Our CLF-C02 study guide provides free trial services, so that you can learn about some of our topics and how to open the software before purchasing. During the trial period of our CLF-C02 study materials, the PDF versions of the sample questions are available for free download, and both the pc version and the online version can be illustrated clearly. You can contact us at any time if you have any difficulties in the purchase or trial process of our CLF-C02 Exam Dumps.

Amazon CLF-C02 Exam Syllabus Topics:

Topic	Details
Topic 1	Cloud Technology and Services: Describe ways to access AWS services in AWS Cloud and explore connectivity options. It deals with defining the global infrastructure of AWS, computing services, and network services.
Topic 2	Billing, Pricing, and Support: This section contrasts pricing methods and budgeting resources management. It also tests understanding of billing methods, identifying support options, and technical resources.
Topic 3	Cloud Concepts: This section involves knowledge of value proposition and exploring design rules of AWS. It covers the advantages of techniques for moving over to AWS cloud and developing a good understanding of cloud economics.
Topic 4	Security and Compliance: This section involves understanding the shared responsibility framework of AWS in addition to compliance and governance. It also involves exploring the management capabilities of AWS by exploring its security capabilities.

Pass-sure Reliable CLF-C02 Test Cram bring you Latest-updated CLF-C02 Latest Braindumps Ppt for Amazon AWS Certified Cloud Practitioner

We also have dedicated staffs to maintain updating CLF-C02 practice test every day, and you can be sure that compared to other test materials on the market, CLF-C02 quiz guide is the most advanced. With CLF-C02 exam torrent, there will not be a situation like other students that you need to re-purchase guidance materials once the syllabus has changed. Even for some students who

didn't purchase CLF-C02 Quiz guide, it is impossible to immediately know the new contents of the exam after the test outline has changed. CLF-C02 practice test not only help you save a lot of money, but also let you know the new exam trends earlier than others.

Amazon AWS Certified Cloud Practitioner Sample Questions (Q611-Q616):

NEW QUESTION # 611

Which AWS service offers a global content delivery network (CDN) that helps companies securely deliver websites, videos, applications, and APIs at high speeds with low latency?

- A. Amazon EC2
- B. Amazon CloudWatch
- C. Amazon CloudFront
- D. AWS CloudFormation

Answer: C

Explanation:

Explanation

Amazon CloudFront is the AWS service that offers a global content delivery network (CDN) that helps companies securely deliver websites, videos, applications, and APIs at high speeds with low latency. Amazon CloudFront is a web service that speeds up distribution of static and dynamic web content, such as HTML, CSS, JavaScript, and image files, to users. Amazon CloudFront uses a global network of edge locations, located near users' geographic locations, to cache and serve content with high availability and performance.

Amazon CloudFront also provides features such as AWS Shield for DDoS protection, AWS Certificate Manager for SSL/TLS encryption, AWS WAF for web application firewall, and AWS Lambda@Edge for customizing content delivery with serverless code. Amazon EC2, Amazon CloudWatch, and AWS CloudFormation are not services that offer a global CDN. Amazon EC2 is a service that provides scalable compute capacity in the cloud. Amazon CloudWatch is a service that provides monitoring and observability for AWS resources and applications. AWS CloudFormation is a service that provides a common language to model and provision AWS resources and their dependencies.

NEW QUESTION # 612

Which AWS Cloud design principle does a company follow by using AWS CloudTrail?

- A. Ensure traceability.
- B. Recover automatically.
- C. Measure efficiency.
- D. Perform operations as code.

Answer: A

Explanation:

The company follows the AWS Cloud design principle of ensuring traceability by using AWS CloudTrail. AWS CloudTrail is a service that records the API calls and events made by or on behalf of the AWS account. The company can use AWS CloudTrail to monitor, audit, and analyze the activity and changes in their AWS resources and applications. AWS CloudTrail helps the company to achieve compliance, security, governance, and operational efficiency. Recovering automatically, performing operations as code, and measuring efficiency are other AWS Cloud design principles, but they are not directly related to using AWS CloudTrail.

Recovering automatically means that the company can design their cloud workloads to handle failures gracefully and resume normal operations without manual intervention. Performing operations as code means that the company can automate the creation, configuration, and management of their cloud resources using scripts or templates. Measuring efficiency means that the company can monitor and optimize the performance and utilization of their cloud resources and applications³⁴

NEW QUESTION # 613

A company is planning to migrate its application to the AWS Cloud.

Which AWS tool or set of resources should the company use to analyze and assess its readiness for migration?

- A. AWS Cloud Adoption Framework (AWS CAF)
- B. AWS Budgets
- C. AWS Pricing Calculator

- D. AWS Well-Architected Framework

Answer: A

Explanation:

Explanation

AWS Cloud Adoption Framework (AWS CAF) is a tool that helps organizations understand how cloud adoption transforms the way they work, and it provides structure to identify and address gaps in skills and processes. Applying the AWS CAF in your organization results in an actionable plan that helps you prepare the cloud environment, enable your staff with new skills, and migrate your applications. AWS Pricing Calculator is a tool that helps you estimate the cost of AWS services for your use cases and compare the cost of different AWS service configurations. AWS Well-Architected Framework is a tool that helps you review and improve your cloud-based architectures and better understand the business impact of your design decisions. AWS Budgets is a tool that helps you plan your service usage, service costs, and instance reservations, and track how close your plan is to your budgeted amount.

NEW QUESTION # 614

Which AWS service will help a company identify the user who deleted an Amazon EC2 instance yesterday?

- A. Amazon CloudWatch
- B. Amazon Inspector
- C. AWS Trusted Advisor
- **D. AWS CloudTrail**

Answer: D

Explanation:

The correct answer is C because AWS CloudTrail is a service that will help a company identify the user who deleted an Amazon EC2 instance yesterday. AWS CloudTrail is a service that enables users to track user activity and API usage across their AWS account. AWS CloudTrail records the details of every API call made to AWS services, such as the identity of the caller, the time of the call, the source IP address of the caller, the parameters and responses of the call, and more. Users can use AWS CloudTrail to audit, monitor, and troubleshoot their AWS resources and actions. The other options are incorrect because they are not services that will help a company identify the user who deleted an Amazon EC2 instance yesterday. Amazon CloudWatch is a service that enables users to collect, analyze, and visualize metrics, logs, and events from their AWS resources and applications. AWS Trusted Advisor is a service that provides real-time guidance to help users follow AWS best practices for security, performance, cost optimization, and fault tolerance. Amazon Inspector is a service that helps users find security vulnerabilities and deviations from best practices in their Amazon EC2 instances. Reference: AWS CloudTrail FAQs

NEW QUESTION # 615

Which benefit does AWS offer exclusively to users who have an AWS Enterprise Support plan?

- A. Access to a solutions architect
- B. Access to a cloud support engineer
- **C. Access to a technical account manager (TAM)**
- D. Access to a technical project manager

Answer: C

Explanation:

A company wants to automatically set up and govern a multi-account AWS environment.

Explanation:

AWS Enterprise Support plan is the highest level of support that AWS offers to its customers. One of the exclusive benefits of this plan is the access to a technical account manager (TAM), who is a dedicated point of contact for guidance, advocacy, and support². A technical project manager, a cloud support engineer, and a solutions architect are not exclusive benefits of the AWS Enterprise Support plan, as they are also available to customers with lower-tier support plans or through other AWS services or programs^{3,4,5}.

NEW QUESTION # 616

.....

We provide Amazon CLF-C02 web-based self-assessment practice software that will help you to prepare for the Amazon AWS Certified Cloud Practitioner exam. Amazon CLF-C02 Web-based software offers computer-based assessment solutions to help you automate the entire AWS Certified Cloud Practitioner exam testing procedure. The stylish and user-friendly interface works with all browsers, including Mozilla Firefox, Google Chrome, Opera, Safari, and Internet Explorer. It will make your Amazon CLF-C02 Exam Preparation simple, quick, and smart. So, rest certain that you will discover all you need to study for and pass the Amazon CLF-C02 exam on the first try.
