Splunk Phantom Certified Admin Sample Questions (Q23-Q28):

NEW QUESTION # 23
Which of the following are examples of things commonly done with the Phantom REST APP

- A. Use Django queries; use curl to create a container and add artifacts to it; add action blocks.
- B. Use Django queries; use curl to create a container and add artifacts to it; remove temporary lists.
- C. Use SQL queries; use curl to create a container and add artifacts to it; remove temporary lists.
- D. Use Django queries; use Docker to create a container and add artifacts to it; remove temporary lists.

Answer: B

Explanation:

Explanation

The correct answer is A because using Django queries, using curl to create a container and add artifacts to it, and removing temporary lists are examples of things commonly done with the Phantom REST APP. The Phantom REST APP is a built-in app that allows you to interact with the Phantom server using REST API calls. You can use the run query action to execute Django queries on the Phantom database and return the results as JSON. You can use the curl command to send HTTP requests to the Phantom server and perform various operations, such as creating containers, adding artifacts, running playbooks, etc. You can use the remove list action to delete temporary lists that are no longer needed. See Splunk SOAR Documentation for more details.

NEW QUESTION # 24

What are indicators?

- A. Action result items that determine the flow of execution in a playbook.
- B. Artifact values with special security significance.
- C. Artifact values that can appear in multiple containers.
- D. Action results that may appear in multiple containers.

Answer: C

NEW QUESTION # 25

Configuring Phantom search to use an external Splunk server provides which of the following benefits?

- A. The ability to automate Splunk searches within Phantom.
- B. The ability to run more complex reports on Phantom activities.
- C. The ability to ingest Splunk notable events into Phantom.
- D. The ability to display results as Splunk dashboards within Phantom.

Answer: A

NEW QUESTION # 26

Which is the primary system requirement that should be increased with heavy usage of the file vault?

- A. Amount of memory.
- B. Bandwidth of network.
- C. Number of processors.
- D. Amount of storage.

Answer: D

Explanation:
Explanation
The primary system requirement that should be increased with heavy usage of the file vault is the amount of storage. The file vault is a secure repository for storing files on Phantom. The more files are stored, the more storage space is needed. The other options are not directly related to the file vault usage. See [File vault] for more information.

NEW QUESTION # 27

How can a playbook run searches on a Splunk search head?

- A. Using the run_query action from the Splunk app.
- B. Using the phantom.run_query() API function.
- C. Using the search action of the Search app.
- D. Use the HTTP app's get_data action to access the SOAR .../rest/splunk/query endpoint.

Answer: A

NEW QUESTION # 28

......

If you are still troubled for the Splunk SPLK-2003 Certification Exam, then select the Pass4cram's training materials please.
