

100% Pass APMG-International - ISO-IEC-27001-Foundation - ISO/IEC 27001 (2022) Foundation Exam—The Best New Braindumps Ebook

Together, the after-sale service staffs in our company share a passion for our customers, an intense focus on teamwork, speed and agility, and a commitment to trust and respect for all individuals. At present, our company is a leading global provider of ISO-IEC-27001-Foundation preparation exam in the international market. Therefore, after buying our ISO-IEC-27001-Foundation Study Guide, if you have any questions about our ISO-IEC-27001-Foundation study materials, please just feel free to contact with our online after sale service staffs on our ISO-IEC-27001-Foundation exam questions.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 2	• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 3	• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
Topic 4	• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 5	• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 6	• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 7	• Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.

Topic 8	• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.

High Pass-Rate APMG-International New ISO-IEC-27001-Foundation Braindumps Ebook & The Best ExamPrepAway - Leading Provider in Qualification Exams

If you have bought our ISO-IEC-27001-Foundation exam braindumps, you will find that we have added new functions to add your exercises. The system of our ISO-IEC-27001-Foundation guide materials will also be updated. In short, the new version of our ISO-IEC-27001-Foundation training engine will change a lot. What is more, we will offer you free new version if you have purchased our ISO-IEC-27001-Foundation training engine before. Since that we promise that you can enjoy free updates for one year after your purchase.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which audit activity related to ISO/IEC 27001 may be carried out by a practitioner?

- A. Conduct an internal audit of the organization
- B. Conduct an audit of a Certification Body
- C. Conduct a surveillance audit of their own area of the organization
- D. Conduct an audit of an Accredited Training Organization

Answer: A

Explanation:

ISO/IEC 27001 requires internal audits and sets out how they must be conducted: "The organization shall conduct internal audits at planned intervals..." (9.2.1) and "plan, establish, implement and maintain an audit programme(s)... [and] select auditors and conduct audits that ensure objectivity and the impartiality of the audit process" (9.2.2). These extracts confirm that practitioners (internal to the organization) can conduct internal audits provided objectivity and impartiality are ensured (e.g., they do not audit their own work). Surveillance audits (option A) and audits of Accredited Training Organizations or Certification Bodies (options C, D) are third-party activities outside the remit of an internal practitioner under ISO/IEC 27001; the standard's audit requirement is focused on the organization's own internal audit programme. Therefore, conducting an internal audit (B) is the correct practitioner activity per Clause 9.2.

NEW QUESTION # 15

What is the definition of a threat according to ISO/IEC 27000?

- A. A potential cause of an unwanted incident which can result in harm to a system or organization
- B. A weakness of an asset or a control that can be exploited
- C. The risk remaining after risk treatment
- D. A single or a series of unwanted or unexpected information security events

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, a threat is defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause 6.1.2). Thus, the correct definition per ISO/IEC 27000 is A.

NEW QUESTION # 16

What is the definition of the term 'integrity' according to ISO/IEC 27000?

- A. The property of availability and confidentiality
- B. The property of being accessible and usable
- **C. The property of accuracy and completeness**
- D. The property that information is NOT made available inappropriately

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.35:

"Integrity is the property of accuracy and completeness."

This is one of the three core principles of information security (CIA triad):

* Confidentiality: ensuring information is not made available to unauthorized persons (related to option B).

* Integrity: ensuring data is accurate, complete, and unaltered except by authorized means.

* Availability: ensuring information is accessible and usable when required (related to option A).

Option D incorrectly mixes availability and confidentiality. The precise ISO definition is accuracy and completeness, which matches option C.

Thus, the correct verified answer is C.

NEW QUESTION # 17

Identify the missing word in the following sentence.

The organization shall determine the [?] of interested parties relevant to information security.

- **A. requirements**
- B. influence
- C. number
- D. structure

Answer: A

Explanation:

Clause 4.2 of ISO/IEC 27001:2022 states:

"The organization shall determine: a) interested parties that are relevant to the information security management system; b) the relevant requirements of these interested parties; c) which of these requirements will be addressed through the ISMS." This confirms that the missing word is requirements. Neither number, structure, nor influence are specified in the standard.

NEW QUESTION # 18

To whom are the information security policies required to be communicated, according to the control in Annex A of ISO/IEC 27001?

- A. Employees within the scope of the ISMS
- B. Top management
- C. Only staff with accountability for ISMS operation
- **D. Relevant personnel and relevant interested parties**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) clearly specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties..." This means the communication obligation is not limited to top management (A) or only ISMS staff (B), nor does it stop at employees only (C). Instead, ISO/IEC 27001/27002 mandate a broader scope: all relevant personnel and relevant interested parties must be informed. This ensures both internal stakeholders (employees, contractors, temporary staff) and external interested parties (suppliers, partners, regulators, customers, etc.) receive the right policy communications where applicable. Therefore, the correct and verified answer is D.

NEW QUESTION # 19

.....

The system of our ISO-IEC-27001-Foundation study materials is great. It is developed and maintained by our company's professional personnel and is dedicated to provide the first-tier service to the clients. Our system updates the ISO-IEC-27001-Foundation study materials periodically and frequently to provide more learning resources and responds to the clients' concerns promptly. Our system will supplement New ISO-IEC-27001-Foundation Study Materials and functions according to the clients' requirements and surveys the clients' satisfaction degrees about our ISO-IEC-27001-Foundation study materials.
