Microsoft Dynamics 365 Supply Chain Management Functional Consultant Sample Questions (Q129-Q134):

NEW QUESTION # 129

A company uses Dynamics 365 Supply Chain Management in one legal entity that contains one site, which contains Warehouse1 and Warehouse2. A customer routinely orders an item that the company usually stocks in Warehouse1.

The customer requires the company to ship orders from Warehouse2 due to shipping cost agreements.

You need to configure the system to meet the request.

Which configuration should you set up?

- A. Set the item default order settings to Warehouse1 only.
- **B. Set the customer default to Warehouse2 and the item default order settings to Warehouse!**
- C. Set the customer default to Warehouse1 and set the item default order settings to Warehouse2.
- D. Set the customer default to Warehouse2 only.
- E. Set the customer default to Warehouse1 and set the item default order settings to Warehouse1

Answer: B

Explanation:

Explanation

Default order settings in Dynamics 365 Supply Chain Management define the site and warehouse where items will be sourced from or stored, the minimum, maximum, multiple and standard quantities that will be used for trading or inventory management, the lead times, the stop flag, and the order promising method. Default order settings are used when creating purchase orders, sales orders, transfer orders, inventory journals, and by master planning for generating planned orders. Default order settings can be item specific, site specific, product variant specific, or product dimension specific.
