

100% Pass Latest CompTIA - DA0-002 - Test CompTIA Data+ Exam (2025) Cram Pdf

CompTIA A+ Certification (220-1102) Questions with 100% Correct Answers | Latest Version 2024/2025 | Expert Verified | Ace the Test

Which will accomplish a specific task for a user?

- A.) Driver
- B.) Application
- C.) Operating System
- D.) Filesystem

Which operating system is a cloud-based operating system?

- A.) Linux
- B.) Android
- C.) Windows 10
- D.) Chrome OS

Which term defines the precompiled instructions that are programmed and allows an operating system and its applications to operate?

- A.) Shell
- B.) Source

P.S. Free 2025 CompTIA DA0-002 dumps are available on Google Drive shared by CramPDF: <https://drive.google.com/open?id=1v5c94INkBRmlHQeOrchUo1qKFW8mR1NL>

Our DA0-002 Exam Torrent carries no viruses. We provide free update and online customer service which works on the line whole day. Our study materials provide varied versions for you to choose and the learning costs you little time and energy. You can use our DA0-002 exam prep immediately after you purchase them, we will send our product within 5-10 minutes to you. We treat your time as our own time, as precious as you see, so we never waste a minute or two in some useless process. Please rest assured that use, we believe that you will definitely pass the exam.

Practice tests (desktop and web-based) provide an CompTIA DA0-002 examination scenario so your preparation for the CompTIA Data+ Exam (2025) (DA0-002) exam becomes quite easier. Since the real DA0-002 examination costs a high penny, CramPDF provide a free demo of CompTIA DA0-002 Exam Dumps before your purchase. The free demo of the CompTIA Data+ Exam (2025) (DA0-002) exam prep material is helpful to remove your doubts about it. The product is available in three versions which are PDF, Web-based practice test, and Desktop practice test software.

Detailed DA0-002 Answers & DA0-002 Dump Check

The desktop CompTIA DA0-002 practice exam software has all specifications of the web-based format. It is offline software that enables users to go through the Selling CompTIA Data+ Exam (2025) (DA0-002) practice exam without having any internet connection. Windows computers support the desktop CompTIA Data+ Exam (2025) (DA0-002) practice exam software.

CompTIA Data+ Exam (2025) Sample Questions (Q19-Q24):

NEW QUESTION # 19

A data analyst needs to create a combined report that includes information from the following two tables:

Managers table

ID

First_name

Last_name

Job_title

1001

John

Doe

Manager

1002

Jane

Roe

Director

Non-managers table

ID

First_name

Last_name

Job_title

1003

Robert

Roe

Business Analyst

1004

Jane

Doe

Sales Representative

1005

John

Roe

Operations Analyst

Which of the following query methods should the analyst use for this task?

- A. Nested
- **B. Union**
- C. Join
- D. Group

Answer: B

Explanation:

This question pertains to the Data Acquisition and Preparation domain, focusing on combining data from two tables. Both tables have the same structure (ID, First_name, Last_name, Job_title) and contain employee data, suggesting the task is to create a single list of all employees.

* Group (Option A): Grouping (e.g., GROUP BY in SQL) is for aggregation (e.g., counting employees by job title), not combining tables into a single report.

* Join (Option B): Joining tables (e.g., INNER JOIN) requires a common key and combines tables horizontally, but there's no indication of a relationship between the tables (e.g., no shared key beyond ID, which isn't linked).

* Union (Option C): UNION combines the rows of two tables with the same structure into a single result set, removing duplicates, which is ideal for creating a combined report of all employees from both tables.

* Nested (Option D): Nested queries (e.g., subqueries) are used for complex filtering, not for combining tables into a single list.

The DA0-002 Data Acquisition and Preparation domain includes "executing data manipulation," and UNION is the best method for combining two tables with identical structures into a single report.

NEW QUESTION # 20

A Chief Executive Officer requests a report that must:

- * Summarize the company metrics in a simple way.
- * Be clear and concise.
- * Be easily understood by all company levels.
- * Be accessible and updated without manual intervention.

Which of the following communication approaches best meets these requirements?

- A. Slide presentation
- B. Open data portal
- **C. Key performance indicator dashboard**
- D. Executive summary

Answer: C

Explanation:

This question pertains to the Visualization and Reporting domain, focusing on selecting the appropriate communication method for a report. The requirements emphasize simplicity, clarity, accessibility, and automatic updates, which point to a specific approach.

* Executive summary (Option A): An executive summary is a written document that summarizes metrics but isn't typically updated automatically and may not be accessible to all levels without distribution.

* Slide presentation (Option B): A slide presentation can be clear but requires manual updates and isn't inherently accessible to all company levels.

* Key performance indicator dashboard (Option C): A KPI dashboard provides a simple, visual summary of metrics, is clear and concise, can be understood by all levels, and can be set up to update automatically, meeting all requirements.

* Open data portal (Option D): An open data portal provides raw data access, which may not be simple or easily understood by all levels.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a KPI dashboard is the best approach for meeting these requirements.

NEW QUESTION # 21

A data analyst is generating a custom report for a Chief Executive Officer's executive meeting. Later, the analyst learns that other custom reports will be required for future executive meetings. Which of the following delivery methods should the analyst use?

- **A. Recurring**
- B. Real-time
- C. Self-service
- D. Ad hoc

Answer: A

Explanation:

This question falls under the Visualization and Reporting domain of DA0-002, which involves selecting appropriate delivery methods for reports. The scenario describes a need for custom reports for future executive meetings, implying a scheduled, repeated delivery.

* Ad hoc (Option A): Ad hoc reports are generated on-demand for one-time use, not suitable for ongoing needs.

* Real-time (Option B): Real-time delivery provides live data updates, which isn't necessary for scheduled executive meetings.

* Recurring (Option C): Recurring delivery involves scheduling reports to be generated and delivered at regular intervals (e.g., weekly or monthly), which fits the need for future executive meetings.

* Self-service (Option D): Self-service allows users to generate reports themselves, but the scenario implies the analyst will create the reports.

The DA0-002 Visualization and Reporting domain includes understanding "the appropriate visualization in the form of a report" with delivery methods, and recurring delivery aligns with scheduled reporting needs.

NEW QUESTION # 22

A report triggers an error that prevents information from being displayed. However, the report was functional before a database upgrade. Which of the following should a data analyst do first to troubleshoot the problem?

- A. Verify the connection to the database.
- B. Check whether the data structures were modified.
- C. Ensure the system has permissions for the report service.
- D. Change the report's refresh rate.

Answer: A

Explanation:

This question falls under the Data Concepts and Environments domain, which in DA0-002 involves understanding database environments, connections, and troubleshooting issues related to data access. The scenario describes a report failing after a database upgrade, indicating a potential issue with the database environment or connectivity.

- * Ensure the system has permissions for the report service (Option A): While permissions issues can cause report failures, they are less likely to be the first issue after a database upgrade unless explicitly mentioned.
- * Change the report's refresh rate (Option B): Refresh rate adjustments might address performance issues but won't resolve a fundamental error preventing data display.
- * Verify the connection to the database (Option C): A database upgrade often involves changes to connection strings, drivers, or network configurations. Verifying the connection ensures the report can access the database, making this the most logical first step.
- * Check whether the data structures were modified (Option D): While possible, checking data structures (e.g., schema changes) is a deeper troubleshooting step that should follow after confirming basic connectivity.

The DA0-002 Data Concepts and Environments domain includes understanding database connectivity, similar to DA0-001's focus on "data schemas and dimensions" and environments (web ID: 1). Verifying the connection is the first recommended step in troubleshooting post-upgrade issues.

NEW QUESTION # 23

Which of the following best explains the purpose of data lineage?

- A. To better understand the granularity of data variable relationships
- B. To look up data definitions, ensuring consistent use across business units
- C. To see the steps and path of data flow through different systems
- D. To track data transformations from acquisition through reporting

Answer: D

Explanation:

This question pertains to the Data Concepts and Environments domain, focusing on the purpose of data lineage. Data lineage involves tracking the lifecycle of data.

- * To see the steps and path of data flow through different systems (Option A): This describes a data flow diagram, not data lineage, which focuses on transformations rather than just flow.
- * To better understand the granularity of data variable relationships (Option B): This relates to data modeling, not the purpose of data lineage.
- * To track data transformations from acquisition through reporting (Option C): Data lineage tracks the journey of data, including transformations (e.g., cleaning, aggregation) from its source to its final use in reporting, which is its primary purpose.
- * To look up data definitions, ensuring consistent use across business units (Option D): This describes a data dictionary, not data lineage.

The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," and data lineage specifically tracks transformations across the data lifecycle.
