# 100% Pass CompTIA - CAS-005 Accurate Valid Exam Guide

TestPassKing CAS-005 exam dumps in three different formats has CAS-005 questions PDF and the facility of CompTIA CAS-005 dumps. We have made these CompTIA CAS-005 questions after counseling a lot of experts and getting their feedback. The 24/7 customer support team is available at TestPassKing for CompTIA CAS-005 Dumps users so that they don't get stuck in any hitch.

Obtaining CompTIA certification will let your resume shine and make a great difference to your career. But the preparation of CompTIA CAS-005 is long and difficult task. So choosing best study materials for CAS-005 Real Exam is necessary to every candidate. Latest braindumps from TestPassKing can help you pass exam with high passing score in a short time.

## CompTIA CAS-005 Exam Pattern, CAS-005 Reliable Dumps Ebook

Our CAS-005 test torrent keep a look out for new ways to help you approach challenges and succeed in passing the CompTIA SecurityX Certification Exam exam. An ancient Chinese proverb states that "The journey of a thousand miles starts with a single step". To be recognized as the leading international exam bank in the world through our excellent performance, our CompTIA SecurityX Certification Exam qualification test are being concentrated on for a long time and have accumulated mass resources and experience in designing study materials. There is plenty of skilled and motivated staff to help you obtain the CompTIA SecurityX Certification Exam exam certificate that you are looking forward. We have faith in our professional team and our CAS-005 Study Tool, and we also wish you trust us wholeheartedly.

## CompTIA SecurityX Certification Exam Sample Questions (Q21-Q26):

**NEW QUESTION # 21**
A company receives several complaints from customers regarding its website. An engineer implements a parser for the web server logs that generates the following output:

| Browser | User location | Load time | HTTP response |
|---|---|---|---|
| Mozilla 5.0 | United States | | 302 |
| Chrome 110 | France | 1.2s | 302 |
| Microsoft Edge | | 3.7s | 307 |
| Microsoft Edge | Australia | 6.4s | 200 |

which of the following should the company implement to best resolve the issue?

- A. IDS
- B. WAF
- C. NAC
- D. CDN

**Answer: D**

Explanation:
The table indicates varying load times for users accessing the website from different geographic locations. Customers from Australia and India are experiencing significantly higher load times compared to those from the United States. This suggests that latency and geographical distance are affecting the website's performance.
A . IDS (Intrusion Detection System): While an IDS is useful for detecting malicious activities, it does not address performance issues related to latency and geographical distribution of content.
B . CDN (Content Delivery Network): A CDN stores copies of the website's content in multiple geographic locations. By serving content from the nearest server to the user, a CDN can significantly reduce load times and improve user experience globally.
C . WAF (Web Application Firewall): A WAF protects web applications by filtering and monitoring HTTP traffic but does not improve performance related to geographical latency.
D . NAC (Network Access Control): NAC solutions control access to network resources but are not designed to address web performance issues.
Implementing a CDN is the best solution to resolve the performance issues observed in the log output.

**NEW QUESTION # 22**
Which of the following best describes the reason a network architect would enable forward secrecy on all VPN tunnels?

- A. The business requirements state that confidentiality is a critical success factor.
- B. Modern cryptographic protocols list this process as a prerequisite for use.
- C. This process reduces the success of attackers performing cryptanalysis.
- D. This process is a requirement to enable hardware-accelerated cryptography.

**Answer: C**

Explanation:
Forward secrecy, also known as perfect forward secrecy, is a feature of certain key agreement protocols that ensures session keys will not be compromised even if the server's private key is compromised in the future. By enabling forward secrecy on VPN tunnels, each session uses a unique key, and these keys are not derived from a common master key. This means that even if an attacker obtains the server's private key, they cannot decrypt past sessions, thereby significantly reducing the effectiveness of cryptanalysis attacks.

**NEW QUESTION # 23**
An incident response team is analyzing malware and observes the following:
* Does not execute in a sandbox
* No network loCs
* No publicly known hash match
* No process injection method detected
Which of the following should the team do next to proceed with further analysis?

- A. Check for an anti-virtualization code in the sample
- B. Use an online vims analysis tool to analyze the sample
- C. Utilize a new deployed machine to run the sample.
- D. Search oilier internal sources for a new sample.

**Answer: A**

Explanation:
Malware that does not execute in a sandbox environment often contains anti-analysis techniques, such as anti- virtualization code. This code detects when the malware is running in a virtualized environment and alters its behavior to avoid detection. Checking for anti-virtualization code is a logical next step because:
It helps determine if the malware is designed to evade analysis tools.
Identifying such code can provide insights into the malware's behavior and intent.
This step can also inform further analysis methods, such as running the malware on physical hardware.

## NEW QUESTION # 24

An organization is developing on AI-enabled digital worker to help employees complete common tasks such as template development, editing, research, and scheduling. As part of the AI workload the organization wants to Implement guardrails within the platform. Which of the following should the company do to secure the AI environment?

- A. Limn the platform's abilities to only non-sensitive functions
- B. Enhance the training model's effectiveness.
- C. Require end-user acknowledgement of organizational policies.
- D. Grant the system the ability to self-govern

**Answer: A**

Explanation:
Limiting the platform's abilities to only non-sensitive functions helps to mitigate risks associated with AI operations. By ensuring that the AI-enabled digital worker is only allowed to perform tasks that do not involve sensitive or critical data, the organization reduces the potential impact of any security breaches or misuse.
Enhancing the training model's effectiveness (Option B) is important but does not directly address security guardrails. Granting the system the ability to self-govern (Option C) could increase risk as it may act beyond the organization's control. Requiring end-user acknowledgement of organizational policies (Option D) is a good practice but does not implement technical guardrails to secure the AI environment.

NIST SP 800-53 Rev. 5, "Security and Privacy Controls for Information Systems and Organizations" ISO/IEC 27001, "Information Security Management"

## NEW QUESTION # 25

Which of the following best explains the business requirement a healthcare provider fulfills by encrypting patient data at rest?

- A. Protecting privacy while supporting portability
- B. Providing for non-repudiation of data
- C. Securing data transfer between hospitals
- D. Reducing liability from identity theft

**Answer: A**

Explanation:
Encrypting patient data at rest ensures that sensitive information is protected from unauthorized access, thereby maintaining patient privacy. Additionally, encryption supports data portability by allowing secure transfer and storage of data across different systems and devices without compromising confidentiality. This practice is crucial for healthcare providers to comply with regulations such as the Health Insurance Portability and Accountability Act (HIPAA), which mandates the protection of patient information.

## NEW QUESTION # 26

......

The cost for the registration of the certification is considerably expensive, it varies from 100$ to 1000$. That is why TestPassKing has created budget-friendly and updated prep material compared to other websites that do not assure the passing of the exam. We also assure you that the sum won't be wasted, and you won't have to pay for the certification a second time. For customer satisfaction, we also offer you a demo version of the actual CAS-005 Dumps so that you may check their validity before even buying them.
