CheckPoint Check Point Certified Troubleshooting Expert - R81.20 Sample Questions (Q21-Q26):

NEW QUESTION # 21

What are the main components of Check Point's Security Management architecture?

- A. Management server. Security Gateway. Multi-Domain Server. SmartEvent Server
- B. Management server, Log server, Gateway server. Security server
- C. Management server, management database, log server, automation server
- D. Management server. Log Server, LDAP Server, Web Server

Answer: C

Explanation:

The main components of Check Point's Security Management architecture are:

- * Management server: This is the central component that manages the security policy, configuration, and licenses for the Security Gateways and other Check Point devices. It also provides the SmartConsole interface for the administrators to manage the security environment.
- * Management database: This is the database that stores the security policy, configuration, and objects for the Security Management Server. It also stores the logs and events from the Security Gateways and other Check Point devices.
- * Log server: This is the component that receives and stores the logs and events from the Security Gateways and other Check Point devices. It also provides the SmartLog and SmartEvent interfaces for the administrators to view, analyze, and manage the logs and events.
- * Automation server: This is the component that provides the REST API and the CLI for the administrators to automate and script the security management tasks.

1: (CCTE) - Check Point Software
