

# 100% Pass Quiz 2025 SAP C\_IBP\_2502 Latest Test Preparation

## (Tips-2025)! Pass SAP C\_OCM\_2503 Exam Certification Questions

IT Certification Questions  
Apr 9

P.S. Free & New C\_IBP\_2502 dumps are available on Google Drive shared by ActualTestsQuiz: <https://drive.google.com/open?id=1r8T7Dhcb2TiAPCAvj6MIEkOcGtwsXqZf>

If you have interests with our C\_IBP\_2502 practice materials, we prefer to tell that we have contacted with many former buyers of our C\_IBP\_2502 exam questions and they all talked about the importance of effective C\_IBP\_2502 practice material playing a crucial role in your preparation process. Our C\_IBP\_2502 practice materials keep exam candidates motivated and efficient with useful content based wholly on the real C\_IBP\_2502 guide materials. There are totally three versions of C\_IBP\_2502 practice materials which are the most suitable versions for you: pdf, software and app versions.

### SAP C\_IBP\_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Key Figures &amp; Attributes: This section of the exam measures the skills of supply chain analysts and focuses on the key figures and attributes used in planning. It covers how to define and configure key figures to ensure accurate data representation and decision-making. Candidates are also tested on their ability to manage attributes that support various planning scenarios.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Analytics and Reporting: This section evaluates the expertise of reporting specialists in generating and interpreting reports within SAP. It covers key analytical tools and reporting functions that provide insights into planning performance. Candidates will be assessed on their ability to extract, analyze, and present data effectively to support business decisions.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Model Supply Processes: This section assesses the expertise of supply chain planners in designing and managing supply processes. It includes setting up sourcing, inventory management, and supply constraints. Candidates will be evaluated on their ability to model supply networks and optimize resource allocation.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Model Sales &amp; Operations Processes: This section targets operations managers and evaluates knowledge of sales and operations planning. It covers the alignment of supply and demand, scenario planning, and decision-making processes to optimize operational efficiency. Candidates will be assessed on their ability to configure models that support strategic business goals.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Planning Operators &amp; Application: JobsThis section is designed for demand planners and focuses on the configuration and execution of planning operators and application jobs. It includes an understanding of how these tools automate planning processes and improve system performance. Candidates will be tested on their ability to configure and execute jobs that support various planning functions.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>General Configuration of a Planning Area: This section is aimed at SAP solution consultants and covers the configuration of a planning area. It includes defining key planning parameters, setting up structures, and ensuring the system is configured to meet business needs. Candidates will be tested on their ability to customize planning areas for optimal performance.</li></ul>

Topic 7	<ul style="list-style-type: none"> <li>• <b>Demand Planning:</b> This section measures the skills of demand planners and focuses on the core concepts of demand planning. It includes understanding forecasting techniques, demand sensing, and demand propagation. Candidates are tested on their ability to manage demand signals and align planning with business objectives.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• <b>Solution Architecture &amp; Data Integration:</b> This exam section is aimed at solution architects who work with SAP data integration. It covers the fundamental concepts of integrating external data sources with SAP, ensuring seamless data flow between systems. Candidates need to understand how to maintain system architecture for optimized performance and reliability.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• <b>User Interface:</b> This section assesses the knowledge of business users in navigating and utilizing the SAP interface effectively. It covers how to interact with different features, customize views, and leverage UI functionalities for efficient planning and reporting. Candidates are expected to demonstrate proficiency in accessing and interpreting data within the system.</li> </ul>

### >> Test C\_IBP\_2502 Preparation <<

## Test C\_IBP\_2502 Score Report & Reliable Exam C\_IBP\_2502 Pass4sure

If you are applying for the C\_IBP\_2502 certification exam, it is great to show your dedication to it. You cannot take it for granted because the SAP Certified Associate - SAP IBP for Supply Chain (C\_IBP\_2502) certification test is tough and you have to pay a good sum for appearing in it. You will lose money and time by studying with C\_IBP\_2502 Exam Preparation material that is not updated. So, to avoid your loss and failure in the C\_IBP\_2502 exam, you must prepare with actual SAP C\_IBP\_2502 questions from ActualTestsQuiz.

## SAP Certified Associate - SAP IBP for Supply Chain Sample Questions (Q49-Q54):

### NEW QUESTION # 49

Which Supply Planning processes are part of the tactical planning level within a planning hierarchy? Note: There are 2 correct answers to this question.

- **A. Balancing Supply and Demand**
- B. Order Prioritization
- **C. Inventory Build and Reduction**
- D. Stock Replenishment

**Answer: A,C**

Explanation:

In SAP IBP, the planning hierarchy includes strategic (long-term), tactical (medium-term), and operational (short-term) levels. Tactical planning (e.g., monthly horizon) focuses on mid-term supply chain decisions.

\* Option A: Order Prioritization This is incorrect. Order prioritization is an operational-level process, typically in SAP IBP for Response and Supply, dealing with short-term order allocation, not tactical planning.

\* Option B: Stock Replenishment This is incorrect. Stock replenishment is operational, focusing on short-term actions (e.g., daily/weekly restocking), not tactical mid-term planning.

\* Option C: Inventory Build and Reduction This is correct. Tactical planning involves decisions like building inventory ahead of demand peaks or reducing excess stock over months, aligning with SAP IBP's Inventory Optimization and S&OP processes at this level.

\* Option D: Balancing Supply and Demand This is correct. Balancing supply and demand over a medium-term horizon (e.g., via S&OP or supply heuristics) is a core tactical process in SAP IBP, ensuring resource alignment, per official planning hierarchy definitions.

Thus, C and D are tactical supply planning processes, per SAP IBP's planning framework.

### NEW QUESTION # 50

You want to display and edit data in different Units of Measure (UOM). Which of the following must you consider before you use

the UOM? Note: There are 3 correct answers to this question.

- A. Analytics allow the user to select the target unit of measure
- B. Units of measure are usually not time-dependent
- C. Units of measure are usually not time-independent
- D. Conversion to the target unit of measure is handled by the SAP IBP Excel add-in
- E. Units of measure are an attribute of a master data type, such as Product

**Answer: A,B,E**

Explanation:

Units of Measure (UOM) in SAP IBP allow data to be displayed and edited in different units (e.g., kg, lbs), configured via master data and UI settings, per SAP IBP's documentation.

\* Option A: Analytics allow the user to select the target unit of measure This is correct. Analytics apps (e.g., Advanced Dashboards) and Excel planning views let users choose the target UOM for display, leveraging conversion factors, per SAP IBP's visualization capabilities.

\* Option B: Units of measure are usually not time-independent This is incorrect. UOMs are typically static (time-independent) unless explicitly modeled as time-dependent (rare), making this a misstatement.

\* Option C: Units of measure are an attribute of a master data type, such as Product This is correct.

UOM (e.g., Base UOM) is an attribute of the Product master data type, with conversion factors defined in UOM Conversion master data, per SAP IBP's setup.

\* Option D: Units of measure are usually not time-dependent This is correct. UOMs are generally static attributes, not varying by time unless custom-configured, aligning with SAP IBP's standard behavior.

\* Option E: Conversion to the target unit of measure is handled by the SAP IBP Excel add-in This is incorrect. While the Excel add-in displays converted values, the conversion logic is defined in the planning area (via UOM Conversion factors), not handled solely by the add-in.

Thus, A, C, and D are key considerations, per SAP IBP's official UOM handling.

#### NEW QUESTION # 51

What option is available for the key figure that is enabled for fixing?

- A. Fixing is possible for key figures with negative values
- B. Fixing is possible for a certain period, including all child values in the hierarchy
- C. You can change a fixed key figure only with administrative rights
- D. Fixing is possible for a part of a key figure value on a certain planning level

**Answer: B**

Explanation:

Key figure fixing in SAP IBP allows planners to lock values (e.g., in Excel) to prevent changes during planning runs, a feature in time-series planning.

\* Option A: Fixing is possible for key figures with negative values This is incorrect. Fixing applies to any value (positive, negative, zero), but this isn't a specific option or limitation in SAP IBP's fixing functionality.

\* Option B: Fixing is possible for a part of a key figure value on a certain planning level This is incorrect. Fixing locks the entire value at a planning level, not a portion of it. Partial adjustments require separate key figures or manual edits before fixing.

\* Option C: You can change a fixed key figure only with administrative rights This is incorrect. Fixed key figures can be unfixed or edited by users with appropriate planning permissions, not just administrators, via the Excel UI.

\* Option D: Fixing is possible for a certain period, including all child values in the hierarchy This is correct. In SAP IBP, fixing a key figure (e.g., Demand Plan Qty) for a period locks that value and propagates the fix to all child levels in the hierarchy (e.g., disaggregated Product-Customer combinations), ensuring consistency, as per SAP IBP's fixing documentation.

Thus, D is the correct option for key figure fixing, reflecting SAP IBP's hierarchical locking mechanism.

#### NEW QUESTION # 52

What is taken as an input for the demand sensing process? Note: There are 2 correct answers to this question.

- A. Forecast Accuracy measures
- B. Open Sales Orders
- C. Consensus Demand
- D. Results of time series analysis

**Answer: B,C**

Explanation:

Demand Sensing in SAP IBP refines short-term forecasts using real-time data, per SAP IBP's demand sensing documentation.

\* Option A: Results of time series analysis This is incorrect. Time series analysis (statistical forecast) is an input to demand planning, not sensing, which adjusts based on current signals.

\* Option B: Forecast Accuracy measures This is incorrect. Accuracy measures evaluate forecasts, not serve as direct inputs to sensing.

\* Option C: Open Sales Orders This is correct. Open sales orders provide real-time demand signals, a key input to demand sensing, per SAP IBP's documentation.

\* Option D: Consensus Demand This is correct. The Consensus Demand Plan (from S&OP) is a baseline input, adjusted by sensing with short-term data, per SAP IBP's process.

Thus, C and D are inputs, per SAP IBP's official demand sensing scope.

### NEW QUESTION # 53

You configured a stored key figure with an editability setting of "not editable." How can users modify the values of that key figure?

Note: There are 2 correct answers to this question.

- A. Using the key figure calculations in the Web UI
- B. Managing the master data via the Web UI
- C. Using planning object maintenance with key figure data in Excel UI
- D. Importing the key figure data files using the Web UI

**Answer: C,D**

Explanation:

In SAP IBP, a stored key figure with "not editable" status means users cannot manually edit it in planning views (e.g., Excel).

However, values can still be updated via system processes, as per SAP IBP's data management rules.

\* Option A: Importing the key figure data files using the Web UI This is correct. Users can import data files (e.g., CSV) via the Data Integration app in the Web UI, overwriting "not editable" key figure values, a standard method, per SAP IBP's import documentation.

\* Option B: Using the key figure calculations in the Web UI This is incorrect. The Web UI (e.g., Planner Workspaces) doesn't support direct key figure calculations; calculations are configured in the Planning Areas app or executed via jobs, not user-driven in the UI.

\* Option C: Using planning object maintenance with key figure data in Excel UI This is correct. The Excel add-in's "Manage Planning Objects" feature allows users to update key figure values for specific combinations, bypassing the "not editable" restriction, per SAP IBP's Excel capabilities.

\* Option D: Managing the master data via the Web UI This is incorrect. Master data management (e.g., via Manage Master Data app) updates attributes, not stored key figure values directly.

Thus, A and C are valid methods to modify "not editable" key figures, per SAP IBP's official functionality.

### NEW QUESTION # 54

.....

To let the clients be familiar with the atmosphere and pace of the real C\_IBP\_2502 exam we provide the function of stimulating the exam. In such a way, our candidates will become more confident by practising on it. And our expert team updates the C\_IBP\_2502 Study Guide frequently to let the clients practice more. So the quality of our C\_IBP\_2502 practice materials is very high and we can guarantee to you that you will have few difficulties to pass the exam.
