# Latest 156-315.81 Test Pdf, 156-315.81 Latest Exam Duration

When you first contacted us with 156-315.81 quiz torrent, you may be confused about our 156-315.81 exam question and would like to learn more about our products to confirm our claims. We have a trial version for you to experience. If you choose to purchase our 156-315.81 quiz torrent, you will have the right to get the update system and the update system is free of charge. We

do not charge any additional fees. Once our 156-315.81 Learning Materials are updated, we will automatically send you the latest information about our 156-315.81 exam question. We assure you that our company will provide customers with a sustainable update system.

# CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q474-Q479):

### **NEW QUESTION #474**

When SecureXL is enabled, all packets should be accelerated, except packets that match the following conditions:

- A. All IPv6 Traffic
- B. All UDP packets
- C. CIFS packets
- D. All packets that match a rule whose source or destination is the Outside Corporate Network

#### Answer: C

#### **NEW QUESTION #475**

Fill in the blank: The R81 SmartConsole, SmartEvent GUI client, and \_\_\_\_\_ consolidate billions of logs and shows then as prioritized security events.

- A. SmartView Web Application
- B. SmartTracker
- C. SmartMonitor
- D. SmartReporter

### Answer: A

### Explanation:

The R81 SmartConsole, SmartEvent GUI client, and SmartView Web Application consolidate billions of logs and show them as prioritized security events. The SmartView Web Application is a web-based interface that allows you to access the SmartEvent Server from any browser. You can use the SmartView Web Application to view and analyze security events, generate reports, and configure SmartEvent settings12.

References: 1: Check Point R81 SmartConsole User Guide - Check Point Software, page 10 2: Check Point R81 SmartEvent Administration Guide - Check Point Software, page 9

# **NEW QUESTION #476**

What CLI utility runs connectivity tests from a Security Gateway to an AD domain controller?

- A. test ad connectivity -d <domain>
- B. test connectivity ad -d <domain>
- C. test ldap connectivity -d <domain>
- D. ad connectivity test -d <domain>

# Answer: A

### Explanation:

The CLI utility that runs connectivity tests from a Security Gateway to an AD domain controller is test\_ad\_connectivity -d <domain>. This command tests the connectivity between the gateway and the domain controller using LDAP, Kerberos, and WMI protocols. It also verifies the identity awareness configuration and shows the relevant logs3. The other options are not valid commands for testing AD connectivity. Reference: 3: Check Point Software, Getting Started, Testing Active Directory Connectivity.

# **NEW QUESTION #477**

What are the correct steps upgrading a HA cluster (M1 is active, M2 is passive) using Multi-Version Cluster(MVC)Upgrade?

- A. 1) Upgrade the passive node M2 to R81.10
  - 2) Enable the MVC mechanism on the upgraded R81.10 Cluster Member M2 #cphaconf mvc on

- 3) In SmartConsole, change the version of the cluster object
- 4) Install the Access Control Policy
- 5) After examine the cluster states upgrade node M1 to R81.10
- 6) On each Cluster Member, disable the MVC mechanism and Install the Access Control Policy upgrade the passive node M2 to R81.10
- B. 1) Enable the MVC mechanism on both cluster members #cphaprob mvc on
  - 2) Upgrade the passive node M2 to R81.10
  - 3) In SmartConsole, change the version of the cluster object
  - 4) Install the Access Control Policy
  - 5) After examine the cluster states upgrade node M1 to R81.10
  - 6) On each Cluster Member, disable the MVC mechanism and Install the Access Control Policy
- C. 1) In SmartConsole, change the version of the cluster object
  - 2) Upgrade the passive node M2 to R81.10
  - 3) Enable the MVC mechanism on the upgraded R81.10 Cluster Member M2 #cphaconf mvc on
  - 4) Install the Access Control Policy and make sure that the installation will not stop if installation on one cluster member fails
  - 5) After examine the cluster states upgrade node M1 to R81.10
  - 6) On each Cluster Member, disable the MVC mechanism and Install the Access Control Policy SmartConsole, change the version of the cluster object
- D. 1) Enable the MVC mechanism on both cluster members #cphaprob mvc on
  - 2) Upgrade the passive node M2 to R81.10
  - 3) In SmartConsole, change the version of the cluster object
  - 4) Install the Access Control Policy and make sure that the installation will not stop if installation on one cluster member fails
  - 5) After examine the cluster states upgrade node M1 to R81.10
  - 6) On each Cluster Member, disable the MVC mechanism

#### Answer: C

#### Explanation:

Explanation

The correct steps upgrading a HA cluster (M1 is active, M2 is passive) using Multi-Version Cluster (MVC) Upgrade are: In SmartConsole, change the version of the cluster object to R81.10.

Upgrade the passive node M2 to R81.10 using CPUSE or CLI.

Enable the MVC mechanism on the upgraded R81.10 Cluster Member M2 using the command cphaconf mvc on.

Install the Access Control Policy and make sure that the installation will not stop if installation on one cluster member fails by selecting in the Policy Installation Settings dialog box.

After examining the cluster states using cphaprob stat and verifying that both members are synchronized, upgrade node M1 to R81.10 using CPUSE or CLI.

On each Cluster Member, disable the MVC mechanism using the command cphaconf mvc off and Install the Access Control Policy3

# **NEW QUESTION #478**

What are the correct sleps upgrading a HA cluster (Ml is active. M2 is passive) using Multi-Version Cluster (MVC) Upgrade?

- A. 1) In SmartConsole. change the version of the cluster object
  - 2) Upgrade the passive node M2 to R81.10
  - 3) Enable the MVC mechanism on the upgraded R81.10 Cluster Member M2 Wcphaconf mvc on
  - 4) Install the Access Control Policy and make sure that the installation will not stop if installation on one cluster member fails
  - 5) After examine the cluster states upgrade node M1 to R81.10
  - 6) On each Cluster Member, disable the MVC mechanism and Install the Access Control Policy SmartConsole. change the version of the cluster object
- B. 1) Enable the MVC mechanism on both cluster members wephaprob mvc on
  - 2) Upgrade the passive node M2 to R81.10
  - 3) In SmartConsole. change the version of the cluster object
  - 4) Install the Access Control Policy and make sure that the installation will not stop if installation on one cluster member fails
  - 5) After examine the cluster states upgrade node M1 to R81.10
  - 6) On each Cluster Member, disable the MVC mechanism
- C. 1) Upgrade the passive node M2 to R81.10
  - 2) Enable the MVC mechanism on the upgraded R81.10 Cluster Member M2 ttcphaconf mvc on
  - 3) In SmartConsole, change the version of the cluster object 4} Install the Access Control Policy

- 5) After examine the cluster states upgrade node M1 to R81.10
- 6) On each Cluster Member, disable the MVC mechanism and Install the Access Control Policy upgrade the passive node M2 to R81.10
- D. 1) Enable the MVC mechanism on both cluster members #cphaprob mvc on
  - 2) Upgrade the passive node M2 to R81.10
  - 3) In SmartConsole. change the version of the cluster object
  - 4) Install the Access Control Policy
  - 5) After examine the cluster states upgrade node M1 to R81.10
  - 6) On each Cluster Member, disable the MVC mechanism and Install the Access Control Policy

#### Answer: C

Explanation:

Explanation

The correct steps for upgrading a HA cluster using MVC are as follows:

Upgrade the passive node M2 to R81.10 using CPUSE or CLI.

Enable the MVC mechanism on the upgraded R81.10 Cluster Member M2 using the command cphaconf mvc on.

In SmartConsole, change the version of the cluster object to R81.10.

Install the Access Control Policy and make sure that the installation will not stop if installation on one cluster member fails.

After examining the cluster states, upgrade node M1 to R81.10 using CPUSE or CLI.

On each Cluster Member, disable the MVC mechanism using the command cphaconf mvc off and install the Access Control Policy. References: : Multi-Version Cluster (MVC) Upgrade

## **NEW QUESTION #479**

.....

Don't mind what others say, trust you and make a right choice. We hope that you understand our honesty and cares, so we provide free demo of 156-315.81 exam software for you to download before you purchase our dump so that you are rest assured of our dumps. After your payment of our dumps, we will provide more considerate after-sales service to you. Once the update of 156-315.81 Exam Dump releases, we will inform you the first time. You will share the free update service of 156-315.81 exam software for one year after you purchased it.
