The desktop-based ISTQB CTAL_TM_001 Practice Exam software is only compatible with Windows.

ISTQB Certified Tester Advanced Level - Test Manager Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which of the following should be considered the biggest risk to the schedule when trying to implement formal scripted test cases early in the SDLC for a system with a large GUI front end? [2]

- A. Test maintenance might be required due to changes in the presentation layer.
- B. Early implementation might uncover errors in the design documentation.
- C. The testers will be working on analysis and design early in the schedule.
- D. The developers may feel pressured not to change anything.

Answer: A

Explanation:

In the context of a system with a large GUI front end, the biggest risk to the schedule when implementing formal scripted test cases early in the SDLC is the potential need for test maintenance due to changes in the presentation layer. This is because the GUI is often subject to change, especially in the early stages of development, as feedback is received and design adjustments are made. These changes can render early test scripts obsolete, requiring updates and maintenance, which can be time-consuming and delay the testing schedule.

NEW QUESTION # 28

Which of the following product risks would be most effectively addressed just by static testing? 3 credits

- A. The application takes too long to process a request for additional cover.
