Which component allows users to group data in Insights for better visualization?

- A. Aggregate Functions
- B. SLA Policy
- C. Case Escalation
- D. Work Queue Routing

Answer: A

Explanation:

Aggregate Functions enable users to group data and apply calculations, such as sum, count, and average in Insights. This helps

- **B. SLAs help track and enforce processing time limits**
- C. SLAs define user access levels for a case
- D. SLAs determine the role of a user within a case

Answer: B

Explanation:

A Service Level Agreement (SLA) enforces time-based performance goals by setting urgency levels and defining actions if goals are not met. It ensures cases are completed within specified timeframes.

Which Agile Workbench feature ensures that feedback is categorized for easy tracking?

- **A. Feedback Tags**
- B. Work Queue Labels
- C. SLA Goal Adjustments

Feedback Tags help categorize business feedback, bugs, and feature requests, making it easier for developers to track and prioritize improvements. This ensures faster response times and structured development workflows. SLA goals and work queues do not manage Agile feedback tracking.
