300-710 Dumps Guide | Test 300-710 Dates

All operating systems also support this web-based 300-710 practice test. The third format is desktop Cisco 300-710 practice exam software that can be accessed easily after installing it on your Windows PC or Laptop. These formats are there so that the students can use them as per their unique needs and prepare successfully for Securing Networks with Cisco Firepower (300-710) the on first try.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q226-Q231):

NEW QUESTION # 226

What is a limitation to consider when running a dynamic routing protocol on a Cisco FTD device in IRB mode?

- A. Only link-state routing protocols are supported.
- B. Only EtherChannel interfaces are supposed.
- C. Only distance vector routing protocols are supported.
- D. Only nonbridge interfaces are supported.

Answer: D

Explanation:
Explanation

Integrated routing and bridging (IRB) is a feature that allows you to route between different bridge groups on a Cisco FTD device. A bridge group is a logical interface that acts as a container for one or more physical or logical interfaces that belong to the same layer 2 broadcast domain. You can assign an IP address to a bridge group interface (BVI) and enable routing protocols on it, just like a regular routed interface. However, when you run a dynamic routing protocol on a Cisco FTD device in IRB mode, you can only use nonbridge interfaces as routing peers. You cannot use bridge group interfaces or bridge group member interfaces as routing peers². This is because the routing protocol packets are sent and received on the nonbridge interfaces, and the bridge group interfaces are used only for forwarding data traffic³.

NEW QUESTION # 227

An administrator is setting up Cisco Firepower to send data to the Cisco Stealthwatch appliances. The NetFlow_Set_Parameters object is already created, but NetFlow is not being sent to the flow collector. What must be done to prevent this from occurring?

- A. Add the NetFlow_Add_Destination object to the configuration
- B. Add the NetFlow_Send_Destination object to the configuration
- C. Create a service identifier to enable the NetFlow service
- D. Create a Security Intelligence object to send the data to Cisco Stealthwatch

Answer: A

NEW QUESTION # 228

An engineer is configuring a cisco FTD appliance in IPS-only mode and needs to utilize fail-to-wire interfaces. Which interface mode should be used to meet these requirements?

- A. transparent
- B. passive
- C. inline set
- D. routed

Answer: C

Explanation:

Reference:

<https://www.cisco.com/c/en/us/td/docs/security/firepower/630/configuration/guide/fpmc-config-guide-v63/inline>

NEW QUESTION # 229

What is the maximum bit size that Cisco FMC supports for HTTPS certificates?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

Reference:
