100% Pass Quiz 2025 Network Appliance NS0-005: Newest NetApp Technology Solutions Professional Exam Braindumps Torrent

2025 Latest PrepAwayPDF NS0-005 PDF Dumps and NS0-005 Exam Engine Free Share: https://drive.google.com/open?id=11s--JsVqFonpv-DED3LtTa0RZeaDMjj8

The web-based Network Appliance NS0-005 practice test software can be used through browsers like Firefox, Safari, and Google Chrome. The customers don't need to download or install any excessive plugins or software in order to use the web-based Network Appliance NS0-005 Practice Exam format. The web-based NS0-005 practice test software format is supported by different operating systems like Mac, iOS, Linux, Windows, and Android.

With the aim of helping aspirants to achieve the NetApp Technology Solutions Professional Exam (NS0-005) certification, PrepAwayPDF is committed to providing the best quality and updated Network Appliance NS0-005 exam dumps. With their authentic and Real NS0-005 Exam Questions, you can be confident of passing the Network Appliance NS0-005 certification exam on the first try.

Don't waste time, buy the latest NS0-005 pdf questions and practice tests from PrepAwayPDF and get successful. You can free download the demo of any format of Network Appliance NS0-005 test questions before purchase. You can claim a refund if you don't pass the Network Appliance NS0-005 Certification Exam after using these actual Network Appliance NS0-005 exam dumps.

Network Appliance NetApp Technology Solutions Professional Exam Sample Questions (Q41-Q46):

NEW QUESTION #41

Which two NetApp products offer hardware encryption? (Choose two.)

- A. NetApp Aggregate Encryption (NAE)
- B. NetApp Storage Encryption (NSE)
- C. NetApp Volume Encryption (NVE)
- D. NVMe self-encrypting drives (SED)

Answer: B

Explanation:

NetApp Storage Encryption (NSE) and NVMe self-encrypting drives (SED) are two NetApp products that offer hardware

encryption. Hardware encryption is a method of encrypting data at the disk level using a hardware-accelerated mechanism. NSE requires all drives in an HA pair to be purpose-built, self-encrypting drives. These drives perform the data encryption themselves through a hardware-accelerated mechanism. Because of the hardware acceleration, NSE systems usually outperform NVE systems when encrypting data1. NVMe self-encrypting drives (SED) are a type of NSE drives that use the NVMe protocol to provide high performance and low latency. NVMe SEDs are supported on select NetApp AFF systems2.

References = Configure NetApp hardware-based encryption overview, Netapp Encrypts Data at Rest and in Transit, Which hardware platforms support software-based encryption (NVE and NAE ..., How does NVE and NAE encrypt data? - NetApp Knowledge Base

NEW QUESTION #42

When using NetApp ONTAP software, which role is predefined for cluster administrators?

- A. support
- B. recovery
- C. backup
- D. provision

Answer: A

Explanation:

B). support: The 'support' role is a predefined role in NetApp ONTAP designed for cluster administrators. This role typically has permissions that allow for various administrative tasks required for supporting and maintaining the health and performance of the ONTAP cluster. These tasks can include monitoring system health, managing configurations, troubleshooting, and other support-related activities.

NEW OUESTION #43

A company wants to reduce their on-premises footprint by tiering cold data to a more cost-effective location. Which IMetApp ONTAP feature can be used?

- A. SVM DR
- B. SnapVault
- C. FlexGroup
- D. FabricPool

Answer: D

Explanation:

FabricPool is a NetApp ONTAP feature that enables you to tier cold data from your on-premises storage to a more cost-effective location, such as the cloud or an on-premises object store. FabricPool automatically identifies and moves inactive data blocks from the performance tier, which consists of SSDs or HDDs, to the capacity tier, which consists of object storage. FabricPool preserves the data protection, security, and efficiency features of ONTAP, while reducing the storage footprint and costs of your on-premises system.

References = Data tiering overview, Managing data tiering for your clusters, Data Tiering and Cloud Tiering Solutions, Cloud Tiering for Intelligent Data Growth Management, Cozy with hot, tier with cold: A data growth simplicity story

NEW OUESTION #44

A customer wants to use FabricPool technology with NetApp StorageGRID. All objects must be erasure coded What is the minimum number of sites required to deploy the StorageGRID solution while providing site redundancy?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

FabricPool is an ONTAP feature that tiers inactive data to an object store such as StorageGRID. StorageGRID uses erasure coding

to protect data by slicing an object into data fragments and parity fragments, and spreading them across Storage Nodes. To use erasure coding, the storage pool must include three or more sites, or exactly one site. Two sites are not supported. Therefore, the minimum number of sites required to deploy the StorageGRID solution with FabricPool and erasure coding is three.

References = Configuring StorageGRID for FabricPool, What erasure-coding schemes are

NEW OUESTION #45

A construction department wants the ability to work on a set of planning files in headquarters and on several construction sites locally. The department needs global file locking for Windows file shares. Which NetApp product should be used to meet these requirements?

- A. BlueXP tiering
- B. BlueXP observability
- C. BlueXP edge caching
- D. Cloud Volumes Service

Answer: C

Explanation:

BlueXP edge caching is a NetApp product that enables real-time global file sharing for distributed workforces by using NetApp Global File Cache. Global File Cache creates a software fabric that caches active datasets in distributed offices to deliver guaranteed transparent data access and optimal performance on a global scale. Global File Cache supports global file locking for Windows file shares, which prevents multiple processes from modifying the same file at the same time and allows cooperating processes to synchronize access to shared files. BlueXP edge caching allows enterprises to consolidate their unstructured data into their choice of private or public cloud, such as Cloud Volumes ONTAP, Cloud Volumes Service, and Azure NetApp Files.

References = Global File Cache - File Sharing in the Cloud, Enable global file locking, Breaking locks

NEW QUESTION #46

....

Thanks to modern technology, learning online gives people access to a wider range of knowledge, and people have got used to convenience of electronic equipment. As you can see, we are selling our NS0-005 learning guide in the international market, thus there are three different versions of our NS0-005 exam materials which are prepared to cater the different demands of various people. It is worth mentioning that, the simulation test is available in our software version. With the simulation test, all of our customers will get accustomed to the NS0-005 Exam easily, and get rid of bad habits, which may influence your performance in the real NS0-005 exam. In addition, the mode of NS0-005 learning guide questions and answers is the most effective for you to remember the key points. During your practice process, the NS0-005 test questions would be absorbed, which is time-saving and high-efficient.
