

100% Pass High Hit-Rate 1Z0-182 - Exam Oracle Database 23ai Administration Associate Tutorial

P.S. Free 2025 Oracle 1Z0-182 dumps are available on Google Drive shared by Actualtests4sure: <https://drive.google.com/open?id=11-gfdEeI2JcIHSrTxYYNEh3maMErYU71>

It is a truth well-known to all around the world that no pains and no gains. There is another proverb that the more you plough the more you gain. When you pass the 1Z0-182 exam which is well recognized wherever you are in any field, then acquire the 1Z0-182 certificate, the door of your new career will be open for you and your future is bright and hopeful. Our 1Z0-182 guide torrent will be your best assistant to help you gain your 1Z0-182 certificate.

Oracle 1Z0-182 Exam Syllabus Topics:

Topic	Details
Topic 1	Configuring Oracle Net Services: This section measures the skills of Network Administrators and Database Administrators in configuring Oracle Net Services. It includes identifying administration components, describing connection methods, and ensuring seamless communication between clients and databases.
Topic 2	Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization.
Topic 3	Managing Users, Roles, and Privileges: This domain evaluates the expertise of Security Administrators in implementing user security measures. It focuses on creating and managing users, roles, and privileges to ensure secure access to Oracle databases.
Topic 4	Introduction to Auditing: This domain tests the abilities of Compliance Specialists in implementing database auditing practices. It includes creating, modifying, and maintaining auditing policies while applying value-based auditing techniques like Fine-Grained Auditing (FGA).
Topic 5	Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.
Topic 6	Managing Tablespaces and Datafiles: This section assesses the abilities of Storage Administrators in creating, modifying, and describing tablespaces. It also covers recognizing data storage requirements and understanding datafile placement for efficient storage management.

Topic 7	Describe Oracle Database Architecture: This section of the exam measures the skills of Database Administrators and System Architects in understanding the Oracle database architecture. It covers the configurations of Oracle database instances, memory structures like SGA and PGA, and process structures such as background processes. It also explains the logical and physical database structures, including datafiles, control files, and redo log files.
Topic 8	Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.
Topic 9	Employ Oracle-Supplied Database Tools: This section evaluates the abilities of Database Engineers and Support Specialists in identifying and using Oracle-supplied tools for managing databases. It focuses on leveraging tools to monitor, troubleshoot, and optimize database performance effectively.

Simulation 1Z0-182 Questions - 1Z0-182 Pass4sure Dumps Pdf

Once you decide to pass the Oracle Database 23ai Administration Associate exam and get the certification, you may encounter many handicaps that you don't know how to deal with, so, you may think that it is difficult to pass the exam and get the certification. In order to help you solve these problem and help you pass the exam easy, we compiled such a 1Z0-182 exam torrent. We can promise that you will have no regret buying our Oracle Database 23ai Administration Associate exam dumps. If you are hesitating to buy our 1Z0-182 Test Quiz, if you are anxious about whether our product is suitable for you or not, we think you can download the trail version. We believe our Oracle Database 23ai Administration Associate exam dumps will help you make progress and improve yourself.

Oracle Database 23ai Administration Associate Sample Questions (Q32-Q37):

NEW QUESTION # 32

Which three statements are true about Deferred Segment Creation in Oracle databases?

- A. It is supported for Index Organized Tables (IOTs) contained in locally managed tablespaces.
- B. It is supported for SYS-owned tables contained in locally managed tablespaces.
- C. Indexes inherit the DEFERRED or IMMEDIATE segment creation attribute from their parent table.
- D. It is the default behavior for tables and indexes.
- E. Sessions may dynamically switch back and forth from DEFERRED to IMMEDIATE segment creation.

Answer: C,D,E

Explanation:

- A .False. IOTs require immediate segment creation.
- B .False. SYS-owned tables don't use deferred creation.
- C .True. Default since 11gR2, continued in 23ai.
- D .True. Indexes inherit this attribute unless overridden.
- E .True. Sessions can alter this via DEFERRED_SEGMENT_CREATION.

NEW QUESTION # 33

Which three statements are true about an SPFILE?

- A. It must exist for a database instance to start.
- B. It can be used to create a PFILE.
- C. It contains only static initialization parameters.
- D. It contains initialization parameters whose values can be changed using the ALTER SYSTEM statement.
- E. It can be created by SYS from an idle instance.

Answer: B,D,E

Explanation:

- A .True. CREATE SPFILE FROM PFILE works when idle.
- B .False. Includes dynamic parameters too.
- C .True. CREATE PFILE FROM SPFILE generates a PFILE.
- D .False. A PFILE can start the instance if no SPFILE exists.
- E .True. Dynamic parameters (e.g., DB_CACHE_SIZE) are modifiable.

NEW QUESTION # 34

Which three statements are true about Enterprise Manager Cloud Control?

- A. It provides management for Oracle middleware.
- B. It is integrated with My Oracle Support.
- C. It is available to manage a database only when that database is open.
- D. It provides management for Oracle-engineered systems.
- E. It uses a web-based console built into the Oracle database using XML DB.

Answer: A,B,D

Explanation:

- A .True. Integrates with MOS for patches and support.
- B .True. Manages Exadata, etc.
- C .True. Covers WebLogic and other middleware.
- D .False. Web-based, but not built into the DB.
- E .False. Can manage stopped instances via agents.

NEW QUESTION # 35

In one of your databases, the user HR has the password HRMGR. You want to connect to a database instance whose listener listens on port 1531 by using this statement: CONNECT HR/HRMGR@orcl. No name server is used. Which statement is true about ORCL?

- A. It must resolve to a valid connect descriptor in the client's tnsnames.ora file.
- B. It must resolve to a valid connect descriptor in the server's tnsnames.ora file.
- C. It must be the value of the SERVICE_NAMES parameter on the client side.
- D. It must be the name of the database to whose instance HR wishes to connect.
- E. It must be the name of the server running the database to whose instance HR wishes to connect.

Answer: A

Explanation:

- A .False. ORCL is a TNS alias, not necessarily the DB name.
- B .True. Must map to a connect descriptor (e.g., HOST=... PORT=1531) in tnsnames.ora.
- C .False. It's not the server name but a network alias.
- D .False. Client-side tnsnames.ora is used, not server-side.
- E .False. SERVICE_NAMES is server-side, not client-side.

NEW QUESTION # 36

Which two statements are true about User Authentication in an Oracle Database?

- A. Password authentication must be used for system-privileged administrative users.
- B. Operating System authentication may be used for system-privileged administrative users.
- C. Password File authentication must be used for system-privileged administrative users.
- D. Password File authentication is supported for any type of database user.
- E. REMOTE_LOGIN_PASSWORDFILE must be set to EXCLUSIVE to permit password changes for system-privileged administrative users.

Answer: B,C

Explanation:

User authentication in Oracle 23ai determines how users (especially administrative ones) connect to the database. Let's analyze each option with extensive detail:

A . Operating System authentication may be used for system-privileged administrative users.

True. OS authentication allows users mapped to OS accounts (e.g., ops\$oracle) to connect without a password, often used for administrative users like SYS or SYSTEM. This is configured by creating an externally authenticated user (e.g., CREATE USER "OPS\$ORACLE" IDENTIFIED EXTERNALLY) and relies on the OS to verify identity.

Mechanics:When a user logs in via sqlplus / as sysdba, Oracle checks the OS user against the dba group (Unix) or ORA_DBA (Windows). If matched, no password is needed, leveraging OS security.

Practical Use:Common for DBAs managing local instances, reducing password management overhead.

Edge Case:Requires REMOTE_LOGIN_PASSWORDFILE=NONE for exclusive OS auth, but this isn't mandatory if a password file exists alongside.

Historical Note:Introduced in early Oracle versions, this remains a robust option in 23ai for local admin access.

B . Password authentication must be used for system-privileged administrative users.

False. "Must" is incorrect; password authentication (e.g., sqlplus sys/password) is an option, not a requirement. OS authentication or password file authentication can also be used for users like SYS. This option overstates the necessity of password-based login.

Why Incorrect:Oracle's flexibility allows multiple methods, contradicting the absolute phrasing here.

C . Password File authentication is supported for any type of database user.

False. Password file authentication is restricted to users with SYSDBA, SYSOPER, or similar system privileges (e.g., SYSBACKUP). Regular users (e.g., HR) can't use the password file (orapw<sid>); they rely on database authentication (passwords stored in the DB) or external methods.

Mechanics:The password file stores hashed credentials for privileged users, checked during remote AS SYSDBA logins.

Why Incorrect:Extending this to "any user" ignores Oracle's security model limiting password file usage.

D . REMOTE_LOGIN_PASSWORDFILE must be set to EXCLUSIVE to permit password changes for system-privileged administrative users.

False. REMOTE_LOGIN_PASSWORDFILE=EXCLUSIVE allows a dedicated password file for one instance, enabling password changes via ALTER USER SYS IDENTIFIED BY newpass. However, SHARED mode also permits changes for SYS, though not for other users added to the file. The "must" overstates the requirement; it's sufficient, not necessary.

Mechanics:EXCLUSIVE locks the file to one DB, while SHARED allows multiple DBs to use it, with restrictions on non-SYS users.

E . Password File authentication must be used for system-privileged administrative users.

True. For remote administrative access (e.g., sqlplus sys/password@orcl as sysdba), a password file is mandatory when REMOTE_LOGIN_PASSWORDFILE is EXCLUSIVE or SHARED. Local OS authentication is an alternative, but for network-based admin tasks, the password file is required, making this statement true in that context.

Mechanics:Set via orapwd (e.g., orapwd file=orapworcl password=oracle entries=10), enabling remote SYSDBA logins.

Edge Case:If REMOTE_LOGIN_PASSWORDFILE=NONE, only OS auth works locally, but this isn't the default or typical setup.

NEW QUESTION # 37
