The most important feature of the online version of our JN0-336 learning materials are practicality. The online version is open to all electronic devices, which will allow your device to have common browser functionality so that you can open our products. At the same time, our online version of the JN0-336 Learning Materials can also be implemented offline, which is a big advantage that many of the same educational products are not able to do on the market at present.

Nowadays a lot of people start to attach importance to the demo of the study materials, because many people do not know whether the JN0-336 guide dump they want to buy are useful for them or not, so providing the demo of the study materials for all people is very important for all customers. A lot of can have a good chance to learn more about the JN0-336 certification guide that they hope to buy. Luckily, we are going to tell you a good new that the demo of the JN0-336 Study Materials are easily available in our company. If you buy the study materials from our company, we are glad to offer you with the best demo of our study materials. You will have a deep understanding of the JN0-336 exam files from our company, and then you will find that the study materials from our company will very useful and suitable for you to prepare for you JN0-336 exam.

## Online JN0-336 Test, JN0-336 Test Passing Score

Our staff will provide you with services 24/7 online whenever you have problems on our JN0-336 exam questions. Starting from your first contact with our JN0-336 practice engine, no matter what difficulties you encounter, you can immediately get help. You

can contact us by email or find our online customer service. We will solve your problem as soon as possible. And no matter you have these problem before or after your purchase our JN0-336 Learning Materials, you can get our guidance right away.

## Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q90-Q95):

### NEW QUESTION # 90

Which two statements are correct about JSA data collection? (Choose two.)

- A. The Flow Collector can use statistical sampling
- B. The Event Collector parses logs
- C. The Event Collector collects information using BGP FlowSpec.
- D. The Flow Collector parses logs.

**Answer: A,B**

Explanation:

The Flow Collector can use statistical sampling to collect and store network flow data in the JSA database. The Event Collector collects information from various sources including syslog, SNMP, NetFlow, and BGP FlowSpec. Both the Flow Collector and the Event Collector parse logs to extract useful information from the logs.

### NEW QUESTION # 91

You have deployed an SRX300 Series device and determined that files have stopped being scanned. In this scenario, what is a reason for this problem?

- A. The infected host communicated with a command-and-control server, but it did not download malware.
- B. The software license is a free model and only scans executable type files.
- C. The file is too small to have a virus.
- D. You have exceeded the maximum files submission for your SRX platform size.

**Answer: D**

Explanation:

You have exceeded the maximum files submission for your SRX platform size: This statement is correct because file scanning on SRX300 Series device has a limit on the number of files that can be submitted per minute based on the platform size<sup>3</sup>. For example, SRX320 has a limit of 10 files per minute<sup>3</sup>.

### NEW QUESTION # 92

Which two statements are correct about the fab interface in a chassis cluster? (Choose two.)

- A. Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization.
- B. The fab interface enables configuration synchronization.
- C. Heartbeat signals sent on the fab interface monitor the health of the control plane link.
- D. In an active/active configuration, inter-chassis transit traffic is sent over the fab interface.

**Answer: A,D**

Explanation:

The fab interface is a fabric link that connects the two nodes in a chassis cluster. A chassis cluster is a high-availability feature that groups two identical SRX Series devices into a cluster that acts as a single device.

The fab interface has two functions:

Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization: RTOs are data structures that store information about active sessions, such as source and destination IP addresses, ports, protocols, and security policies. RTOs are exchanged between the nodes on the fab interface to ensure that both nodes have the same session information and can take over the traffic in case of a failover.

In an active/active configuration, inter-chassis transit traffic is sent over the fab interface: In an active/active configuration, both nodes in a cluster can process traffic for different redundancy groups (RGs). RGs are collections of interfaces or services that fail over together from one node to another. If traffic needs to transit from one RG to another RG that is active on a different node, it is sent over the fab interface.

Plane

### NEW QUESTION # 93

You want to manually failover the primary Routing Engine in an SRX Series high availability cluster pair. Which step is necessary to accomplish this task?

- A. Adjust the priority in the configuration on the secondary node.
- **B. Manually request the failover and identify the secondary node**
- C. Implement the control link recover/ solution before adjusting the priorities.
- D. Issue the set chassis cluster disable reboot command on the primary node.

**Answer: B**

Explanation:

This step involves issuing a command to manually initiate a failover from the primary Routing Engine to the secondary. This can typically be done using a command like `request chassis cluster failover redundancy-group <group-number> node <node-id>`, where <group-number> is the redundancy group you are failing over, and <node-id> specifies the node to which you want to failover (usually the secondary node). This command forces the designated node to take over as primary for the specified redundancy group.

### NEW QUESTION # 94

You want to permit access to an application but block application sub. Which two security policy features provide this capability? (Choose two.)

- A. content filtering
- B. URL filtering
- **C. micro application detection**
- **D. APPID**

**Answer: C,D**

Explanation:

Micro application detection is a feature that enables more granular control over applications by identifying and taking action on sub-features or specific behaviors within an application. For example, allowing access to Facebook while blocking Facebook Chat. Application Identification (APPID) is a feature that identifies and controls applications based on their traffic patterns and characteristics. APPID can be configured to recognize not only the main application but also its various subcomponents, allowing for precise control over what is allowed or blocked.

### NEW QUESTION # 95

.....

Nowadays JN0-336 certificates are more and more important for our job-hunters because they can prove that you are skillful to do the jobs in the certain areas and you boost excellent working abilities. Passing the test of JN0-336 certification can help you find a better job and get a higher salary. With this target, we will provide the best JN0-336 Exam Torrent to the client and help the client pass the JN0-336 exam easily if you buy our JN0-336 practice engine.

**Online JN0-336 Test:** <https://www.itpassleader.com/Juniper/JN0-336-dumps-pass-exam.html>

Our JN0-336 study materials are the representative masterpiece and leading in the quality, service and innovation, JN0-336 exam braindumps are written to the highest standards of technical accuracy provided by our certified trainers and IT experts, It reflects the usefulness of our JN0-336 training materials indirectly, In the time of technology and gadgets it's hard to keep the book for reading, so here's the deal get the JN0-336 dumps and read anywhere from your laptop, smartphone or tablet.

Deleting a Key or Setting, Start by creating a new WebObjects application using Project Builder, Our JN0-336 study materials are the representative masterpiece and leading in the quality, service and innovation.
