With the growing demand for skilled Salesforce administrators, passing the ADX-211 Exam can significantly increase one's marketability and earning potential.

## **Salesforce Administer, Extend, and Automate Salesforce Sample Questions (Q183-Q188):**

### **NEW QUESTION # 183**

An administrator is given a .csv file of 5,000 leads with External Id and Status fields. They need to match existing and add new records with Data Loader.

What action should be taken to populate the Status field on the records and add new records?

- A. Insert
- B. Export
- **C. Upsert**
- D. Update

**Answer: C**

### **NEW QUESTION # 184**

The administrator at Universal Containers does a soft launch of the Salesforce Authenticator app and allows users to optionally use it to log in. The administrator would now like to look at how many users have successfully used it since it was rolled out.

What are two ways the administrator can get this information?

Choose 2 answers

- A. Open the Login Access Policies in Setup which shows how many users are using MFA.
- B. The order of flow execution is unpredictable
- **C. Run a session setting report, specifying login methods by user.**
- **D. Create a new view in Identity Verification History, specifying Method.**

**Answer: C,D**

Explanation:

Salesforce Authenticator is an app that allows users to verify their identity when logging in to Salesforce using two-factor authentication (2FA). 2FA adds an extra layer of security by requiring users to enter a verification code or approve a notification on their mobile device after entering their username and password.

To look at how many users have successfully used Salesforce Authenticator since it was rolled out, an administrator can use two ways:

A) Run a session setting report, specifying login methods by user.

A session setting report is a report that shows information about users' login sessions, such as login time, location, IP address, browser, platform, etc. A session setting report can also show the login methods used by users, such as password, verification code, or notification. By running a session setting report, specifying login methods by user, an administrator can see how many users have used Salesforce Authenticator to log in to Salesforce. Reference: [https://help.salesforce.com/s/articleView?id=sf.reports\\_session.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.reports_session.htm&type=5)

C) Create a new view in Identity Verification History, specifying Method.

Identity Verification History is a page that shows the history of identity verification attempts for each user in the org. Identity verification history includes information such as date, time, status, method, and IP address of each attempt. By creating a new view in Identity Verification History, specifying Method as a filter criterion, an administrator can see how many users have used Salesforce Authenticator to verify their identity when logging in to Salesforce. Reference: [https://help.salesforce.com/s/articleView?id=sf.identity\\_verification\\_history.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.identity_verification_history.htm&type=5)

### NEW QUESTION # 185

A user accidentally created a duplicate opportunity and is unable to delete the duplicate record.

What should an administrator do to troubleshoot this issue?

- A. Run a report of all opportunities to identify other possible duplicates.
- **B. Check the user profile permissions on the Opportunity object to see if they have permission to delete.**
- C. Change the user's profile to System Administrator so they have full permissions to delete object records.
- D. Advise the user to mark the duplicate opportunity Closed Lost and keep it in the system.

#### Answer: B

Explanation:

The user profile permissions on the Opportunity object is the item that the administrator should review to find out why the user is unable to delete the duplicate record. The user profile permissions determine what users can do with records and objects in Salesforce, such as creating, editing, deleting, viewing, or sharing. In this case, the administrator should check if the user has the Delete permission on the Opportunity object, which allows them to delete opportunity records that they own or have access to. If not, the administrator can either grant them this permission or delete the record for them. Reference:

[https://help.salesforce.com/s/articleView?id=sf.admin\\_general\\_permissions.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_general_permissions.htm&type=5) [https://help.salesforce.com/s/articleView?id=sf.admin\\_object\\_permissions.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_object_permissions.htm&type=5)

### NEW QUESTION # 186

Universal Containers has a Private sharing model for Accounts and Opportunities. A new team is being created from within the sales team that will be assigned all renewal opportunities. These users will need to see all closed won opportunities while keeping the account private.

How should the administrator meet this requirement?

- **A. Create a public group for the renewals team and create a criteria based sharing rule on Opportunities.**
- B. Create a permission set with View All enabled on Accounts and assign it to the new users.
- C. Update the organization-wide default on Opportunities to Public Read Only and add them to the opportunities team.
- D. Create a new profile for the renewals team with View All permission enabled on Accounts and Opportunities.

#### Answer: A

Explanation:

A public group is a grouping of users, roles, roles and subordinates, or other groups that can be used to share access to records or folders. A sharing rule is a rule that grants additional access to records based on certain criteria or ownership. In this case, the administrator should create a public group for the renewals team and create a criteria based sharing rule on opportunities that grants read-only access to the group for all closed won opportunities. This way, the renewals team can see all the opportunities that are eligible for renewal while keeping the account private. Reference: [https://help.salesforce.com/s/articleView?id=sf.admin\\_sharing.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.admin_sharing.htm&type=5) [https://help.salesforce.com/s/articleView?id=sf.sharing\\_rules.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.sharing_rules.htm&type=5)

### NEW QUESTION # 187

The administrator at Cloud Kicks is evaluating the capabilities of Schema Builder to create custom objects and custom fields. The administrator likes the user interface of the Schema Builder, as opposed to the new object and field wizards, but also notices some limitations.

What needs to be configured from the object manager instead of Schema Builder?

- A. Enable field history tracking
- B. Allow Reports and Activities
- C. Make available for Customer Portal.
- **D. Add custom fields to the page layout.**

**Answer: D**
