

# 100% Pass NetSec-Pro Test Engine Version - Palo Alto Networks Network Security Professional Unparalleled Braindumps Torrent

2025 Latest Valid Braindumps NetSec-Pro PDF Dumps and NetSec-Pro Exam Engine Free Share: <https://drive.google.com/open?id=1T5iy-o48Z7Gmo7n60jXuSfkYjuWZW6qm>

Customers can start using the Palo Alto Networks NetSec-Pro Exam Questions instantly just after purchasing it from our website for the preparation of the NetSec-Pro certification exam. They can also evaluate the Palo Alto Networks Network Security Professional (NetSec-Pro) practice test material before buying with a free demo. The users will receive updates 365 days after purchasing. And they will also get a 24/7 support system to help them anytime if they got stuck somewhere or face any issues while preparing for the NetSec-Pro Exam.

Our NetSec-Pro exam questions are compiled by experts and approved by authorized personnel and boost varied function so that you can learn NetSec-Pro test torrent conveniently and efficiently. We provide free download and tryout before your purchase and if you fail in the exam we will refund you in full immediately at one time. Our exam questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the NetSec-Pro Exam, so little time great convenience for some workers. It must be your best tool to pass your exam and achieve your target.

## Braindumps Palo Alto Networks NetSec-Pro Torrent - NetSec-Pro Test Prep

Why we are ahead of the other sites in the IT training industry? Because the information we provide have a wider coverage, higher quality, and the accuracy is also higher. So ValidBraindumps is not only the best choice for you to participate in the Palo Alto Networks Certification NetSec-Pro Exam, but also the best protection for your success.

## Palo Alto Networks Network Security Professional Sample Questions (Q40-Q45):

### NEW QUESTION # 40

Which set of attributes is used by IoT Security to identify and classify appliances on a network when determining Device-ID?

- A. Hostname, application usage, and encryption method
- B. Device model, firmware version, and user credential
- C. MAC address, device manufacturer, and operating system
- D. IP address, network traffic patterns, and device type

**Answer: C**

Explanation:

IoT Security uses MAC address, device manufacturer, and OS information to identify and classify devices via Device-ID.

"IoT Security uses passive network traffic analysis to fingerprint devices based on the MAC address, manufacturer, and operating system to ensure accurate classification." (Source: IoT Security Device-ID and Classification) These attributes provide a robust, manufacturer-agnostic method to fingerprint IoT devices.

### NEW QUESTION # 41

Which feature of SaaS Security will allow a firewall administrator to identify unknown SaaS applications in an environment?

- A. App-ID
- **B. App-ID Cloud Engine**
- C. SaaS Data Security
- D. Cloud Identity Engine

**Answer: B**

Explanation:

App-ID Cloud Engine (ACE) in SaaS Security uses cloud-based signatures to detect unknown and unsanctioned SaaS applications in the environment.

"App-ID Cloud Engine (ACE) uses real-time cloud intelligence to identify SaaS applications, including previously unknown or newly introduced applications." (Source: ACE for SaaS Visibility) This feature is key for comprehensive SaaS visibility beyond static signatures.

#### NEW QUESTION # 42

How do Cloud NGFW instances get created when using AWS centralized deployments?

- A. Cloud NGFW is placed in a vWAN with a virtual hub.
- B. A security VPC will be created as transit gateways to push all traffic through the area.
- C. They replace the internet gateway service.
- **D. Selected VPCs will have Cloud NGFW workloads added to them.**

**Answer: D**

Explanation:

When using AWS centralized deployments for Cloud NGFW, the service deploys NGFW instances into selected VPCs as additional workloads to secure that traffic.

"In centralized deployments, Cloud NGFW instances are deployed as security appliances within the selected VPCs, ensuring consistent traffic inspection and protection." (Source: Cloud NGFW Deployment Models) This approach minimizes complexity and ensures direct security policy enforcement within AWS.

#### NEW QUESTION # 43

A cloud security architect is designing a certificate management strategy for Strata Cloud Manager (SCM) across hybrid environments. Which practice ensures optimal security with low management overhead?

- **A. Deploy centralized certificate automation with standardized protocols and continuous monitoring.**
- B. Configure manual certificate deployment with quarterly reviews and environment-specific security protocols.
- C. Use cloud provider default certificates with scheduled synchronization and localized renewal processes.
- D. Implement separate certificate authorities with independent validation rules for each cloud environment.

**Answer: A**

Explanation:

A centralized certificate automation approach reduces management overhead and security risks by standardizing processes, automating renewals, and continuously monitoring the certificate lifecycle.

"Implementing a centralized certificate management approach with automation and continuous monitoring ensures optimal security while reducing operational complexity in hybrid environments." (Source: Best Practices for Certificate Management)

#### NEW QUESTION # 44

A network security engineer has created a Security policy in Prisma Access that includes a negated region in the source address. Which configuration will ensure there is no connectivity loss due to the negated region?

- A. Set the service to be application-default.
- **B. Create a Security policy for the negated region with destination address "any".**
- C. Add all regions that contain private IP addresses to the source address.
- D. Add a Dynamic Application Group to the Security policy.

**Answer: B**

Explanation:

Negated source addresses exclude traffic from the specified region. To avoid accidental connectivity loss for traffic from that region, create a separate Security policy to explicitly permit it.

"When you use a negated region in a Security policy rule, ensure to create an additional Security policy to permit traffic from the excluded (negated) region to avoid unintentional drops." (Source: Prisma Access Policy Best Practices) This ensures explicit inclusivity for the excluded region, maintaining reliable connectivity.

## NEW QUESTION # 45

.....

The Palo Alto Networks Network Security Professional (NetSec-Pro) certification is a valuable credential that assists you to enhance your existing skills and experience. By doing this you can stay updated and competitive in the market and achieve your career objectives in a short time period. To do this you just need to pass the one Palo Alto Networks Network Security Professional exam. Are you ready for this? If yes then enroll in Palo Alto Networks NetSec-Pro Exam Dumps and start this journey with Valid Braindumps. The Valid Braindumps offers real, valid, and updated NetSec-Pro Questions that surely will help you in exam preparation and enable you to pass the challenging NetSec-Pro exam with flying colors.
