ExamDiscuss Fortinet FCP_FAZ_AN-7.4 Real Exam Questions PDF Format

Choose FCP_FAZ_AN-7.4 exam Topics Pdf to prepare for your coming test, and you will get unexpected results. FCP_FAZ_AN-7.4 pdf version is very convenient to read and review. If you like to choose the paper file for study, the FCP_FAZ_AN-7.4 pdf file will be your best choice. The Fortinet FCP_FAZ_AN-7.4 Pdf Dumps can be printed into papers, so that you can read and do marks as you like. Thus when you open your dumps, you will soon find the highlights in the FCP_FAZ_AN-7.4 papers. What's more, the 99% pass rate can help you achieve your goals.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which two statement regarding the outbreak detection service are true? (Choose two.)

- A. New alerts are received by email.
- B. An additional license is required.
- C. Outbreak alerts are available on the root ADOM only.
- D. It automatically downloads new event handlers and reports.

Answer: C,D

NEW QUESTION # 38

Refer to the exhibit with partial output:

Your colleague exported a playbook and has sent it to you for review. You open the file in a text editor and observe the output as shown in the exhibit.

Which statement about the export is true?

- A. Your colleague put a password on the export.
- B. The export data type is zipped.
- C. The option to include the connector was not selected.
- D. The playbook is misconfigured.

Answer: B

Explanation:

In the exhibit, the data structure shows a checksum field and a data field with a long, seemingly encoded string. This format is indicative of a file that has been compressed or encoded for storage and transfer.

* Export Data Type:

* The data field is likely a base64-encoded string, which is commonly used to represent binary data in text format. Base64 encoding is often applied to data that has been compressed (zipped) for easier handling and transfer. The checksum field, with an MD5 hash, provides a way to verify the integrity of the data after decompression.

* Option Analysis:

* A. The export data type is zipped: Correct. The compressed and encoded format of the data suggests that the export is in a

zipped format, allowing for efficient storage and transfer.

* B. The playbook is misconfigured: There is no indication of misconfiguration in this exhibit.

The presence of the checksum and data fields aligns with standard export practices.

* C. The option to include the connector was not selected: There is no evidence in the output to conclude that connectors are missing. Connectors are typically listed separately and would not directly affect the checksum and encoded data structure.

* D. Your colleague put a password on the export: There's no indication of password protection in the exhibit. Password protection would likely alter the data structure, and there would be some mention of encryption.

Conclusion:

* Correct answer: A. The export data type is zipped.

* This answer is consistent with the typical use of base64 encoding for compressed (zipped) data exports in FortiAnalyzer.

NEW QUESTION # 39

What is Log Insert Lag Time on FortiAnalyzer?

- A. The amount of time FortiAnalyzer takes to receive logs from a registered device
- B. The amount of lag time that occurs when the administrator is rebuilding the ADOM database.
- C. The number of times in the logs where end users experienced slowness while accessing resources.
- D. The amount of time that passes between the time a log was received and when it was indexed on FortiAnalyzer.

Answer: D

NEW QUESTION # 40

Refer to the exhibit.

Which two statements are true regarding enabling auto-cache on FortiAnalyzer? (Choose two.)

- A. Reports will be cached in the memory.
- B. Enabling auto-cache reduces report generation time for reports that require a long time to assemble datasets.
- C. Report size will be optimized to conserve disk space on FortiAnalyzer.
- D. This feature is automatically enabled for scheduled reports.

Answer: B,D

NEW QUESTION # 41

What are event handlers?

- Answer: B**
