Free PDF Quiz 2025 NSK300: Accurate Netskope Certified Cloud Security Architect Valid Vce Dumps

With our excellent NSK300 exam questions, you can get the best chance to obtain the NSK300 certification to improve yourself, for better you and the better future. With our NSK300 training guide, you are acknowledged in your profession. The NSK300 exam braindumps can prove your ability to let more big company to attention you. Then you have more choice to get a better job and going to suitable workplace. Why not have a try on our NSK300 Exam Questions, you will be pleasantly surprised our NSK300 exam questions are the best preparation material.

Netskope NSK300 Exam Syllabus Topics:

Topic	Details
Topic 1	Advanced Threat Protection: This topic explores how Netskope detects and mitigates sophisticated threats, such as malware and cloud data breaches.

Topic 2	Designing and Implementing Netskope Security: Your ability to build and configure Netskope for a variety of security requirements, such as SaaS access control, data security, and cloud workload protection, will be evaluated in this topic.
Topic 3	Cloud Threat Detection and Response: This article describes how to use Netskope in a cloud environment for threat hunting, investigation, and incident response.
Topic 4	Netskope Platform Monitoring and Troubleshooting: It focuses on monitoring Netskope's health, identifying possible problems, and successfully resolving them.

Netskope Certified Cloud Security Architect Sample Questions (Q39-Q44):

NEW QUESTION # 39

Review the exhibit.

You are asked to integrate Netskope with Crowdstrike EDR. You added the Remediation profile shown in the exhibit. Which action will this remediation profile take?

- A. The malware hash will be added as an IOC in Netskope.
- B. The malware will be quarantined.
- C. The endpoint will be isolated.
- D. The malware hash will be added as an IOC in Crowdstrike.

Answer: D

NEW QUESTION # 40

A company has deployed Explicit Proxy over Tunnel (EPoT) for their VDI users. They have configured Forward Proxy authentication using Okta Universal Directory. They have also configured a number of Real-time Protection policies that block access to different Web categories for different AD groups so, for example, marketing users are blocked from accessing gambling sites. During User Acceptance Testing, they see inconsistent results where sometimes marketing users are able to access gambling sites and sometimes they are blocked as expected. They are seeing this inconsistency based on who logs into the VDI server first. What is causing this behavior?

- A. Forward Proxy is not configured to use the Cookie Surrogate

- B. Forward Proxy authentication is configured but not enabled.
- C. Forward Proxy is not configured to use the IP Surrogate
- D. Forward Proxy is configured to use the Cookie Surrogate

Answer: A

Explanation:

The inconsistent results observed during User Acceptance Testing (where marketing users sometimes access gambling sites and sometimes are blocked) are likely due to the configuration of the Forward Proxy.

Cookie Surrogate: The Cookie Surrogate is a mechanism used in Forward Proxy deployments to maintain user context across multiple requests. It ensures that user-specific policies are consistently applied even when multiple users share the same IP address (common in VDI environments).

Issue: If the Forward Proxy is not configured to use the Cookie Surrogate, it may lead to inconsistent behavior. When different users log into the VDI server, their requests may not be associated with their specific user context, resulting in varying policy enforcement.

Solution: Ensure that the Forward Proxy is properly configured to use the Cookie Surrogate, allowing consistent policy enforcement based on individual user identities. Reference:

NEW QUESTION # 41

A company wants to capture and maintain sensitive PII data in a relational database to help their customers.

There are many employees and contractors that need access to sensitive customer data to perform their duties. The company wants to prevent the exfiltration of sensitive customer data by their employees and contractors.

In this scenario, what would satisfy this requirement?

- A. regular expression
- B. machine learning
- C. exact data match
- D. fingerprinting

Answer: C

NEW QUESTION # 42

You recently began deploying Netskope at your company. You are steering all traffic, but you discover that the Real-time Protection policies you created to protect Microsoft OneDrive are not being enforced.

Which default setting in the UI would you change to solve this problem?

- A. Remove the default steering exception for Cloud Storage.
- B. Disable the default certificate-pinned application
- C. Disable the default Microsoft appsuite SSL rule.
- D. Remove the default steering exception for domains.

Answer: D

Explanation:

When deploying Netskope and steering all traffic, if you find that the Real-time Protection policies for Microsoft OneDrive are not being enforced, the likely issue is with the default steering exceptions. To resolve this, you should remove the default steering exception for domains. This is because the default exceptions may include domains related to Microsoft services, which could prevent the Real-time Protection policies from being applied to traffic directed towards OneDrive. By removing these exceptions, you ensure that all traffic, including that to OneDrive, is subject to the policies you have set up.

NEW QUESTION # 43

Review the exhibit.

1

SOURCE ⓘ	DESTINATION	PROFILE	ACTION
Any	Microsoft Office 365 Suite:AcmeCorp	None	Allow
Any	Microsoft Office 365 OneDrive for Business, Microsoft OneDrive, MS GCC Office 365 OneDrive for Business Create, Post, Share, Upload	None	Block Default Template
Any	Microsoft Office 365 OneDrive for Business:AcmeCorp	None	Allow
Any	Microsoft Office 365 Suite	None	Block Default Template

2

SOURCE ⓘ	DESTINATION	PROFILE	ACTION
Any	Microsoft Office 365 Suite:AcmeCorp	None	Allow
Any	Microsoft Office 365 Suite	None	Block Default Template
Any	Microsoft Office 365 OneDrive for Business, Microsoft OneDrive, MS GCC Office 365 OneDrive for Business	None	Allow

3

SOURCE ⓘ	DESTINATION	PROFILE	ACTION
Any	Microsoft Office 365 Suite:AcmeCorp	None	Allow
Any	Microsoft Office 365 Suite	None	Block Default Template

4

SOURCE ⓘ	DESTINATION	PROFILE	ACTION
Any	Microsoft Office 365 OneDrive for Business, Microsoft OneDrive, MS GCC Office 365 OneDrive for Business Create, Post, Share, Upload	None	Block Default Template
Any	Microsoft Office 365 OneDrive for Business:AcmeCorp	None	Allow

AcmeCorp has recently begun using Microsoft 365. The organization is concerned that employees will start using third-party non-AcmeCorp OneDrive instances to store company data. The CISO asks you to use Netskope to create a policy that ensures that no data is being uploaded to non-AcmeCorp instances of OneDrive.

Referring to the exhibit, which two policies would accomplish this posture? (Choose two.)

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A,B

Explanation:

To ensure that no data is uploaded to non-AcmeCorp instances of OneDrive, the policies that would accomplish this are:

Policy B: This policy allows traffic only for AcmeCorp's OneDrive and blocks all other Microsoft 365 Suite traffic. It ensures that data is not uploaded to non-AcmeCorp OneDrive instances by restricting access to only the corporate instance of OneDrive.

Policy C: This policy allows traffic for AcmeCorp's Microsoft 365 Suite but blocks all other OneDrive for Business traffic. It achieves the same outcome by permitting corporate suite usage while preventing uploads to any OneDrive for Business instances that are not part of AcmeCorp.

These policies are designed to provide granular control over the data flow, ensuring that company data remains within the corporate

environment and is not transferred to external or personal storage solutions.

NEW QUESTION # 44

.....

In the worst-case scenario, if our content fails to deliver and does not match well with your expectations, you can always redeem your paid amount back as we offer a full money-back guarantee (terms and conditions apply). We know that with each passing day syllabus of NSK300 Exam modifies and different inclusions are added. So to combat such problems, we offer regular updates for 1 year straight for free after initial payment to make sure our candidates receive the most up-to-date content for their authentic and safe preparation.
