## **Premium MB-335 Files | New MB-335 Exam Guide**

Our company has always been following the trend of the MB-335 certification. Our research and development team not only study what questions will come up in the MB-335 exam. The content of our MB-335 practice materials is chosen so carefully that all the questions for the exam are contained. And our study materials have three formats which help you to read, test and study anytime, anywhere. This means with our products you can prepare for exams efficiently. If you desire a MB-335 Certification, our products are your best choice.

## **Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q90-Q95):**

**NEW QUESTION # 90**

You need to configure each item for plastic manufacturing.

Which production types should you use? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Item	Production type
Raw plastic	 None By-Product Co-Product Planning Item
Excess plastic	Scrap By-Product Co-Product Planning Item
Mold	None By-Product Co-Product Planning Item
Plastic parts	None By-Product Co-Product Planning Item

**Answer:**

Explanation:

The screenshot shows a list of items and their corresponding production types. Each item has a dropdown menu with several options, some of which are highlighted with a red box.

- Raw plastic:** Production type dropdown shows "None" (highlighted), "By-Product", "Co-Product", and "Planning Item".
- Excess plastic:** Production type dropdown shows "Scrap" (highlighted), "By-Product", "Co-Product", and "Planning Item".
- Mold:** Production type dropdown shows "None" (highlighted), "By-Product", "Co-Product", and "Planning Item".
- Plastic parts:** Production type dropdown shows "None", "By-Product", "Co-Product" (highlighted), and "Planning Item".

### NEW QUESTION # 91

A manufacturing company uses Dynamics 365 Supply Chain Management.

The shop floor has multiple pieces of the same model of equipment. The equipment produces a finished good that requires special handling.

The equipment has a visual guide available. The shop floor manager requires the following:

- \* The most recent visual guide must be available for all pieces of the equipment at the same time.
- \* The shop floor workers must have a visual guide available for handling of the finished good.

You need to configure the visual guides to meet the shop floor requirements.

What should you configure for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The interface shows a list of features on the left and requirements on the right. The requirements are "Assign a visual guide for the equipment." and "Assign a visual guide for the finished good." Each requirement has a "Feature" input box.

**Features**

- Released product
- Resource group
- Bill of materials
- BOM version

**Answer Area**

**Requirement**

Assign a visual guide for the equipment.  
Assign a visual guide for the finished good.

**Feature**

**Answer:**

**Explanation:**

The features listed on the left are highlighted with a green border: Released product, Resource group, Bill of materials, and BOM version.

The requirements on the right are "Assign a visual guide for the equipment." and "Assign a visual guide for the finished good." The feature "Bill of materials" is highlighted with a red border in the first requirement's input box, and the feature "Released product" is highlighted with a red border in the second requirement's input box.

**Answer Area**

**Requirement**

Assign a visual guide for the equipment.  
Assign a visual guide for the finished good.

**Feature**

### NEW QUESTION # 92

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing. The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations depending on the ingredient and vendor. Ingredient A is the primary active ingredient in the lotion. Ingredient B is used as a compensating ingredient.

You need to ensure that the system is set up to support the manufacturing process.

Solution: Create a dimension-based product master with variants and use the trade agreements to specify the different pricing. Does the solution meet the goal?

- A. No
- B. Yes

#### Answer: A

Explanation:

The solution does not meet the goal. Here is the explanation:

\* To ensure that the system is set up to support the process manufacturing of pain-relieving lotions, you should use the following steps 1:

\* Create a product master for the lotion and release it to the relevant legal entities. On the Product dimension groups page, select Constraint-based configuration as the configuration technology, and select the configuration dimension. On the Released product details page, select Configurable on the Engineer tab.

\* Create a constraint-based product configuration model for the lotion and add it as a version to the product master. On the Constraint-based product configuration model details page, add attributes, constraints, subcomponents, BOM lines, and route operations to define the features and structure of the lotion. For example, you can add an attribute for ingredient A and specify its concentration

\* as a value. You can also add constraints to limit the combinations of attribute values that are allowed.

\* Create a price model for the lotion and link it to the product configuration model. On the Price models page, add price components and specify how they are calculated based on attributes, subcomponents, BOM lines, or route operations. For example, you can add a price component for ingredient A and specify different prices for different concentrations.

\* Configure products on sales orders, sales quotations, purchase orders, or production orders by using the Product configuration models page. You can select values for attributes and see how they affect the price of the lotion. You can also view the price details and see how each price component contributes to the total price.

\* The solution in the question is not correct, because it does not involve constraint-based product configuration or price models.

Creating a dimension-based product master with variants and using trade agreements to specify different pricing would not allow you to handle different concentrations of ingredients or calculate prices based on attributes.

1: Product configuration overview : Create constraint-based configuration : Price models

#### NEW QUESTION # 93

You need to set up the state control for sales of motorcycles.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create an inclusive restricted product list for United States and add the motorcycle part to the list.
- B. Create an exclusive restricted product list for California and add the motorcycle part to the list.
- C. Create an exclusive restricted product list for Missouri and add the motorcycle part to the list.
- D. Create an inclusive restricted product list for United States. Do not add the motorcycle part to the list.

#### Answer: A,B

Explanation:

Reference:

<https://stoneridgesoftware.com/working-with-restricted-products-in-dynamics-365-operations/>

#### NEW QUESTION # 94

You are a production manager at a company which produces large batches of coffee and creamers.

After a quality inspection, batch 120008 of your cold brew coffee (item number CB-0001) was found to be too acidic and must be reworked.

You need to add 20 grams of sugar and stir the product for an additional 0.5 hours.

What three actions are required on the rework order? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Delete all route operations except for a half an hour stirring operation.
- B. Delete all items from the production formula except for 20 grams of sugar.
- C. Add a route operation for 0.5 run time hours of stirring.
- D. Add 20 grams of sugar to the production formula.
- E. Manually reserve batch 120008 after estimating the batch order.

**Answer: A,C,D**

Explanation:

Explanation

The correct answer is B, C, and E.

Here is the explanation:

To rework a batch order in Dynamics 365 Supply Chain Management, you need to create a new batch order and set the Rework batch toggle to Yes1. You also need to select the Batch number of the original batch that needs to be reworked1. The new batch order will have only one formula line that represents the original batch, and no route operations1.

To add 20 grams of sugar and stir the product for an additional 0.5 hours, you need to do the following actions on the rework order: Add 20 grams of sugar to the production formula. You can do this by clicking on the Formula option on the All production orders form and adding a new formula line for sugar with a quantity of 20 grams1. You can also specify the ingredient type for sugar, such as Compensating or Filler2.

Add a route operation for 0.5 run time hours of stirring. You can do this by clicking on the Route option on the All production orders form and adding a new route operation for stirring with a run time of 0.5 hours1. You can also specify the resource or resource group that will perform the stirring operation3.

Delete all route operations except for a half an hour stirring operation. You can do this by clicking on the Route option on the All production orders form and deleting any existing route operations that are not related to stirring1. This way, you can avoid unnecessary steps and costs for the rework order.

## NEW QUESTION # 95

.....

In order to cater to meet different needs of our customers, three versions of MB-335 exam bootcamp are available. Each version has its own advantages, and you can choose the most suitable one in accordance with your needs. Furthermore, MB-335 exam bootcamp is compiled by outstanding experts, therefore the quality and the accuracy can be guaranteed. Besides, we have the professional technicians to examine the website on a regular basis, hence a clean and safe shopping environment will be provided to you. You just need to buy the MB-335 Exam Dumps with ease.
