (Amazon SNS).
- D. Create an organization tag policy that ensures that all resources have the costcenter tag with a valid business unit value. Do not select the option to prevent operations when tags are noncompliant. Create an Amazon EventBridge (Amazon CloudWatch Events) rule that monitors all events for noncompliant tag policies. Configure the rule to send notifications through Amazon Simple Notification Service (Amazon SNS).

**Answer: B**

### NEW QUESTION # 372

A company needs to create a centralized logging architecture for all of its AWS accounts. The architecture should provide near-real-time data analysis for all AWS CloudTrail logs and VPC Flow logs across all AWS accounts. The company plans to use Amazon Elasticsearch Service (Amazon ES) to perform log analyses in the logging account.

Which strategy should a solutions architect use to meet these requirements?

- A. Configure CloudTrail and VPC Flow Logs to send data to a separate Amazon S3 bucket in each AWS account. Create an AWS Lambda function triggered by S3 events to copy the data to a centralized logging bucket. Create another Lambda function to load data from the S3 bucket to Amazon ES in the logging account.
- B. Configure CloudTrail and VPC Flow Logs in each AWS account to send data to a centralized Amazon S3 bucket in the logging account. Create an AWS Lambda function to load data from the S3 bucket to Amazon ES in the logging account.
- C. Configure CloudTrail and VPC Flow Logs to send data to a log group in Amazon CloudWatch Logs in each AWS account. Create AWS Lambda functions in each AWS account to subscribe to the log groups and stream the data to an Amazon S3 bucket in the logging account. Create another Lambda function to load data from the S3 bucket to Amazon ES in the logging account.
- D. Configure CloudTrail and VPC Flow Logs to send data to a log group in Amazon CloudWatch Logs in each AWS account. Configure a CloudWatch subscription filter in each AWS account to send data to Amazon Kinesis Data Firehose in the logging account. Load data from Kinesis Data Firehose into Amazon ES in the logging account.

**Answer: B**

### NEW QUESTION # 373

.....

Amazon SAP-C02 Exam is a very hot exam. Although it is difficult to pass the exam, the identification of entry point will make you easy to pass your exam. Pass4guide practice test dumps are your best choice and hit rate is up to 100%. And our exam dumps can help you solve any questions of SAP-C02 exam. As long as you carefully study the questions in the dumps, all problems can be solved. Purchasing Pass4guide certification training dumps, we provide you with free updates for a year. Within a year, as long as you want to update the dumps you have, you can get the latest version. Try it and see for yourself.
