Quiz Appian Pass-Sure ACD201 - Appian Senior Developer Exam Dumps

GuideTorrent Appian ACD201 Training Kit is designed and ready by GuideTorrent IT experts. Its design is closely linked to today's rapidly changing IT market. GuideTorrent training to help you take advantage of the continuous development of technology to improve the ability to solve problems, and improve your job satisfaction. The coverage GuideTorrent Appian ACD201 Questions can reach 100%, as long as you use our questions and answers, we guarantee you pass the exam the first time!

Appian Senior Developer Sample Questions (Q70-Q75):

NEW QUESTION # 70

You need to create a new database schema using a connected data source system.

What should you do?

Note: To answer, move all steps from the Options list to the Answer List area and arrange them in the correct order.

Copy the credentials and connection URL.	
Create separate schemas for each application or suite of applications that you want to secure using the <code>AppianProcess.createNewSchema()</code> stored procedure.	
Create a MariaDB Data Source connected system for each schema using the credentials.	
Put users in the Database Editors group to allow them to make changes in the new database schema through phpMyAdmin. Put users in the Database Viewers group to give them read-only permissions in phpMyAdmin.	

Answer:

Explanation:

Copy the credentials and connection URL.	Copy the credentials and connection URL.
Create separate schemas for each application or suite of applications that you want to secure using the <code>AppianProcess.createNewSchema()</code> stored procedure.	Create separate schemas for each application or suite of applications that you want to secure using the <code>AppianProcess.createNewSchema()</code> stored procedure.
Create a MariaDB Data Source connected system for each schema using the credentials.	Create a MariaDB Data Source connected system for each schema using the credentials.

Put users in the Database Editors group to allow them to make changes in the new database schema through phpMyAdmin. Put users in the Database Viewers group to give them read-only permissions in phpMyAdmin.

NEW QUESTION # 71

You're developing a user input form for a government services application that includes a file upload component. If the uploaded file is a multimedia file (for example: .MP4, .MOV or .WAV), the customer wants these uploaded to Microsoft SharePoint instead.

What is the best way to achieve this requirement?

- A. Use the out-of-the-box Appian Connected System as it has a pre-built connected system to SharePoint to provide a guided experience for designers to send and receive data.
- B. Use the out-of-the-box Appian Connected System, but since it does not have any pre-built connected systems, you will need to use either a HTTP or OpenAPI Connected System to connect with SharePoint.
- C. Develop a connected system plug-in given SharePoint has an extensive API that cannot easily be resolved using the Appian out-of-the-box Connected System.

Answer: A

Explanation:

Appian provides an out-of-the-box pre-built connected system for SharePoint, allowing you to integrate file uploads to SharePoint with a guided experience for configuration-making this the best way to fulfill the requirement.

NEW QUESTION # 72

You need to connect to an external system using OAuth 2.0: SAML Bearer Assertion Flow authentication type, which requests access to an API on behalf of a signed in user.

This standard has the several steps involved with the SAML Bearer Assertion Flow.

Which two steps should you perform? (Choose two.)

- A. Enable the checkbox labeled OAuth 2.0: SAML Bearer Assertion Flow in the Admin Console.
- B. Create a Bearer Assertion process flow to authenticate the user.
- C. Add required users and groups to OAuth 2.0 SAML Bearer Assertion Users system group.
- D. Upload Client Certificate to Connected System.

Answer: C,D

Explanation:

Adding required users and groups to the OAuth 2.0 SAML Bearer Assertion Users system group ensures only authorized users can initiate the authentication flow.

Uploading a client certificate to the Connected System is needed for the assertion and secure communication required by the SAML Bearer Assertion Flow.

NEW QUESTION # 73

You're designing a process used to notify multiple users of marketing campaigns. These campaigns occur infrequently, but are sent out to the hundreds of customers that are stored in your app.

How should you best design your process model to send the emails whilst using a common email process model (CMN_SendEmail), to be most performant?

The outputs of this node are not required for the main process.

- A. Set "CMN-SendEmail" as a synchronous "Subprocess" node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.
- B. Set "CMN_SendEmail" as an asynchronous "Subprocess" node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.
- **C. Set "CMN_SendEmail" as a "Start Process" process node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.**

Answer: C

Explanation:

Using "Start Process" as the node type and enabling "Automatically run multiple instances of this node" for all users on the mailing list launches each email as a separate, lightweight process, maximizing performance and scalability, especially since the main process does not require the outputs.

NEW QUESTION # 74

You need to select a plug-in to meet a specific requirement and several plug-ins can do the job.

What are three key factors to consider? (Choose three.)

- **A. What are the compatible Appian versions?**
- B. Who is the creator of the plug-in?
- **C. What are the limitations of the plug-in?**
- D. Is the plug-in open source or proprietary?
- E. What is the size of the plug-in?
- **F. Is the plug-in approved for use in the Cloud?**

Answer: A,C,F

Explanation:

Limitations of the plug-in help you understand constraints or potential issues that could impact your implementation.

Compatible Appian versions ensure the plug-in will work correctly in your current and future environments.

Cloud approval status is essential for Appian Cloud environments, as only approved plug-ins are permitted for deployment.

NEW QUESTION # 75

.....

To make sure that our customers who are from all over the world can understand the content of the ACD201 exam questions, our professionals try their best to simplify the questions and answers and add some explanations to make them more vivid. So you will find that the unique set of our ACD201 Practice Guide is the easiest and containing the most rewarding content, you can never found on any other website. And you will love our ACD201 learning materials as long as you have a try on them!
