Valuable AD0-E117 Feedback & AD0-E117 Best Study Material

As we all know, looking at things on a computer for a long time can make your eyes wear out and even lead to the decline of vision. We are always thinking about the purpose for our customers. To help customers solve problems, we support printing of our AD0-E117 exam torrent. We will provide you with three different versions. The PDF version allows you to download our AD0-E117 quiz prep. After you download the PDF version of our learning material, you can print it out. In this way, even if you do not have a computer, you can learn our AD0-E117 Quiz prep. We believe that it will be more convenient for you to take notes. Our website is a very safe and regular platform. You can download our AD0-E117 exam guide with assurance. You can take full advantage of the fragmented time to learn, and eventually pass the authorization of AD0-E117 exam.

Adobe AD0-E117 Certification Exam is designed to help professionals demonstrate their mastery of Adobe Experience Manager (AEM) architecture. AEM is a powerful content management system used by businesses to create, manage, and publish digital content across multiple channels. Adobe Experience Manager Architect Master certification exam is intended for professionals who are responsible for architecting AEM solutions and who have a deep understanding of AEM architecture and functionality.

Adobe Experience Manager Architect Master Sample Questions (Q69-Q74):

NEW QUESTION # 69

A client is modernizing some of their AEM sites to go from static to editable templates so they can use the latest features around has the following parameters:

- * The client currently has a dozen static templates that they want to move to editable templates.
- * The existing pages use the parsys paragraph system for storing components.
- * Each page based on one of the static templates has its own custom properties tab that is unique for that template type.
- * The client wants template authors to be able to create the editable templates.

Which approach should an Architect use to meet these requirements?

- A. 1. Use a new page component for editable templates based on the core components page component
2. Migrate page properties to respective components dialogues
- B. 1. Use a new page component for editable templates based on the core components page component
2. Convert page properties to policies
- C. 1. Use the same page components for editable templates
2. Use a new template type for each static template
- D. 1. Use the same page components for editable templates
2. Create a new editable template based on each of the existing page components

Answer: D

NEW QUESTION # 70

A financial sector client is using AEM 6.5 on premise. The creative team needs to create the content for the various marketing campaigns that are scheduled. The client wants to use Experience Fragments (XF) to accelerate content creation for marketing purposes.

Which Data flow diagram should an Architect use to communicate requirements to the client network team?

A)

B)

C)

D)

- A. Option D
- **B. Option B**
- C. Option A
- D. Option C

Answer: B

Explanation:

A data flow diagram (DFD) is a graphical representation of the flow of data through a system. It shows how data is input, processed, stored, and output in a system. A DFD can be used to communicate requirements to the client network team by showing them how data flows between different components and entities in the system.

NEW QUESTION # 71

Refer to the exhibit.

A customer has SSO on its AEM Author environment using Adobe IMS, which is integrated with the customer's IDP using SAML. The customer plans to roll out a new secured website on AEM where SSO authentication is required for end users. The end user accounts are also managed in the customer's existing IDP.

How should the Architect set up the authentication for the website?

- A. Integrate AEM Publisher using SAML with Adobe IMS
- B. Integrate AEM Publisher using OAuth with Adobe IMS
- **C. Integrate AEM Publisher using SAML directly with the IDP**
- D. Set up CUG and use User Synchronisation from Author to Publisher

Answer: C

Explanation:

SAML is a common and standard SSO handler that allows a user to access multiple systems after providing authentication credentials once. AEM ships with a SAML 2.0 Authentication Handler that supports signing and encryption of messages, automatic creation of users, and synching groups to existing ones in AEM3. By integrating AEM Publisher using SAML directly with the IDP, the Architect can leverage the existing user accounts and authentication mechanism for the end users of the secured website.

NEW QUESTION # 72

An AEMaaS customer processes thousands of assets on a daily basis. A major business requirement is to push assets being published to various legacy external systems based on tagged asset metadata. Which solution would an architect choose?

- A. Use an external application server to offload AEM load and run batch processing using Assets HTTP API
- B. Use headless application on App Builder to extend asset export using Event and Runtime
- **C. Use custom workflow process to push assets conditionally via activation workflow for near real time transfer**
- D. Use a daily scheduler to distribute assets conditionally on top-up basis during least traffic hours

Answer: C

NEW QUESTION # 73

An AEM Sites implementation is migrating from on-premise to AEM as a Cloud Service. Previously, the application was deployed in a single package for both code and access policy nodes. After initial deployment and testing in the new infrastructure, it is reported that user permissions are not working as expected.

What change should the Architect make to address this issue?

- A. Update package metadata to use MergePreserve for handling access policy nodes
- **B. Refactor access policy nodes to Apache Sling JCR Repoint scripts in the same package**
- C. Document permissions and request the Customer Success Engineer to configure
- D. Move access policy nodes to a dedicated package and install manually

Answer: B

Explanation:

Refactor access policy nodes to Apache Sling JCR Repoint scripts in the same package¹. According to Adobe Experience Manager documentation²³, access policy nodes are used to control who can access a policy-protected document. However, they are not supported by AEM as a Cloud Service and need to be refactored using Apache Sling JCR Repoint scripts.

NEW QUESTION # 74

.....

In order to provide you with the best Adobe certification exam dumps forever, PrepPDF constantly improve the quality of AD0-E117 exam dumps and update the dumps on the basis of the latest test syllabus at any time. PrepPDF is your best choice on the market today and is recognized by all candidates for a long time. If you don't believe what I say, you can know the information by asking around.
