

# 100% Pass PECB - Pass-Sure NIS-2-Directive-Lead-Implementer Trustworthy Pdf

What's more, part of that TestsDumps NIS-2-Directive-Lead-Implementer dumps now are free: [https://drive.google.com/open?id=14oqlbml-1\\_3kMep6z-XXKTOJEUMAeBHKL](https://drive.google.com/open?id=14oqlbml-1_3kMep6z-XXKTOJEUMAeBHKL)

If you fail NIS-2-Directive-Lead-Implementer exam unluckily, don't worry about it, because we provide full refund for everyone who failed the exam. You can ask for a full refund once you show us your unqualified transcript to our staff. The whole process is time-saving and brief, which would help you pass the next NIS-2-Directive-Lead-Implementer Exam successfully. Please contact us through email when you need us. Our purchasing process is designed by the most professional experts, that's the reason why we can secure your privacy while purchasing our NIS-2-Directive-Lead-Implementer test guide.

## PECB NIS-2-Directive-Lead-Implementer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Planning of NIS 2 Directive requirements implementation: This domain targets Project Managers and Implementation Specialists focusing on how to initiate and plan the rollout of NIS 2 Directive requirements. It includes using best practices and methodologies to align organizational processes and cybersecurity programs with the directive's mandates.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Cybersecurity roles and responsibilities and risk management: This section measures the expertise of Security Leaders and Risk Managers in defining and managing cybersecurity roles and responsibilities. It also covers comprehensive risk management processes, including identifying, assessing, and mitigating cybersecurity risks in line with NIS 2 requirements.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Fundamental concepts and definitions of NIS 2 Directive: This section of the exam measures the skills of Cybersecurity Professionals and IT Managers and covers the basic concepts and definitions related to the NIS 2 Directive. Candidates gain understanding of the directive's scope, objectives, key terms, and foundational requirements essential to lead implementation efforts effectively within organizations.</li></ul>

## NIS-2-Directive-Lead-Implementer Latest Dumps Files | NIS-2-Directive-Lead-Implementer Latest Test Discount

Now, I am glad to introduce a secret weapon for all of the candidates to pass the exam as well as get the related certification without any more ado-- our NIS-2-Directive-Lead-Implementer study braindumps. You can only get the most useful and efficient NIS-2-Directive-Lead-Implementer Guide materials with the most affordable price from our company, since we aim to help as many people as possible rather than earning as much money as possible. You will be much awarded with our NIS-2-Directive-Lead-Implementer learning engine.

### PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q27-Q32):

#### NEW QUESTION # 27

What is the required frequency for Member States to update the register of entities?

- A. Every six months
- **B. Every two years**
- C. Every year

**Answer: B**

#### NEW QUESTION # 28

Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

Based on the scenario above, answer the following question:

Is the role of the MHospital's CSIRT regarding vulnerability assessment in alignment with the requirements of Article 11 of the NIS 2 Directive?

- A. No, according to Article 11, the CSIRT should not conduct scanning of the network and information systems of the entity as this should be done during the coordinated vulnerability disclosure
- **B. Yes, the role of the CSIRT is consistent with vulnerability assessment requirements specified in Article 11**
- C. No, the CSIRT should not be involved in vulnerability management, as defined in Article 11

**Answer: B**

### NEW QUESTION # 29

Scenario 4: StellarTech is a technology company that provides innovative solutions for a connected world. Its portfolio includes groundbreaking Internet of Things (IoT) devices, high-performance software applications, and state-of-the-art communication systems. In response to the ever-evolving cybersecurity landscape and the need to ensure digital resilience, StellarTech has decided to establish a cybersecurity program based on the NIS 2 Directive requirements. The company has appointed Nick, an experienced information security manager, to ensure the successful implementation of these requirements. Nick initiated the implementation process by thoroughly analyzing StellarTech's organizational structure. He observed that the company has embraced a well-defined model that enables the allocation of verticals based on specialties or operational functions and facilitates distinct role delineation and clear responsibilities.

To ensure compliance with the NIS 2 Directive requirements, Nick and his team have implemented an asset management system and established as asset management policy, set objectives, and the processes to achieve those objectives. As part of the asset management process, the company will identify, record, maintain all assets within the system's scope.

To manage risks effectively, the company has adopted a structured approach involving the definition of the scope and parameters governing risk management, risk assessments, risk treatment, risk acceptance, risk communication, awareness and consulting, and risk monitoring and review processes. This approach enables the application of cybersecurity practices based on previous and currently cybersecurity activities, including lessons learned and predictive indicators. StellarTech's organization-wide risk management program aligns with objectives monitored by senior executives, who treat it like financial risk. The budget is structured according to the risk landscape, while business units implement executive vision with a strong awareness of system-level risks. The company shares real-time information, understanding its role within the larger ecosystem and actively contributing to risk understanding. StellarTech's agile response to evolving threats and emphasis on proactive communication showcase its dedication to cybersecurity excellence and resilience.

Last month, the company conducted a comprehensive risk assessment. During this process, it identified a potential threat associated with a sophisticated form of cyber intrusion, specifically targeting IoT devices. This threat, although theoretically possible, was deemed highly unlikely to materialize due to the company's robust security measures, the absence of prior incidents, and its existing strong cybersecurity practices.

In terms of the NIST Framework, under which implementation tier does StellarTech fall based on the level of implementation of its risk management measures within the company? Refer to scenario 4.

- A. Tier 3: Repeatable
- **B. Tier 4: Adaptive**
- C. ITier 2: Risk informed

**Answer: B**

### NEW QUESTION # 30

What is the key difference between Tier 2 and Tier 3 disaster recovery strategies?

- **A. Tier 2 uses couriers to transport data between centers, while Tier 3 uses electronic vaulting of critical data**
- B. Tier 2 involves electronic vaulting of critical data, while Tier 3 relies on offsite vaults
- C. Tier 2 mandates dual sites with peer-to-peer connections, whereas Tier 3 focuses on data transfer enhancement

**Answer: A**

### NEW QUESTION # 31

Scenario 7: CleanHydro is a forward-thinking company operating in the wastewater industry. Based in Stockholm, Sweden, the company is dedicated to revolutionizing wastewater treatment processes using advanced automated technology aiming to reduce environmental impact.

Recognizing the paramount importance of robust cybersecurity measures to protect its advanced technologies, CleanHydro is committed to ensuring compliance with the NIS 2 Directive. In line with this commitment, the company has initiated a comprehensive employee training program. To do so, the company adheres to Sweden's national cybersecurity strategy, which includes objectives, governance frameworks to guide strategy implementation and define roles and responsibilities at the national level, risk assessment mechanism, incident preparedness measures, a list of involved authorities and stakeholders, and coordination policies.

In addition, CleanHydro engaged GuardSecurity, an external cybersecurity consultancy firm, to evaluate and potentially improve the cybersecurity infrastructure of the company to ensure compliance with the NIS 2 Directive. GuardSecurity focused on strengthening the risk management process of the company.

The company started determining competence development needs by considering competence levels, comparing them with required competence levels, and then prioritizing actions to address competence gaps found based on risk-based thinking. Based on this determination, the company planned the competence development activities and defined the competence development program type

and structure. To provide the training and awareness programs, the company contracted CyberSafe, a reputable training provider, to provide the necessary resources, such as relevant documentation or tools for effective training delivery. The company's top management convened a meeting to establish a comprehensive cybersecurity awareness training policy. It was decided that cybersecurity awareness training sessions would be conducted twice during the onboarding process for new employee to instill a culture of cybersecurity from the outset and following a cybersecurity incident.

In line with the NIS 2 compliance requirements, CleanHydro acknowledges the importance of engaging in communication with communities consisting of other essential and important entities. These communities are formed based on industry sectors, critical infrastructure sectors, or other relevant classifications. The company recognizes that this communication is vital for sharing and receiving crucial cybersecurity information that contributes to the overall security of wastewater management operations.

When developing its cybersecurity communication strategy and setting objectives, CleanHydro engaged with interested parties, including employees, suppliers, and service providers, to understand their concerns and gain insights. Additionally, the company identified potential stakeholders who has expressed interest in its activities, products, and services. These activities aimed to contribute to the achievement of the overall objectives of its cybersecurity communication strategy, ensuring that it effectively addressed the needs of all relevant parties.

Based on the scenario above, answer the following questions:

Is the national cybersecurity strategy in accordance with Article 7 of the NIS 2 Directive?

- A. No, Article 7 states that the national cybersecurity strategy must also encompass a plan to raise cybersecurity awareness among citizens
- B. No, the national cybersecurity strategy must also establish formal partnerships with international cybersecurity organizations, as specified in Article 7.
- C. Yes, the national cybersecurity strategy includes all the elements as specified in Article 7

**Answer: C**

## NEW QUESTION # 32

.....

It is not easy to continue keeping the good quality of a product and at the same time to continue keeping innovating it to become better. But we persisted for so many years on the NIS-2-Directive-Lead-Implementer exam questions. Our NIS-2-Directive-Lead-Implementer practice guide just wants to give you a product that really makes you satisfied. I know that we don't say much better than letting you experience our NIS-2-Directive-Lead-Implementer Training Questions yourself. You can free download the demos of the NIS-2-Directive-Lead-Implementer learning quiz to have a try!
