Topic 3	<ul style="list-style-type: none"> Quality Inspection: It explains the configuration requirements of Quality Inspection.
Topic 4	<ul style="list-style-type: none"> Quality Management in Sales and Distribution: The topic describes the integration of QM with Sales and Distribution.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which Status allows you to make a usage decision without using the force inspection competition function for all mandatory characteristic results.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

NEW QUESTION # 68

Which settings are required for the immediate creation of inspection instruction during goods receipt process. Note : 3 correct answer

- A. Settings for print control in implementation Guide (IMG)
- B. Inspection type settings in Material master
- C. Control setting in quality info record
- D. Inspection type settings in the implementation guide (IMG)
- E. Control setting in characteristic of the task list

Answer: A,D,E

NEW QUESTION # 69

For which catalog types is it mandatory to value the codes in the selected set? Note: There are 2 correct answers to this question.

- A. Defect types
- B. Usage decisions
- C. Activities (QM)
- D. Characteristic attributes

Answer: A,B

Explanation:

In SAP S/4HANA Quality Management, catalogs are used to manage predefined codes for qualitative data recording, and selected sets are subsets of code groups used in specific contexts (e.g., inspection plans).

Valuation of codes (assigning values like "Accepted" or "Rejected") is mandatory for certain catalog types to ensure consistent processing:

* Usage Decisions (A): Catalog type "3" (Usage Decisions) requires valuation in the selected set because the usage decision (UD) determines the stock posting and quality score. In Customizing (SPRO > Quality Management > Quality Inspection > Usage Decision > Define Selected Sets), codes like "A" (Accepted) or "R" (Rejected) must be valued to trigger specific system actions (e.g., goods movement). This is mandatory for inspection lot completion.

* Defect Types (C): Catalog type "9" (Defects) requires valuation in the selected set when used in defect recording (e.g., transaction QS51). Defect codes (e.g., "Scratch," "Dent") need valuation to classify severity or trigger follow-up actions like notifications, making it mandatory in quality processes.

* Characteristic Attributes (B): Catalog type "1" (Characteristic Attributes) is used for qualitative MICs. Valuation is optional and depends on the characteristic's settings (e.g., "Good/Bad"), not mandatory in the selected set itself.

* Activities (QM) (D): Catalog type "5" (Activities) is used for tasks or follow-ups in notifications.

Valuation is not mandatory in the selected set, as activities are typically descriptive rather than evaluative.

Thus, "Usage decisions" and "Defect types" are the correct answers, as valuation is a required step in their respective processes. References: SAP Help Portal - "Catalogs and Selected Sets in QM"; SAP S/4HANA QM Customizing Guide - "Catalog Management".

NEW QUESTION # 70

For which business objects can you record defects? Note: There are 2 correct answers to this question.

- A. Quality certificates
- **B. Inspection characteristics**
- C. Business partners
- **D. Inspection lots**

Answer: B,D

Explanation:

Defect recording in SAP QM (e.g., transaction QF01 or QE51N) is tied to specific objects:

* Inspection Lots (A): Defects are recorded directly against an inspection lot (e.g., during results recording), linking to the lot's context (e.g., material, supplier).

* Inspection Characteristics (B): Within an inspection lot, defects can be recorded at the characteristic level (e.g., a specific MIC fails), allowing detailed defect analysis.

* Business Partners (C): Defects aren't recorded against suppliers/customers directly; they're tied to lots or notifications.

* Quality Certificates (D): Certificates document results, not serve as objects for defect recording.

Thus, "Inspection lots" and "Inspection characteristics" are the correct answers. References: SAP Help Portal - "Defects Recording in QM"; SAP S/4HANA QM User Guide - "Defect Management".

NEW QUESTION # 71

A buyer creates a purchase order for a material for which QM in procurement is active. What does the system verify when a target QM system is assigned to the material master? Note : 3 Correct answer

- A. The inspection type
- **B. The QM quality info record**
- **C. The defined assignments for QM systems in the implementation Guide (IMG)**
- D. The purchasing info record
- **E. The vendor master**

Answer: B,C,E

NEW QUESTION # 72

.....

It is certain that the pass rate of our C-TS414-2023 study guide among our customers is the most essential criteria to check out whether our C-TS414-2023 training materials are effective or not. The good news is that according to statistics, under the help of our C-TS414-2023 learning dumps, the pass rate among our customers has reached as high as 98% to 100%. It is strongly proved that we are professional in this career and our C-TS414-2023 exam braindumps are very popular.
