## Exam CIPS L3M6 Duration, L3M6 Relevant Answers

RealExamFree offers web-based L3M6 practice exams and desktop Socially Responsible Warehousing and Distribution (L3M6) practice test software so that our customers can give unlimited CIPS L3M6 practice tests and make themselves perfect by tracking their mistakes. The progress of previously given Socially Responsible Warehousing and Distribution (L3M6) practice tests are saved in the history so that the customers can assess it and avoid mistakes in future exams and pass Socially Responsible Warehousing and Distribution (L3M6) certification exam easily.

## CIPS L3M6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Understand the Concepts of Sustainability and Corporate Social Responsibility (CSR): This section of the exam measures the knowledge of Procurement Specialists and covers the foundational concepts of sustainability and CSR. It explains how sustainability involves meeting present needs without compromising future generations' ability to do the same. The focus extends beyond traditional economic criteria, incorporating environmental and social impacts into procurement decisions. CSR emphasizes extending corporate goals to include social responsibility, promoting good citizenship, and encouraging positive impacts on stakeholders, including social, economic, and cultural diversity.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Understand the Environmental Impact of Warehousing and Distribution:</b> This section targets Logistics Coordinators and examines how warehousing and distribution contribute to environmental challenges. Topics include air pollution, carbon footprint, noise pollution, accidents, land use, and visual intrusion. It also discusses the environmental costs associated with logistics activities such as greenhouse gas emissions and global warming and strategies to mitigate these impacts. The role of government policies in sustainable logistics is emphasized, including reducing freight intensity, improving utilization rates, promoting greener transport modes, enhancing energy efficiency, and cutting emissions.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Understand Methods for the Storage and Movement of Inventory:</b> This section assesses the expertise of Warehouse Managers in inventory storage and movement methods. It includes principles of warehouse design, focusing on location, layout factors such as flow and space utilization, and flexibility. It also explains various types of warehousing equipment like material handling systems, palletization techniques, packaging standards, and automation technologies that align with environmental standards.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Understand the Environmental Impact of Procurement and Supply:</b> This section evaluates the skills of Supply Chain Analysts in understanding how procurement affects the environment. It explores global challenges such as balancing globalization with green logistics, public awareness, external pressures, and international regulations. The environmental impact of transportation and storage is covered, including air pollution, carbon footprint calculations, noise pollution, accidents, and land use. Additionally, it highlights the government's role in promoting sustainability through policies like greener transport modes, energy efficiency, and emission reduction.</li> </ul>

## CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q103-Q108):

### NEW QUESTION # 103

Buildings that reduce or eliminate the negative impacts they have on the environment, and can even create positive impacts, which can be achieved in the design, construction, or operation phase, are known as what?

- A. Blue Buildings
- B. Red Buildings
- C. Yellow Buildings
- **D. Green Buildings**

**Answer: D**

Explanation:

Green Buildings are designed, constructed, and operated to minimize or eliminate negative environmental impacts (e.g., energy waste, emissions) and potentially generate positive outcomes (e.g., carbon sequestration, biodiversity support). The CIPS L3M6 module defines them as structures incorporating sustainable features like energy-efficient systems, renewable energy, and eco-friendly materials across all phases—design (e.g., orientation for sunlight), construction (e.g., low-impact methods), and operation (e.g., smart energy management). Examples include LEED-certified buildings, which align with LO2's focus on reducing construction's ecological footprint.

### NEW QUESTION # 104

When designing the layout of a warehouse, which of the following factors should you be considering with size and space required, and how it will be allocated among departments?

- A. Warehouse structure
- B. Operational selection
- **C. Size and dimensions**
- D. Equipment selection
- E. Layout details

**Answer: C**

Explanation:

Size and dimensions determine the warehouse's capacity and space allocation across departments. The CIPS L3M6 syllabus identifies this as a key layout factor for optimizing storage and workflow, making it the correct answer.

---

#### NEW QUESTION # 105

\_\_\_\_\_ costs of environmental damage caused by logistics include the impact on organizations' profit.

- A. Ecological
- B. Social
- C. **Economic**

**Answer: C**

Explanation:

Economic costs (C) relate to financial impacts on organizations, such as reduced profits due to environmental damage (e.g., fines, cleanup costs), as per the CIPS L3M6 syllabus. Social costs (A) affect public health and communities, while ecological costs (B) concern ecosystems. Monitoring economic costs is key to CSR, ensuring sustainability doesn't erode profitability.

---

#### NEW QUESTION # 106

Excessive use of natural resources would not indicate a lack of or disregard for CSR and wouldn't damage the organization's reputation.

- A. TRUE
- B. **FALSE**

**Answer: B**

Explanation:

Excessive use of natural resources directly contradicts CSR principles, particularly those related to environmental sustainability (e.g., UN Global Compact Principles 7-9). It indicates a disregard for long-term ecological balance and can severely damage an organization's reputation, as stakeholders increasingly demand environmentally responsible practices. The CIPS L3M6 module emphasizes that resource overuse is a key indicator of poor CSR performance.

#### NEW QUESTION # 107

The \_\_\_\_\_ runs the global disclosure system that enables organizations, cities, states, and regions to measure and manage their environmental impacts.

- A. **Carbon Disclosure Project**
- B. Company Disclosure Programme
- C. Company Disclosure Project
- D. Carbon Disclosure Programme

**Answer: A**

Explanation:

The Carbon Disclosure Project (CDP) is the organization that operates a global disclosure system, allowing entities to report and manage their environmental impacts, particularly in areas like carbon emissions, water usage, and deforestation. The CIPS L3M6 module identifies the CDP as a critical tool for transparency and accountability in sustainability efforts, widely used by businesses and public sector organizations.
