

# 100% Pass Google - Chrome-Enterprise-Administrator - High-quality Professional Chrome Enterprise Administrator Certification Exam Reliable Exam Pass4sure

What's more, part of that CramPDF Chrome-Enterprise-Administrator dumps now are free: <https://drive.google.com/open?id=1OiNTsC1vMHtZ6mzHLqjb9MEYIMA85o5>

We have professional technicians to check the website every day, and you can have a clean and safe online shopping environment if you purchasing Chrome-Enterprise-Administrator learning materials from us. In addition, we are pass guarantee and money back guarantee for Chrome-Enterprise-Administrator exam dumps, and if you fail to pass the exam, we will give you full refund. We have free demo for you to have a try before buying Chrome-Enterprise-Administrator Exam Materials of us, so that you can know what the complete version is like. We have online and offline service, and if you have any questions for Chrome-Enterprise-Administrator exam dumps, you can consult us.

## Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.</li> </ul>

## Chrome-Enterprise-Administrator Reliable Braindumps Free & New Chrome-Enterprise-Administrator Test Price

You can try the Google Chrome-Enterprise-Administrator exam dumps demo before purchasing. If you like our Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam questions features, you can get the full version after payment. CramPDF Chrome-Enterprise-Administrator Dumps give surety to confidently pass the Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam on the first attempt.

### Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q30-Q35):

#### NEW QUESTION # 30

A Chrome administrator notices that a Chrome browser is checking in with the Google Admin console but has not received a new cloud computer policy setting that was recently deployed. During the investigation, the administrator deletes the Chrome browser from the Google Admin console. What action can be taken to have the browser re-enroll in the Google Admin console?

- A. Delete the Chrome Policies from the device and reboot
- B. Delete the device management token from the device and relaunch Chrome
- C. Delete the enrollment token from the device and relaunch Chrome
- D. Delete the Chrome Browser Cache and sign back in to Chrome

**Answer: B**

Explanation:

When a managed browser is deleted from the Google Admin console, it needs to be re-enrolled to receive policies again. The process for re-enrollment typically involves deleting the **\*\*device management token\*\*** from the local machine. Upon relaunching Chrome, the browser will detect the absence of the token and attempt to re-enroll with the cloud management service, at which point it will receive a new token and the latest policies. Deleting the enrollment token (option B) might disrupt the initial enrollment if it still existed.

Deleting Chrome policies (option C) might not trigger re-enrollment. Clearing the cache and signing back in (option D) addresses user profile data, not device enrollment.

#### NEW QUESTION # 31

A company has Chrome browser settings applied via a ChromeOS user policy. The Chrome administrator needs to deploy a new setting that will override the existing ChromeOS user setting if there is a conflict. What should the administrator use?

- A. Chrome component updates
- B. Machine Cloud level policy
- C. Chrome Flags
- D. Enterprise Default policy

**Answer: B**

Explanation:

To override a ChromeOS user policy, the administrator should deploy a policy at the **\*\*Machine Cloud level\*\***. Machine-level policies have a higher precedence than user-level policies on ChromeOS devices.

"Enterprise Default" is a general policy level and might not override user settings. Chrome Flags are experimental features and not intended for policy management. Chrome component updates manage specific browser components, not policy settings.

### NEW QUESTION # 32

An organization is migrating its management from Group Policy to Chrome Enterprise Core. When enrolling the browser into Chrome Enterprise Core, what will happen to conflicting policies on Windows when using the default order of precedence?

- A. Cloud Machine policies will be ignored in favor of the Machine Policy
- **B. Machine Policies will be ignored in favor of cloud machine policy**
- C. Machine Policy will be ignored if the token was deployed through Group Policy
- D. OS User policies will be ignored in favor of the Cloud User policies

**Answer: B**

Explanation:

By default, when a Chrome browser on a Windows device is enrolled in Chrome Enterprise Core, cloud-based machine policies will take precedence over locally configured machine policies (Group Policy). This ensures that the centrally managed cloud policies are enforced.

### NEW QUESTION # 33

What policy and value provides the most protection against malicious websites?

- A. Allow the user ability to bypass Safe Browsing warnings
- B. Enable site isolation for all websites
- **C. Set the Safe Browsing policy to Enhanced mode**
- D. Set the site isolation policy to be required for all websites

**Answer: C**

Explanation:

Setting the **\*\*Safe Browsing policy to Enhanced mode\*\*** provides the most direct and comprehensive protection against malicious websites by leveraging Google's real-time threat intelligence. Allowing users to bypass warnings (option A) defeats the purpose of Safe Browsing. While site isolation (options C and D) protects against cross-site data leakage, it doesn't directly prevent users from accessing malicious sites in the first place. Enhanced Safe Browsing actively warns and blocks access to dangerous websites.

### NEW QUESTION # 34

Company A uses an extension that is critical to business operations. The company currently pins the version of the extension. They received an updated version of the extension that delivers new functionality. The Chrome administrator notices that the new version now requests all available permissions, while the previous version only requested four permissions. Which action should the Chrome administrator recommend to address this security issue?

- A. Use the extension's blocked hosts list to block access to risky websites
- B. Continue using version pinning until the company contacts the developer for more information on the code change
- C. Customize permissions for the extension to match the permissions of the previous version
- **D. Block the extension until a new version is available that requires fewer permissions**

**Answer: D**

Explanation:

A significant increase in requested permissions in a new version of a critical extension poses a security risk.

The most prudent action is to block the updated extension until the administrator can verify the necessity of the new permissions or until a less permissive version is released. Version pinning (option D) only delays the issue and doesn't address the potential risk in the new version. Blocking specific hosts (option A) doesn't limit the extension's overall capabilities. Customizing permissions (option C) is generally not possible for Chrome extensions managed through the Google Admin console.

### NEW QUESTION # 35

.....

Our company has a professional team of experts to write Chrome-Enterprise-Administrator preparation materials and will constantly

update it to ensure that it is synchronized with the exam content. In addition to the high quality, reasonable price and so on, we have many other reasons to make you choose our Chrome-Enterprise-Administrator Actual Exam. There are three versions of our Chrome-Enterprise-Administrator exam questions: PDF, Software and APP online which can provide you the varied study experiences.
