Latest C-TS414-2023 Test Testking, C-TS414-2023 Reliable Exam Guide

Now you can think of obtaining any SAP certification to enhance your professional career. ExamsTorrent's C-TS414-2023 study guides are your best ally to get a definite success in C-TS414-2023 exam. The guides contain excellent information, exam-oriented questions and answers format on all topics of the certification syllabus. If you just make sure learning of the content in the guide, there is no reason of losing the C-TS414-2023 Exam.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality

Management Sample Questions (Q76-Q81):

NEW QUESTION # 76

Which of the following must be assigned when you create an operation in an inspection plan?

- A. Activity type
- **B. Control key**
- C. Standard text key
- D. Work center

Answer: B

Explanation:

When creating an operation in an inspection plan (transaction QP01/QP02), certain fields are mandatory to define the operation's purpose and execution in SAP S/4HANA QM:

* Control Key (B): The control key is a mandatory field in the inspection plan operation. It determines the operation's behavior, such as whether inspection characteristics are required, whether it's a milestone, or if it triggers specific actions (e.g., QM01 for quality inspection). Defined in Customizing (SPRO > Quality Management > Quality Planning > Inspection Planning > Define Control Keys), it ensures the system knows how to process the operation. Without it, the operation cannot be saved.

* Activity Type (A): This is relevant for cost accounting (e.g., in Production Planning or QM orders) but is not mandatory in the inspection plan operation itself.

* Work Center (C): The work center (e.g., a test station) is optional in QM inspection plans unless specified by the control key. It's common but not universally required.

* Standard Text Key (D): This provides predefined descriptions for operations but is optional and not required to create an operation.

Thus, "Control key" is the correct answer, as it's the only mandatory assignment in standard SAP QM for inspection plan operations. References: SAP Help Portal - "Inspection Planning with Task Lists"; SAP S/4HANA QM User Guide - "Operations in Inspection Plans".

NEW QUESTION # 77

You want to complete a quality notification, but an error message appears during the status check. What could be the cause?

- A. Open activities
- B. Open causes
- C. Open defects
- **D. Open tasks**

Answer: D

Explanation:

Completing a quality notification (e.g., transaction QM02, status NOCO) requires all dependent objects to be closed:

* Open Tasks (B): Open tasks (e.g., "Investigate issue") prevent completion because they indicate unresolved actions. The system checks task status (e.g., TSOS) and blocks completion if any remain open (SPRO > QM > Quality Notifications > Define Status Profiles).

* Open Defects (A): Defects are recorded in lots or notifications but don't directly block completion unless tied to tasks.

* Open Activities (C): Activities are logged events, not blockers unless configured as tasks.

* Open Causes (D): Causes describe problems but don't prevent completion unless linked to open tasks.

Thus, "Open tasks" is the correct answer. References: SAP Help Portal - "Notification Completion in QM"; SAP S/4HANA QM User Guide - "Status Management".

NEW QUESTION # 78

Your customer wants to add the quality score of a material as criterion for the vendor evaluation. Where do you set the calculation procedure for the quality score?

- A. Quality info record in procurement
- B. Material master
- **C. Bud code**
- D. Vendor master

Answer: C

NEW QUESTION # 79

Which object must combined in test scheduling in the stability study Correct 3

- A. Physical samples
- B. Physical drawing procedure
- C. Strategy
- D. Initial sample
- E. Inspection plans

Answer: A,C,E

NEW QUESTION # 80

What master data can you integrate into a task list for a production order?

- A. Material specifications
- B. Control indicators
- C. Classifications
- D. Master inspection characteristics (MIC)

Answer: A,D

Explanation:

Task lists (e.g., routings) for production orders in SAP integrate QM master data to enable inspections:

* Material Specifications (A): Material specs (transaction QS61) can be referenced in routings (transaction CA01) to define inspection requirements for a material, integrating QM into production.

* Master Inspection Characteristics (C): MICs (transaction QS21) are directly assigned to operations in routings or inspection plans, specifying what to inspect during production.

* Classifications (B): Classifications (transaction CL01) are batch or material attributes, not directly integrated into task lists for production orders.

* Control Indicators (D): These are settings within characteristics or plans, not standalone master data for integration.

Thus, "Material specifications" and "Master inspection characteristics" are the correct answers (assuming a multiple-choice intent, though only two are clearly correct based on standard SAP).References: SAP Help Portal - "QM Integration with PP"; SAP S/4HANA QM User Guide - "Task Lists".

NEW QUESTION # 81

.....

Our C-TS414-2023 exam questions have been expanded capabilities through partnership with a network of reliable local companies in distribution, software and product referencing for a better development. That helping you pass the C-TS414-2023 exam with our C-TS414-2023 latest question successfully has been given priority to our agenda. The C-TS414-2023 Test Guide offer a variety of learning modes for users to choose from: PDF version, Soft version and APP version. We believe that our C-TS414-2023 exam questions can be excellent beyond your expectation.
