The normal model test and understandable answer analysis will make you secretly master the exam skills to pass E_S4CPE_2405 exam. In order to reduce more stress for you, we promise you if you fail the exam, what you need to do is to send your scanned unqualified transcripts to our email box. After confirmation, we will immediately refund all the money that you purchased the E_S4CPE_2405 Exam Materials. ExamPrepAway is worthy your trust.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q49-Q54):

NEW QUESTION # 49

When do you use the SAP Fiori app "Launchpad App Manager?" Note: There are 2 correct answers to this question.

- A. To create custom catalogs
- B. To view where launchpad content is used
- C. To manage business catalogs with references to SAP Fiori app tiles in technical catalogs
- D. To maintain technical catalogs

Answer: A,B

NEW QUESTION # 50

Which of the following are required for a new implementation of SAP S/4HANA Cloud Private Edition? Note: There are 2 correct answers to this question.

- A. Access to the Software Update Manager tool
- B. Detailed Digital Discovery Assessment with SAP Best Practices
- C. Nomination of a lead conversion expert for content activation
- D. Nomination of a lead configuration expert for content activation

Answer: B,D

NEW QUESTION # 51

How do you move extensions between SAP S/4HANA Cloud Private Edition systems? Note: There are 2 correct answers to this question.

- A. Assign items to a software package
- B. Import the collection
- C. Mark items relevant for transport
- D. Assign items to a software collection

Answer: B,D

Explanation:

Moving extensions between SAP S/4HANA Cloud Private Edition systems (e.g., from development to quality or production) involves a managed transport process, especially under the Clean Core principle and RISE with SAP. For Private Edition, extensions can include in-app customizations or side-by-side developments. Let's evaluate the options:

* A. Import the collection: This is correct. In SAP S/4HANA Cloud Private Edition, extensions (e.g., custom fields, logic) are transported using software collections. Once a collection is exported from the source system, it is imported into the target system (e.g., via the "Export Customizing Transports" and

"Import Collection" apps in Fiori). This is a standard process for moving in-app extensions.

* B. Mark items relevant for transport: This is incorrect. While marking items for transport is a concept in traditional ABAP systems (e.g., ECC), it's not the primary mechanism for SAP S/4HANA Cloud Private Edition. The cloud model uses collections rather than individual transport flags for in-app extensions.

* C. Assign items to a software collection: This is also correct. In the extensibility process, key users or administrators assign extension items (e.g., custom fields, business objects) to a software collection using tools like the "Manage Software Collections" Fiori app. This collection is then exported and imported, enabling the movement of extensions between systems.

* D. Assign items to a software package: This is incorrect. Software packages are used in traditional ABAP development (e.g., via Eclipse) for side-by-side extensions, not for in-app key-user extensions in SAP S/4HANA Cloud Private Edition. The cloud transport process relies on collections, not packages.

In summary, Import the collection and Assign items to a software collection are the steps to move extensions between SAP S/4HANA Cloud Private Edition systems.

NEW QUESTION # 52

Which of the following are required for a new implementation of SAP S/4HANA Cloud Private Edition?

Note: There are 2 correct answers to this question.

- A. Access to the Software Update Manager tool
- **B. Detailed Digital Discovery Assessment with SAP Best Practices**
- C. Nomination of a lead conversion expert for content activation
- **D. Nomination of a lead configuration expert for content activation**

Answer: B,D

Explanation:

For a new implementation of SAP S/4HANA Cloud Private Edition, the following are required:

Option A: Detailed Digital Discovery Assessment with SAP Best Practices This option is correct. Conducting a comprehensive Digital Discovery Assessment helps in understanding the customer's business processes and aligning them with SAP Best Practices. This assessment is crucial for defining the project scope and ensuring a successful implementation.

Option B: Nomination of a lead configuration expert for content activation This option is correct. Appointing a lead configuration expert is essential for overseeing the activation of content and ensuring that the system is configured according to the project's requirements. This role is pivotal in managing the configuration activities during the implementation.

Option C: Nomination of a lead conversion expert for content activation This option is incorrect. While a lead conversion expert is important for data migration activities, content activation primarily falls under the purview of the configuration expert.

Option D: Access to the Software Update Manager tool

This option is incorrect. The Software Update Manager tool is typically used for system upgrades and updates, not specifically required for a new implementation.

In summary, a Detailed Digital Discovery Assessment with SAP Best Practices and the nomination of a lead configuration expert for content activation are critical prerequisites for a new implementation of SAP S

/4HANA Cloud Private Edition. These steps ensure that the project is aligned with best practices and that the system configuration is managed effectively.

NEW QUESTION # 53

You have assigned a business role to an end user who has been granted access to only one app. The app does NOT show up on the user's launchpad and you are not available to support.

What can the user do?

- A. Create a page and assign it to the launchpad space.
- B. Assign a different business role that provides access.
- **C. Use the search function to find the app.**
- D. Assign a launchpad space to the business role.

Answer: C

Explanation:

When an end user is assigned a business role granting access to only one app, but the app does not appear on their SAP Fiori launchpad, the user can utilize the search function to locate and access the app.

Option A: Assign a different business role that provides access.

This option is not feasible for the end user, as assigning business roles typically requires administrative privileges.

Option B: Create a page and assign it to the launchpad space.

This option is not applicable, as creating pages and assigning them to launchpad spaces are tasks performed by administrators, not end users.

Option C: Use the search function to find the app.

This option is correct. The SAP Fiori launchpad includes a search function that allows users to find and access apps directly, even if the apps are not visible on their launchpad.

Option D: Assign a launchpad space to the business role.

This option is not within the end user's capabilities, as assigning launchpad spaces to business roles requires administrative access.

In summary, if an app does not appear on the user's launchpad, the user can use the search function to find and access the app directly.

NEW QUESTION # 54

.....

ExamPrepAway's products can not only help you successfully pass SAP certification E_S4CPE_2405 Exams, but also provide you a year of free online update service, which will deliver the latest product to customers at the first time to let them have a full preparation for the exam.
