Candidates can reach out to the ExamDiscuss support staff anytime. The ExamDiscuss help desk is the place to go if you have any questions or problems. Time management is crucial to passing the SAP C_TS422_2023 exam. Candidates may prepare for the SAP C_TS422_2023 Exam with the help of ExamDiscuss desktop-based C_TS422_2023 practice exam software, web-based C_TS422_2023 practice tests and SAP C_TS422_2023 pdf questions.

SAP C_TS422_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Material Requirements Planning in SAP S • 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.
Topic 2	• Capacity Planning in SAP S • 4HANA: This section covers a discussion of SAP S • 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
Topic 3	• Lean Manufacturing in SAP S • 4HANA: This section covers repetitive manufacturing master data, line load planning, and Kanban systems.
Topic 4	• Introduction to SAP S • 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S • 4HANA, its main components, business applications, and user experience strategy.
Topic 5	• Managing Clean Core: This section covers the application of clean core principles to enhance business process agility, reduce adaptation efforts, and drive innovation in ERP systems.
Topic 6	• Demand Management in SAP S • 4HANA: This section covers a comparison of production methods in various manufacturing environments.
Topic 7	• Production Orders in SAP S • 4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes.

C_TS422_2023 Detailed Study Dumps | C_TS422_2023 Exam Actual Tests

As a working person, the SAP C_TS422_2023 practice exam will be a great help because you are left with little time to prepare for

the SAP C_TS422_2023 certification exam which you cannot waste to make time for the SAP C_TS422_2023 Exam Questions. You can find yourself sitting in your dream office and enjoying the new opportunity.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q75-Q80):

NEW QUESTION # 75

What options does a planner have in the planning table for repetitive manufacturing?

Note: There are 2 correct answers to this question.

- A. Create new production quantities.
- B. Reschedule deallocate operations.
- C. Dispatch operations to work centers.
- D. Change the assignments of production quantities to production lines.

Answer: B,D

NEW QUESTION # 76

You want to insert an operation at a certain time on a work center in the graphical planning table. The planning direction is forward. The desired dispatching time coincides with an operation that has previously been dispatched.

How does the insertion take place?

- A. The new operation is inserted at the desired time; the previously dispatched operation is moved backward.
- B. The new operation is inserted at the desired time; the previously dispatched operation is moved forward.
- C. The previously dispatched operation stays as is; the new operation is inserted after the dispatched operation.
- D. The previously dispatched operation stays as is; the new operation is inserted before the dispatched operation.

Answer: A

NEW QUESTION # 77

What data can you maintain in the sub-items of a bill of material (BOM)? Note: There are 2 correct answers to this question.

- A. Status
- B. Quantity
- C. Scrap percentage
- D. Installation point

Answer: B,D

Explanation:

In SAP S/4HANA, sub-items in a BOM (transaction CS01/CS02) are detailed breakdowns of a component (e.g., for variable-size items or complex assemblies), accessed via the Sub-Item tab. The maintainable data includes:

* Quantity(A): The sub-item quantity (field: Sub-Item Quantity) specifies the amount of the sub- component required per unit of the parent item (e.g., 2 meters of a pipe). This ensures accurate material planning and consumption in production orders.

* Installation point(C): The installation point (field: Installation Point) indicates where the sub-item is installed within the assembly (e.g., a specific position in a machine). This is critical for technical documentation and assembly instructions.

Status(B) applies to the BOM header or main item (e.g., Active/Inactive), not sub-items, which inherit the parent's status. Scrap percentage(D) is maintained at the main item level (Item Data, Scrap field) or in the material master, not at the sub-item level, as sub-items detail usage, not waste. This is per SAP's BOM sub- item structure.

NEW QUESTION # 78

What are the prerequisites for a reporting point confirmation in repetitive manufacturing? Note: There are 2 correct answers to this question.

- A. Activating the reporting point backflush in the order dependent parameters
- B. Defining the operations as reporting points using the control key
- C. Defining the relevant work centers in the routing

- D. Activating the reporting point backflush in the work centers

Answer: B,D

NEW QUESTION # 79

Which standard item categories can you select inside a bill of material (BOM)? Note: There are 2 correct answers to this question.

- A. Variable-size item
- B. Preliminary item
- C. Work item
- D. WBS item

Answer: A,B

Explanation:

In SAP S/4HANA, the item category in a BOM (transaction CS01/CS02, field: Item Category) classifies components and determines their handling in production and procurement. Standard item categories include:

* Variable-size item(A): Item category "R" (Variable-Size Item) is used for components with dimensions (e.g., sheets, pipes) where quantity is calculated based on size data (entered in the Variable-Size Item Data tab). It's common in manufacturing for materials cut or sized during production.

* Preliminary item(C): Item category "V" (Preliminary Item) is a placeholder for components not yet fully specified (e.g., during design phase). It allows BOM creation to proceed, with details added later, and is valid for planning purposes.

Work item(B) is not a standard BOM item category-"L" (Stock Item) or "N" (Non-Stock Item) might apply to work-related components, but "Work Item" isn't a defined term.WBS item(D) (Work Breakdown Structure, category "W") relates to Project Systems (PS) BOMs, not standard production BOMs in PP, requiring PS integration. This is per SAP's BOM item category definitions.

NEW QUESTION # 80

.....

If you purchase SAP C_TS422_2023 exam questions and review it as required, you will be bound to successfully pass the exam. And if you still don't believe what we are saying, you can log on our platform right now and get a trial version of SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing C_TS422_2023 study engine for free to experience the magic of it.
