Earning the Check Point Certified Security Expert R81 (156-315.81) exam credential is undoubtedly a big achievement. No matter how hard the Check Point Certified Security Expert R81 (156-315.81) test of this certification is, it serves the important purpose to validate skills in the CheckPoint industry. Once you crack the Check Point Certified Security Expert R81 (156-315.81) exam, a whole new career scope opens up for you. Candidates for the Check Point Certified Security Expert R81 (156-315.81) exam dumps usually don't have enough time to study for the test. To prepare successfully in a short time, you need a trusted platform of real and updated Check Point Certified Security Expert R81 (156-315.81) exam dumps.

Familiarize yourself with the format of the CheckPoint 156-315.81 Exam

The first step in preparing for the CheckPoint 156-315.81 Exam is familiarizing yourself with the format of the exam. While there are many resources that you can use to prepare for this exam, it is important that you understand what it will cover.

There are two sections of this exam: Reading Comprehension, Analytic Reasoning

Reading Comprehension is the first section of the exam and covers topics such as Basic Security Concepts, Cyber Operations, System Penetration Testing, Ethical Hacking and Social Engineering. This section will help you understand how to identify threats on networks and make decisions based on situational awareness. It also helps test your ability to recognize risks associated with cyber

security incidents and preventative measures taken by organizations against them. **CheckPoint 156-315.81 exam dumps** is designed to provide comprehensive and accurate information about the subject, and is ideal for anyone looking to develop a career in the security industry.

Analytic Reasoning tests your ability to solve problems by using logic and reasoning skills in identifying solutions or patterns. You will need to analyze information provided through questions about cyber security incidents or events that have occurred in the past decade (such as Stuxnet) or present day scenarios such as WannaCry ransomware attack on companies across world wide.

CheckPoint 156-315.81 Exam is intended for security administrators, network engineers, and security consultants who are responsible for managing and maintaining Check Point security solutions in enterprise environments. 156-315.81 exam covers a range of topics, including advanced firewall policies, network segmentation, site-to-site VPNs, remote access VPNs, and advanced troubleshooting techniques. Candidates must have a solid understanding of Check Point's security architecture and be able to apply this knowledge to mitigate security risks.

This version includes important updates and enhancements to the software, which are essential for any security expert to know. 156-315.81 Exam covers topics such as network security, VPNs, intrusion prevention, and threat prevention. It also covers advanced topics such as automation, orchestration, and cloud security.

CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q374-Q379):

NEW QUESTION # 374

What two ordered layers make up the Access Control Policy Layer?

- A. Application Control and URL Filtering
- B. URL Filtering and Network
- **C. Network and Application Control**
- D. Network and Threat Prevention

Answer: C

NEW QUESTION # 375

DLP and Geo Policy are examples of what type of Policy?

- **A. Shared Policies**
- B. Inspection Policies
- C. Standard Policies
- D. Unified Policies

Answer: A

Explanation:

Explanation

DLP and Geo Policy are examples of Shared Policies. Shared Policies are policies that can be applied to multiple gateways or

clusters, regardless of their Access Control policy. Shared Policies allow administrators to manage common security settings across different gateways or clusters, such as Data Loss Prevention, Geo Protection, Threat Prevention, HTTPS Inspection, etc.

NEW QUESTION # 376

What is not a purpose of the deployment of Check Point API?

- A. Create products that use and enhance the Check Point solution
- B. Execute an automated script to perform common tasks
- C. Create a customized GUI Client for manipulating the objects database
- D. Integrate Check Point products with 3rd party solution

Answer: C

Explanation:

The deployment of Check Point API does not have the purpose of creating a customized GUI Client for manipulating the objects database. The Check Point API is a web service that allows external applications to interact with the Check Point management server using standard methods such as HTTP(S) requests and JSON objects. The Check Point API can be used to execute an automated script to perform common tasks, create products that use and enhance the Check Point solution, and integrate Check Point products with 3rd party solutions. However, creating a customized GUI Client for manipulating the objects database is not a supported or intended use case of the Check Point API.

NEW QUESTION # 377

Which of the following is a new R81 Gateway feature that had not been available in R77.X and older?

- A. Time object to a rule to make the rule active only during specified times.
- B. The rule base can be built of layers, each containing a set of the security rules. Layers are inspected in the order in which they are defined, allowing control over the rule base flow and which security functionalities take precedence.
- C. Sub Policies are sets of rules that can be created and attached to specific rules. If the rule is matched, inspection will continue in the sub policy attached to it rather than in the next rule.
- D. Limits the upload and download throughput for streaming media in the company to 1 Gbps.

Answer: C

Explanation:

Sub Policies are a new R81 Gateway feature that had not been available in R77.X and older. Sub Policies are sets of rules that can be created and attached to specific rules. If the rule is matched, inspection will continue in the sub policy attached to it rather than in the next rule. This allows for more granular and modular control over the policy. The other features were already available in previous versions. NEW QUESTION # 378

In ClusterXL Load Sharing Multicast Mode:

- A. only the secondary member receives packets sent to the cluster IP address
- B. packets sent to the cluster IP address are distributed equally between all members of the cluster
- C. only the primary member received packets sent to the cluster IP address
- D. every member of the cluster received all of the packets sent to the cluster IP address

Answer: D

Explanation:

Explanation

In ClusterXL Load Sharing Multicast Mode, every member of the cluster receives all of the packets sent to the cluster IP address. This mode uses multicast MAC addresses to distribute packets to all cluster members.

Each member decides whether to accept or reject the packet based on a load balancing algorithm. This mode provides better performance and scalability than Unicast mode, but requires a switch that supports multicast MAC addresses.
