

100% Pass Quiz 2025 Perfect SAP C_TS470_2412 Latest Test Simulator

P.S. Free 2025 SAP C_TS470_2412 dumps are available on Google Drive shared by ActualCollection:
<https://drive.google.com/open?id=103fBQORNhbkkVetktLPxuCL5B16-5jUo>

Our C_TS470_2412 certification material is closely linked with the test and the popular trend among the industries and provides all the information about the C_TS470_2412 test. The answers and questions seize the vital points and are verified by the industry experts. Diversified functions can help you get an all-around preparation for the test. Our online customer service replies the clients' questions about our C_TS470_2412 Certification material at any time. So our C_TS470_2412 learning file can be called perfect in all aspects.

Our C_TS470_2412 study materials are written by experienced experts in the industry, so we can guarantee its quality and efficiency. The content of our C_TS470_2412 learning guide is consistent with the proposition law all the time. We can't say it's the best reference, but we're sure it won't disappoint you. This can be borne out by the large number of buyers on our website every day. A wise man can often make the most favorable choice, I believe you are one of them. If you are not at ease before buying our C_TS470_2412 Actual Exam, we have prepared a free trial for you. Just click on the mouse to have a look, giving you a chance to try. Perhaps this choice will have some impact on your life.

>> C_TS470_2412 Latest Test Simulator <<

Valid Test SAP C_TS470_2412 Braindumps | C_TS470_2412 Pdf Pass Leader

If you want to pass the exam smoothly buying our C_TS470_2412 useful test guide is your ideal choice. They can help you learn efficiently, save your time and energy and let you master the useful information. Our passing rate of C_TS470_2412 study tool is very high and you needn't worry that you have spent money and energy on them but you gain nothing. We provide the great service after you purchase our C_TS470_2412 cram training materials and you can contact our customer service at any time during one day. It is a pity if you don't buy our C_TS470_2412 study tool to prepare for the test C_TS470_2412 certification.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q40-Q45):

NEW QUESTION # 40

If two packages of a strategy plan are due on the same date, what determines which operations are assigned to a generated call object?

- A. The cycle length of each package
- B. The sequence number of the packages
- C. The buffers of the packages
- **D. The hierarchy of the packages**

Answer: D

Explanation:

In SAP S/4HANA Cloud Private Edition, Service, a strategy plan uses a maintenance strategy with multiple packages (e.g., 3 months, 6 months) to schedule tasks. When two packages are due on the same date, the system must decide which operations from the associated task list are included in the generated call object (e.g., a service order). The correct answer is the hierarchy of the packages (A). Let's dive into this deeply.

Understanding Strategy Plans and Packages:

A strategy plan is linked to a maintenance strategy (e.g., "STR1") that defines packages with different intervals (e.g., Package 1: 3 months, Package 2: 6 months). Each package is assigned to specific operations in a task list (e.g., Operation 0010: oil change, Package 1; Operation 0020: full inspection, Package 2). The hierarchy refers to the priority or precedence of packages when their due dates overlap, as defined in the strategy's configuration.

Why Hierarchy?

When two packages (e.g., 3 months and 6 months) align on a date (e.g., after 6 months, both are due), the system uses the package hierarchy to determine which operations are included in the call object. In SAP, the hierarchy is typically based on the package with the longest cycle taking precedence, as it represents a more significant maintenance event. For example:

* Task list: Operation 0010 (Package 1: 3M), Operation 0020 (Package 2: 6M).

* On 2025-06-01 (6 months), both packages are due.

* Hierarchy rule: Package 2 (6M) is higher, so Operation 0020 is included, and Operation 0010 might be skipped or combined based on settings.

Why Not the Others?

* Sequence number (B): Sequence numbers order operations within a task list, not packages in a strategy.

* Buffers (C): Buffers (e.g., tolerance) adjust call timing, not operation assignment.

* Cycle length (D): Cycle length defines when packages are due, but hierarchy decides assignment.

Configuration Insight:

In SPRO # Plant Maintenance # Maintenance Plans # Define Maintenance Strategies, the hierarchy is implicitly set by package order or explicit rules (e.g., "highest cycle wins"). This ensures logical operation selection.

Practical Example:

Strategy: Package 1 (3M), Package 2 (6M). Task list: Op 0010 (P1), Op 0020 (P2). On 2025-06-01, Package 2's higher hierarchy assigns Op 0020 to the call object.

"When multiple packages in a strategy plan are due simultaneously, the hierarchy of the packages determines which operations are assigned to the generated call object."

NEW QUESTION # 41

In the advanced execution scenario, what is the dynamic item processor profile used for? Note: There are 3 correct answers to this question.

- **A. To summarize dynamic items into a single debit memo item**
- **B. To bill a service as a list of subitems**
- C. To determine the service confirmation items
- D. To combine billing documents into one customer invoice

- E. To enable resource-related billing

Answer: A,B,E

Explanation:

In the Service with Advanced Execution scenario (scope item 63Q), the dynamic item processor (DIP) profile is used for resource-related billing:

- * To summarize dynamic items into a single debit memo item: The DIP profile can aggregate confirmed resources (e.g., time, materials) into a single billing item.
- * To bill a service as a list of subitems: Alternatively, it can itemize resources as separate subitems for detailed billing.
- * To enable resource-related billing: The DIP profile processes dynamic data from confirmations (e.g., time, parts) to generate billing documents.
- * To determine the service confirmation items: This is part of confirmation, not the DIP profile's role.
- * To combine billing documents into one customer invoice: This is a billing process step, not a DIP function. The DIP profile is configured in Customizing under Sales and Distribution # Billing. "The dynamic item processor profile supports summarizing items, listing subitems, and enabling resource-related billing in advanced execution." (SAP Help Portal, Resource-Related Billing).

NEW QUESTION # 42

In a service confirmation, what is the actual duration used for? Note: There are 3 correct answers to this question.

- A. Calculation of internal costs
- B. Calculation of the customer price
- C. Creation of a CATS entry
- D. Updating the technician's capacity
- E. Capturing the technician's working time

Answer: A,C,E

Explanation:

The actual duration in a service confirmation (e.g., IW41) records time spent on a task. The correct answers are A, C, D.

- * Capturing the technician's working time (A): Actual duration (e.g., 5 hours) logs the technician's effort.
- * Creation of a CATS entry (C): Transfers time to CATS for payroll/HR integration.
- * Calculation of internal costs (D): Multiplies duration by rate (e.g., \$50/hour) for cost posting.

Why Not the Others?

- * B: Capacity updates are planning-based, not from confirmations.
- * E: Customer price uses billing rates, not just duration.

"Actual duration in a service confirmation captures working time, creates CATS entries, and calculates internal costs."

NEW QUESTION # 43

Why would you maintain price agreements in a service contract?

- A. To select the price agreements in the service order
- B. To define the monthly contract price
- C. To define the yearly contract price
- D. To automatically adjust the service order prices

Answer: D

Explanation:

In SAP S/4HANA Cloud Private Edition, Service, price agreements in a service contract define specific pricing conditions (e.g., discounts, fixed rates) for services or spare parts. The primary purpose is to automatically adjust the service order prices (Option D). When a service order is created and linked to a service contract, the system applies the price agreements from the contract to the order's items, ensuring consistent and contract-specific pricing without manual intervention. This automation enhances efficiency and accuracy in billing.

- * A and B: Defining yearly or monthly prices might be part of the contract's billing plan, not the purpose of price agreements specifically.
- * C: Price agreements are not "selected" in the service order; they are automatically applied based on the contract.

"Price agreements in a service contract are maintained to automatically adjust prices in associated service orders, ensuring that contract-specific conditions are consistently applied."

NEW QUESTION # 44

What can you assign in a task list header? Note: There are 2 correct answers to this question.

- A. Planner group
- B. Maintenance strategy
- C. Components
- D. Production resources and tools

Answer: A,B

Explanation:

A task list in SAP S/4HANA Cloud Private Edition, Service defines standard maintenance or service procedures. The header contains general data applicable to the entire task list. The correct answers are planner group (B) and maintenance strategy (C). Let's explore this in detail.

Task List Header Overview:

The header (e.g., in transaction IA05/IA06) includes fields like task list type, group, and planning data, setting the context for all operations.

* Planner group (B): The planner group (e.g., "PLG1") is assigned in the header to indicate the team responsible for planning the task list's use (e.g., in maintenance plans). It's entered in the "Planner Group" field and links to organizational data (e.g., Plant Maintenance structure). For example, "PLG1" might be the North Region planners.

* Maintenance strategy (C): The maintenance strategy (e.g., "STR1") is assigned in the header for strategy-based task lists. It defines the packages (e.g., 3M, 6M) that operations will follow when the task list is used in a strategy plan. This is set in the "Strategy" field and ties the task list to scheduling logic.

Why Not the Others?

* Production resources and tools (A): PRTs (e.g., tools) are assigned to individual operations, not the header, in the operation details tab.

* Components (D): Components (e.g., spare parts) are also assigned at the operation level, not the header, via the components tab.

Practical Example:

Task list "TL001": Header assigns Planner Group "PLG1" and Strategy "STR1" (3M, 6M). Operations then specify tasks and resources.

Additional Insight:

The header data ensures consistency across all operations and integrates with maintenance plans for scheduling.

"In a task list header, you can assign a planner group and maintenance strategy to define planning and scheduling parameters."

NEW QUESTION # 45

.....

There may be a lot of people feel that the preparation process for exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our C_TS470_2412 study materials will radically change this. High question hit rate makes you no longer aimless when preparing for the exam, so you just should review according to the content of our C_TS470_2412 Study Materials prepared for you.

Valid Test C_TS470_2412 Braindumps: https://www.actualcollection.com/C_TS470_2412-exam-questions.html

We don't just want to make profitable deals, but also to help our users pass the C_TS470_2412 exams with the least amount of time to get a certificate, Want to pass your SAP C_TS470_2412 exam in the very first attempt, SAP C_TS470_2412 Latest Test Simulator And we enjoy their warm feedbacks to show and prove that we really did a good job in this career, The online test engine of the study materials can run on all windows system, which means you can begin your practice without downloading the C_TS470_2412 study materials as long as there have a computer.

Given that the frequency scaling wars are over, we see the shift to multicore. and C_TS470_2412 therein I think that Ada's tasking mechanisms are still very germane, Yes, the whole kit seems cheap but you need to realize that all of it is cheap.
