## AZ-800 Latest Exam Practice - Reliable AZ-800 Exam Tips

Our Administering Windows Server Hybrid Core Infrastructure (AZ-800) practice exam software will record all the attempts you have made in the past and display any modifications or improvements made in each attempt. This Prepare for your Administering Windows Server Hybrid Core Infrastructure (AZ-800) exam simulation software enables you to track your progress and quantify how much you have improved.

## Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q56-Q61):

### NEW QUESTION # 56

You have an on-premises server named Server1 that runs Windows Server and has internet connectivity.

You have an Azure subscription.

You need to monitor Server1 by using Azure Monitor.

Which resources should you create in the subscription, and what should you install on Server1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

In the subscription, create:

An Azure Files storage account
A Log Analytics workspace
An Azure SQL database and a data collection rule
An Azure Blob Storage account and a data collection rule

On Server1, install:

The Azure Monitor agent
The Analytics gateway
The Device Health Attestation server role

**Answer:**

Explanation:

In the subscription, create:

An Azure Files storage account
A Log Analytics workspace
An Azure SQL database and a data collection rule
An Azure Blob Storage account and a data collection rule

On Server1, install:

The Azure Monitor agent
The Analytics gateway
The Device Health Attestation server role

Explanation:

In the subscription, create:

An Azure Files storage account
A Log Analytics workspace
An Azure SQL database and a data collection rule
An Azure Blob Storage account and a data collection rule

On Server1, install:

The Azure Monitor agent
The Analytics gateway
The Device Health Attestation server role

#### NEW QUESTION # 57

You have an Azure subscription that contains a virtual machine named VM1 as shown in the following exhibit.

VM Virtual machine

Connect Start Restart Stop Capture Delete Refresh Open in mobile CLI / PS

Essentials

Resource group ([move](#)) RG1

Operating system Windows (Windows Server 2022 Datacenter Azure Edition)

Status Running

Size Standard D8s v3 (8 vcpus, 32 GiB memory)

Location East US (Zone 1)

Public IP address 20.84.95.86

Subscription ([move](#)) [Virtual Studio Enterprise Subscription](#)

Virtual network/subnet VNet1/Subnet2

Subscription ID 7fefdf66e-8694-4b54-beae-17fd819d4873

DNS name [Not configured](#)

Availability zone 1

Tags ([edit](#)) [Click here to add tags](#)

The subscription has the disks shown in the following table.

Name	Resource group	Location	Availability zone
Disk1	RG1	East US	None
Disk2	RG2	East US	1
Disk3	RG1	Central US	None
Disk4	RG1	Central US	1

Which disks can you attach as data disks to VM1?

- A. Disk2 and Disk4 only
- B. Disk1, Disk2, Disk3, and Disk4
- C. **Disk2 only**
- D. Disk1, Disk3, and Disk4 only
- E. Disk1 and Disk2 only
- F. Disk4 only

**Answer: C**

## NEW QUESTION # 58

You have an Azure subscription named sub1 and 500 on-premises virtual machines that run Windows Server.

You plan to onboard the on-premises virtual machines to Azure Arc by running the Azure Arc deployment script. You need to create an identity that will be used by the script to authenticate access to sub1. The solution must use the principle of least privilege.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### NEW QUESTION # 59

You need to implement the planned change for Data1.

Which actions should you perform in sequence? To answer, drag the appropriate actions to the correct order. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Actions

- Add a server endpoint.
- Create a sync group.
- Deploy the Azure Storage Sync service.
- Install the DFS Replication role service.
- Install the Storage Replica feature.

#### Answer Area

Step 1:

Step 2: Install and register the Azure File Sync agent.

Step 3:

Step 4:

### Answer:

Explanation:

Actions

Add a server endpoint.

Create a sync group.

Deploy the Azure Storage Sync service.

Install the DFS Replication role service.

Install the Storage Replica feature.

Answer Area

Step 1: Deploy the Azure Storage Sync service.

Step 2: Install and register the Azure File Sync agent.

Step 3: Create a sync group.

Step 4: Add a server endpoint.

### NEW QUESTION # 60

You have a server named Server1 that has Windows Admin Center installed. The certificate used by Windows Admin Center was obtained from a certification authority (CA).

The certificate expires.

You need to replace the certificate.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**ACTIONS****ANSWER AREA**

Copy the certificate thumbprint.

From Internet Information Services (IIS) Manager, bind a certificate.

Rerun Windows Admin Center Setup and select Change.

Rerun Windows Admin Center Setup and select Repair.

Rerun Windows Admin Center Setup and select Remove.

**Answer:**

Explanation:

**ANSWER AREA**

From Internet Information Services (IIS)....

Copy the certificate thumbprint.

Rerun Windows Admin Center Setup and select Change.

1 - From Internet Information Services (IIS)....

2 - Copy the certificate thumbprint.

3 - Rerun Windows Admin Center Setup and select Change.
