

100% Pass Quiz 2025 Fantastic VMware Latest 3V0-32.23 Exam Topics

P.S. Free & New 3V0-32.23 dumps are available on Google Drive shared by ITdumpsfree: <https://drive.google.com/open?id=1Cy-9sxjWk3hpgWzMcGp-9NJcANGFcX1L>

ITdumpsfree is professional platform to establish for compiling 3V0-32.23 exam materials for candidates, and we aim to help you to pass the 3V0-32.23 examination as well as getting the related certification in a more efficient and easier way. Owing to the superior quality and reasonable price of our 3V0-32.23 Exam Materials, our 3V0-32.23 exam torrents are not only superior in price than other makers in the international field, but also are distinctly superior in many respects. Our pass rate of 3V0-32.23 exam braindump is as high as 99% to 100%, which is unique in the market.

The Cloud Management and Automation Advanced Design certification exam covers a wide range of topics, including cloud infrastructure design, automation design, security, compliance, and governance. It also covers best practices for managing and operating a cloud-based environment, as well as techniques for designing resilient and scalable solutions. 3V0-32.23 Exam requires candidates to have a solid understanding of cloud technologies, including virtualization, networking, storage, and security.

Professional Latest 3V0-32.23 Exam Topics & Leader in Certification Exams Materials & Trustworthy 3V0-32.23 Valid Test Objectives

With the rapid development of computer, network, and semiconductor techniques, the market for people is becoming more and more hotly contested. Passing a 3V0-32.23 exam to get a certificate will help you to look for a better job and get a higher salary. If you are tired of finding a high quality study material, we suggest that you should try our 3V0-32.23 Exam Prep. Because our 3V0-32.23 exam materials not only has better quality than any other same learn products, but also can guarantee that you can pass the 3V0-32.23 exam with ease.

VMware Cloud Management and Automation Advanced Design Sample Questions (Q217-Q222):

NEW QUESTION # 217

What level of design will contain an automation platform, an operational monitoring platform, and a desktop platform?

- A. Physical Design
- **B. Conceptual Model**
- C. Detailed Design
- D. Logical Design

Answer: B

Explanation:

The conceptual model defines high-level components and capabilities (such as automation, monitoring, and desktop platforms) from a customer's perspective, without specifying product or implementation details.

NEW QUESTION # 218

Development team members would like to build new virtual machines using vRealize Orchestrator workflow. They would also like them to be added automatically to DNS prior to initial start. The domain administration team is responsible for DNS and requires review of any DNS entry requests prior the creation of new machines.

Which design will satisfy these requirements?

A. Design an Event Broker subscription for the machine using the CloneWorkflow.BuildComplete Provisioning State name.
Design a post-approval for the XaaS component that is assigned to the development team requiring authorization to process the XaaS workflow.

B. Design an Event Broker subscription for the machine using the CloneWorkflow.InitialPowerOn Provisioning State name.
Design a pre-approval for the Event Broker subscription that is assigned to the development team requiring authorization to process the XaaS workflow.

C. Design an XaaS workflow for adding the machines to DNS and add it to the development catalog.
Design a post-approval for the machine that is assigned to the domain administration team requiring authorization to build the machine.

D. Design an XaaS workflow for adding the machines to DNS and add it to the blueprint.
Design an pre-approval for the machine that is assigned to the domain administration team requiring authorization to build the machine.

- A. Option D
- B. Option B
- **C. Option A**
- D. Option C

Answer: C

NEW QUESTION # 219

An architect is planning an installation of VMware Aria Operations. Currently, the vSphere management cluster reports CPU contention which is not recommended for a VMware Aria Operations installation.

To mitigate any potential VMware Aria Operations performance issues, which two design decisions should be made? (Choose two.)

- A. 1:1 ratio between pCPU and vCPU
- B. Choose High Performance option for Power Management Policy
- C. Remove share reservations and limits on the VMware Aria Operations appliances
- D. Disable the balloon driver
- E. Set NUMA placement to manual

Answer: A,B

Explanation:

Maintaining a 1:1 ratio between physical CPUs and virtual CPUs helps avoid overcommitment and CPU contention for VMware Aria Operations appliances. Setting the Power Management Policy to High Performance ensures that CPU resources are always available at full speed, minimizing the risk of performance issues.

NEW QUESTION # 220

An architect is tasked with designing a solution for a database as a service (DBaaS) for SQL Server in a vRealize Automation (vRA) private cloud.

The following requirements have been identified:

- The SQL server user accounts and passwords should be obtained dynamically from third-party account and password management systems before the SQL server installation starts during pre-install script execution.
- The account and password management systems only provide integration using PowerShell.
- After the pre-install script execution, system reboot is required.
- Corporate security does NOT want passwords exposed during automation steps.

Which design solution meets these requirements?

- A. Develop a solution using a vRealize Orchestrator workflow with PowerShell and execute it at a POST MachineProvisioned Event Broker state.
- B. Develop a solution using vRealize Automation software components with component dependencies.
- C. Develop a solution using two vRealize Orchestrator workflows, execute obtain accounts/passwords workflow at a PRE BuildingMachine Event Broker state and install SQL server workflow at a POST MachineProvisioned Event Broker state.
- D. Develop a solution using Resource Actions and execute them as day two operations after virtual machines are provisioned.

Answer: B

NEW QUESTION # 221

Which three products can be deployed with VMware Aria Suite Lifecycle? (Choose three.)

- A. VMware Aria Operations for Networks
- B. VMware Aria Automation for Secure Clouds
- C. VMware Aria Operations
- D. VMware Aria Operations for Applications
- E. VMware Aria Operations for Logs
- F. VMware Aria Business Insights

Answer: C,D,E

Explanation:

VMware Aria Suite Lifecycle can deploy and manage VMware Aria Operations, VMware Aria Operations for Applications, and VMware Aria Operations for Logs as part of the integrated cloud management platform.

NEW QUESTION # 222

.....

It is common in modern society that many people who are more knowledgeable and capable than others finally lost some good opportunities for development because they didn't obtain the 3V0-32.23 certification. The prerequisite for obtaining the 3V0-32.23 Certification is to pass the exam, but not everyone has the ability to pass it at one time. But our 3V0-32.23 exam questions will help you pass the exam by just one go for we have the pass rate high as 98% to 100%.
