PSM-I exam covers topics such as Scrum theory, roles, events, artifacts, and values. PSM-I Exam is based on the Scrum Guide, which is the official guide for Scrum practitioners. PSM-I exam consists of 80 multiple choice questions that need to be answered within 60 minutes.

Scrum Professional Scrum Master I Sample Questions (Q220-Q225):

NEW QUESTION # 220
Which topics should be discussed in the Sprint Review? (Choose the best answer.)

- A. The product Increment.
- B. The Scrum process, and how it was used during the Sprint.
- C. All of the above.

- D. Coding and engineering practices.

Answer: A

NEW QUESTION # 221
When is implementation of a Product Backlog item considered complete? (Choose the best answer)

- A. At the end of the Sprint.
- B. When QA reports that the item passes all acceptance criteria.
- C. When the item has no work remaining in order to be potentially released.
- D. When all work in the Sprint Backlog related to the item is finished.

Answer: C

NEW QUESTION # 222
Which two activities will a Product Owner engage in during a Sprint? (Choose two.)

- A. Update the Sprint burndown chart.
- B. Work with the stakeholders.
- C. Answer questions from the Development Team about items in the current Sprint.
- D. Run the Daily Scrum.
- E. Prioritize the Development Team's work on the Sprint Backlog.

Answer: B,C

Explanation:
The correct answers are D and E, because these are two activities that a Product Owner can engage in during a Sprint. The Scrum Guide states that "the Product Owner is responsible for maximizing the value of the product resulting from work of the Development Team." Therefore, the Product Owner can answer questions from the Development Team about items in the current Sprint, and work with the stakeholders to understand their needs and expectations.

NEW QUESTION # 223
A Scrum Master is keeping a list of open impediments, but it is growing and they have been able to resolve only a small portion of the impediments. Which two techniques would be most helpful in this situation?
(Choose two.)

- A. Arrange a triage meeting with all project managers.
- B. Add each open impediment to the Product Backlog.
- C. Prioritize the list and work on them in order.
- D. Discuss the impediments with the Development Team.

Answer: C,D

Explanation:
Two techniques that would be most helpful in this situation are to discuss the impediments with the Development Team, and to prioritize the list and work on them in order, as stated in [3]: "The Scrum Master should facilitate a discussion with the Development Team to identify and prioritize the impediments that are blocking their progress. The Scrum Master should then work with the Development Team and other stakeholders to remove or mitigate these impediments as soon as possible."

NEW QUESTION # 224
A Scrum Master is introducing Scrum to a new Team. The Team has decided that a Sprint Retrospective is unnecessary. What action should the Scrum Master take?
(choose the best answer)

- A. Begin facilitating productive and useful Sprint Retrospectives.
- B. Comply with the decision of the self-managing team.

- C. Consult with the Product Owner to see how they feel about the situation.
- D. Call a meeting between the ScrumTeam and senior management

Answer: A

Explanation:
According to the Scrum Guide, the action that the Scrum Master should take when the Team decides that a Sprint Retrospective is unnecessary is to begin facilitating productive and useful Sprint Retrospectives. The Sprint Retrospective is an essential event for the Scrum Team to inspect itself and create a plan for improvements to be enacted during the next Sprint. The Scrum Master is responsible for ensuring that this event takes place and that positive outcomes are achieved. The other options are not valid actions, as they either imply that the Scrum Master complies with or ignores the decision of the Team (such as complying with it, calling a meeting with senior management, or consulting with the Product Owner), which is not consistent with Scrum values and principles.
