The AWS-Developer Certification is an excellent way for professionals to demonstrate their skills and knowledge in AWS development. AWS Certified Developer Associate Exam (DVA-C02) certification can help individuals advance their careers and increase their earning potential. Additionally, the certification is recognized by top IT companies worldwide, making it a valuable asset for job seekers in the industry.

Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q304-Q309):

NEW QUESTION # 304

A user wants to make so that whenever the CPU utilization of the AWS EC2 instance is above 90%, the redlight of his bedroom turns on. Which of the below mentioned AWS services is helpful for this purpose?

- A. AWS CloudWatch and a dedicated software turning on the light

- B. AWS CloudWatch + AWS SNS
- C. It is not possible to configure the light with the AWS infrastructure services
- D. AWS CloudWatch + AWS SES

Answer: B

NEW QUESTION # 305

A development team consists of 10 team members. Similar to a home directory for each team member the manager wants to grant access to user-specific folders in an Amazon S3 bucket. For the team member with the username "TeamMemberX", the snippet of the IAM policy looks like this:

```
{ "Sid": "AllowS3ActionToFolders", "Effect": "Allow", "Action":
["s3:*"], "Resource":
["arn:aws:s3:::companyname/home/TeamMemberX/*"] }
```

Instead of creating distinct policies for each team member, what approach can be used to make this policy snippet generic for all team members?

- A. Use IAM policy condition
- B. Use IAM policy resource
- C. Use IAM policy variables
- D. Use IAM policy principal

Answer: C

Explanation:

Explanation

> https://docs.aws.amazon.com/IAM/latest/UserGuide/reference_policies_variables.html > Use AWS Identity and Access Management (IAM) policy variables as placeholders when you don't know the exact value of a resource or condition key when you write the policy.

NEW QUESTION # 306

An organization has 10 departments. The organization wants to track the AWS usage of each department. Which of the below mentioned options meets the requirement?

- A. Create separate accounts for each department and track them separately
- B. Setup IAM users for each department and track their usage
- C. Create separate accounts for each department, but use consolidated billing for payment and tracking
- D. Setup IAM groups for each department and track their usage

Answer: C

Explanation:

The cost of an IAM user or groups can never be tracked separately for the purpose of billing. The best solution in this case is to create a separate account for each department and use consolidated billing.

NEW QUESTION # 307

A company has a REST application comprised of an Amazon API Gateway and several AWS Lambda functions. A developer is responding to an alert that the API Gateway's HTTP response error rate has unexpectedly increased. The developer must determine must which Lambda function is malfunctioning.

Which method would help the developer make this determination while minimizing delays?

- A. Download the API Gateway and Lambda execution logs from Amazon CloudWatch Events, and perform line-by-line search against them.
- B. Download the API Gateway and Lambda execution logs from Amazon S3, and perform a line-by-line search against them.
- C. Execute an Amazon CloudWatch Logs Insights query against the API Gateway and Lambda execution logs.
- D. Execute an Amazon Athena query against the API Gateway and Lambda execution logs.

Answer: A

NEW QUESTION # 308

A company has Windows Amazon EC2 instances in a VPC that are joined to on-premises Active Directory servers for domain services. The security team has enabled Amazon GuardDuty on the AWS account to alert on issues with the instances. During a weekly audit of network traffic, the Security Engineer notices that one of the EC2 instances is attempting to communicate with a known command-and-control server but failing. This alert does not show up in GuardDuty. Why did GuardDuty fail to alert to this behavior?

- A. GuardDuty does not report on command-and-control activity.
- B. GuardDuty does not see these DNS requests.
- C. GuardDuty only monitors active network traffic flow for command-and-control activity.
- D. GuardDuty did not have the appropriate alerts activated.

Answer: C
