ServiceNow Certified System Administrator Sample Questions (Q512-Q517):

NEW QUESTION # 512

ServiceNow contains over 25 different report types. What are some of the types?

Choose 5 answers

- A. Donut
- B. Horizontal Bar
- C. Pie
- D. Semi-Donut
- E. Thermometer
- F. Odometer
- G. Speedometer

Answer: A,B,C,F,G

Explanation:

ServiceNow provides over 25 report types to visually represent data for analysis and decision-making. Reports can be charts, tables, or trend graphs, depending on the data set.

Correct Answers

A . Pie ☐

A circular chart that shows proportions within a whole.

Example: Distribution of Incidents by category (Hardware, Software, Network).

B . Speedometer ☐

A gauge-style report that represents values within a range (low to high).

Example: Incident SLA Compliance Percentage.

C . Odometer ☐

A report type similar to a Speedometer, but shows a single metric value.

Example: Number of Open Tickets in a Queue.

E . Horizontal Bar ☐

Displays bars horizontally, ideal for comparing multiple categories.

Example: Number of Incidents per Assignment Group.

G . Donut ☐

Similar to a Pie Chart, but with a hole in the middle.

Example: Percentage of Change Requests by Risk Level (Low, Medium, High).

Incorrect Answer Choices

D . Thermometer ☐

Not a standard ServiceNow report type.

No official thermometer-style reports exist.

F . Semi-Donut ☐

Not a standard report type in ServiceNow.

ServiceNow supports Pie, Donut, and Speedometer, but not "Semi-Donut".

NEW QUESTION # 513

Which of the following are a type of client scripts supported in ServiceNow? (Choose four.)

- A. onSubmit
- B. onUpdate
- C. onEdit
- D. onChange
- E. onLoad
- F. onCellEdit
- G. onSave

Answer: A,D,E,F

Explanation:

In ServiceNow, Client Scripts are used to execute JavaScript code on the client-side (browser) to control form behavior, validate data, or enhance user interaction.

Types of Client Scripts in ServiceNow:

There are four types of Client Scripts supported in ServiceNow:

onLoad (□ Option D)

Runs when a form loads.

Used to pre-fill fields, hide/show elements, or set default values.

Example: Automatically setting the "Priority" field to High when a new incident is created.

onChange (□ Option F)

Runs when a specific field value changes.

Used for dynamic form behavior, such as making fields mandatory based on another field's value.

Example: If "Category" is changed to "Hardware," then show the "Hardware Type" field.

onSubmit (□ Option A)

Runs when the form is submitted.

Used for final validation before allowing submission.

Example: Preventing submission if a mandatory field is left empty.

onCellEdit (□ Option C)

Runs when a cell value is edited inline in a list view.

Used to trigger immediate validation or updates without opening the full form.

Example: Displaying an alert when a user directly changes an incident's priority from a list view.

Why Are the Other Options Incorrect?

□ B. onUpdate

No "onUpdate" client script type exists in ServiceNow.

"onUpdate" is relevant in Business Rules, not Client Scripts.

□ E. onEdit

No "onEdit" client script type exists.

Similar functionality can be achieved with "onChange" or "onCellEdit" scripts.

□ G. onSave

No "onSave" client script type exists.

"onSubmit" handles validation before saving a record.

Reference from Certified System Administrator (CSA) Documentation:

□ ServiceNow Docs - Client Scripts

□ ServiceNow Client Scripts Documentation

"Client Scripts can be onLoad, onChange, onSubmit, or onCellEdit depending on when they execute." Conclusion:

□ The correct answers are:

A . onSubmit (Runs when submitting a form)

C . onCellEdit (Runs when editing a list cell)

D . onLoad (Runs when a form loads)

F . onChange (Runs when a field value changes)

NEW QUESTION # 514

What is the role of form annotations within Table Builder?

- A. To create new form views
- **B. To add visual appeal with colors in the designer**
- C. To rearrange fields in a form
- D. To provide additional information on each field

Answer: B

NEW QUESTION # 515

What is the name of the table relationship, where two or more tables are related in a bi-directional relationship, so that the related records are visible from both tables in a related list?

- A. Extended

- B. One to Many
- **C. Many to Many**
- D. Database View

Answer: C

NEW QUESTION # 516

Which roles grant access to source control repository operations such as importing applications from source control, or linking an application to source control?

Choose 2 answers

- **A. admin**
- B. git_admin
- **C. source control**
- D. source_control_admin

Answer: A,C

NEW QUESTION # 517
