

100% Pass LEED-Green-Associate - Reliable LEED Green Associate Exam Test Pattern

Right sizing is an important factor that will affect the energy demand of a project. The bigger the building, the higher the energy demand; therefore, projects should not be developed larger than their needs. In the LEED for Homes rating system, points are adjusted in all categories according to the square footage of the home; thus, homes that are bigger need to earn more points to achieve a LEED certification, while smaller sized homes can become LEED-certified by earning fewer points. Other LEED rating systems do have not size adjustments. This adjustment factor is called the: - ✓✓home size adjustment factor

Which level of LEED BD+C certification can a project receive by meeting all the Minimum Program Requirements (MPRs), meeting all the prerequisites except one, and additionally earning 75 points? - ✓✓cannot receive LEED certification

Which of the following strategies is not addressed by the Materials and Resources credit category? - ✓✓purchasing carbon offsets

_____ evaluates all the environmental effects of a product quantitatively for the whole lifetime of that material. - ✓✓life-cycle assessment (LCA)

100% Pass Quiz 2025 USGBC LEED-Green-Associate: LEED Green Associate Exam Marvelous Test Pattern

After our practice materials were released ten years ago, they have been popular since then and never lose the position of number one in this area. Our LEED-Green-Associate practice quiz has authority as the most professional exam material unlike some short-lived LEED-Green-Associate Exam Materials. Targeting exam candidates of the exam, we have helped over tens of thousands of exam candidates achieved success now. So you can be successful by make up your mind of our LEED-Green-Associate training guide.

USGBC LEED Green Associate Exam Sample Questions (Q223-Q228):

NEW QUESTION # 223

Which of the following statements regarding non-potable water is true?

- A. can be used for any household purpose as long as it is not consumed
- B. Captured rainwater must be treated before it can be used to irrigate landscaping
- C. Stormwater runoff can be treated and used in a facility's cooling towers
- D. Blackwater can only be used for flush fixtures

Answer: C

Explanation:

Stormwater runoff can indeed be treated and used in a facility's cooling towers. This is an example of using non-potable water (water that is not of drinking quality) for purposes that do not require potable water. Other uses for treated stormwater might include toilet flushing or irrigation. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 224

Which of the following is a tradable commodity representing proof that a unit of electricity was generated from a renewable source?

- A. Renewable Wind Certificate
- B. Certificate for Innovative Renewables
- C. Renewable Energy Certificate
- D. Tradable Energy Credit (TEC)

Answer: C

Explanation:

A Renewable Energy Certificate (REC) is a tradable commodity that represents proof that one unit of electricity was generated from a renewable energy source. RECs are used to track and trade renewable energy in the open market, providing an economic incentive for renewable energy generation. Reference: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 225

What is the current standard LEED uses to determine the baseline for indoor water savings?

- A. ANSI 17024
- B. The Energy Savings and Industrial Competitiveness Act of 2013
- C. The local standard in which the project is located
- D. Energy Policy Act (EPACT) of 1992, 2005

Answer: D

Explanation:

Explanation

The Energy Policy Act (EPACT) of 1992 set standards for indoor water fixtures like toilets and faucets, which are used as a baseline for determining water savings in LEED projects. The 2005 amendment to the EPACT further updated these standards. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 226

LEED certification steps generally proceed in which of the following order?

- A. Select LEED rating system, Submission, Application Review, Project Registration, Certification
- **B. Project Registration, Application Preparation, Submission, Application Review, Certification**
- C. Application Preparation, Project Registration, Application Review, Submission, Certification
- D. Application Preparation, Application Review, Project Registration, Submission, Certification

Answer: B

Explanation:

This is the correct order of the LEED certification process for most projects¹. The first step is to register the project on LEED Online and pay the registration fee². The second step is to prepare the application by collecting and uploading the required information and documents according to the chosen rating system and credits². The third step is to submit the application and pay the certification fee². The fourth step is to undergo the application review by a LEED accredited third party, which may request clarifications or corrections². The final step is to receive the certification decision and the LEED plaque and certificate².

NEW QUESTION # 227

When considering strategies for reducing indoor water use, which plumbing fixture would be excluded?

- A. Kitchen faucet
- B. Showerhead
- **C. Drip irrigation**
- D. Urinal

Answer: C

Explanation:

Drip irrigation is a method of watering plants that delivers water directly to the roots through a network of pipes, tubes, valves, and emitters. Drip irrigation is not a plumbing fixture, but a landscaping technique that can reduce outdoor water use by minimizing evaporation, runoff, and overspray¹².

Plumbing fixtures are devices that provide water for various purposes, such as washing, bathing, cooking, or flushing. Plumbing fixtures include urinals, showerheads, kitchen faucets, and other types of faucets, toilets, bidets, and sinks. Plumbing fixtures are subject to indoor water use reduction strategies in LEED certification, such as installing low-flow or high-efficiency models, using automatic sensors or timers, or implementing water reuse systems³⁴.

NEW QUESTION # 228

.....

Before clients purchase our LEED Green Associate Exam test torrent they can download and try out our product freely to see if it is worthy to buy our product. You can visit the pages of our product on the website which provides the demo of our LEED-Green-Associate study torrent and you can see parts of the titles and the form of our software.
