

100% Pass Quiz 2025 Updated C_ACDET_2506: SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Reliable Test Forum

2025 Latest SureTorrent C_ACDET_2506 PDF Dumps and C_ACDET_2506 Exam Engine Free Share:
<https://drive.google.com/open?id=1NAKZUyA02QshxJpYL9KIQnb8Plmgt3Cz>

Our C_ACDET_2506 test braindumps are carefully developed by experts in various fields, and the quality is trustworthy. What's more, after you purchase our products, we will update our C_ACDET_2506 exam questions according to the new changes and then send them to you in time to ensure the comprehensiveness of learning materials. We also have data to prove that 99% of those who use our C_ACDET_2506 Latest Exam torrent to prepare for the exam can successfully pass the exam and get SAP certification. So if you are preparing to take the test, you can rely on our learning materials. You will also be the next beneficiary. After you get SAP certification, you can get boosted and high salary to enjoy a good life.

Are you preparing to take the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Exam Questions? Look no further! SureTorrent is your go-to resource for comprehensive SAP C_ACDET_2506 exam questions to help you pass the exam. With SureTorrent, you can access a wide range of features designed to provide you with the right resources and guidance for acing the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) Exam. Rest assured that SureTorrent is committed to ensuring your success in the C_ACDET_2506 exam. Explore the various features offered by SureTorrent that will guarantee your success in the exam.

New C_ACDET_2506 Exam Vce - C_ACDET_2506 Examcollection Free Dumps

Undoubtedly, passing the SAP C_ACDET_2506 Certification Exam is one big achievement. Regardless of how tough the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) exam is, it serves an important purpose of improving your skills and knowledge of a specific field. Once you become certified by SAP, a whole new career scope will open up to you.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 2	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q12-Q17):

NEW QUESTION # 12

The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations. What should be used to hold the valid storage locations?

- A. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.
- B. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.
- **C. You should create a new Flex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location.**
- D. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.

Answer: C

Explanation:

For managing searchable lists of storage locations with associated attributes like addresses, the best SAP Ariba practice is to use a Flex Master Data (FMD) Template. This allows you to model the storage locations and related information dynamically. After creating the FMD template and loading the data (e.g., from CSV imports), you can create a custom field referencing the FMD type. This approach enables users to search, filter, and select valid locations efficiently, while also allowing the underlying data to be maintained separately and updated independently of the configuration.

Using text fields with validation or enumerations is insufficient for large or dynamic datasets and doesn't scale well. Date fields are unrelated to this scenario.

FMD provides a scalable and flexible solution for complex master data requirements like storage locations.

NEW QUESTION # 13

The full SAP Ariba Strategic Sourcing suite baseline (Greenfield baseline scenario) has been applied to the customer Test site. The customer and project team will configure SAP Ariba Sourcing and deploy that to the Production site, then configure and deploy the remaining solutions in stages. What does this mean for subsequent migration activities?

- **A. Subsequent migration activities follow Bluefield deployment scenario.**
- B. Subsequent migration activities will require a complete reconfiguration of existing solutions.
- C. Both SAP Ariba Sourcing as well as subsequent migration activities would be Brownfield deployments.
- D. If the baseline applied the full suite, the full suite must be configured and migrated to production at the same time.

Answer: A

Explanation:

In SAP Ariba deployments, when a full Greenfield baseline has been applied initially—meaning a fresh, full suite setup on the Test site—and the customer deploys a single solution (like Sourcing) to Production first, all subsequent deployments follow a Bluefield scenario. This means that later stages of deployment (e.g., Contracts, Supplier Risk) involve selective migration and incremental configuration changes to Production without rebuilding everything from scratch. Bluefield scenarios specifically accommodate environments where

Production may already be live with transactions, requiring careful selective migration to avoid disruption. This contrasts with Brownfield, which typically involves upgrading or reusing existing deployments without full baseline resets. Also, Greenfield deployments do not require all suite components to migrate simultaneously; phased deployments are supported. This approach ensures minimal risk during deployment and provides flexibility to roll out additional modules progressively. Extract summary:SAP Ariba documentation highlights Bluefield for phased, incremental deployments post Greenfield baseline application to accommodate live production environments.

NEW QUESTION # 14

While working on a customer project, the customer asks if specific details can be captured and made available in reporting for a sourcing project or contract that doesn't fit the standard fields.

What is the recommended way to handle this scenario?

- A. Suggest the customer put a word document on the template and capture all information in that document.
- B. Configure as many custom fields as possible for data capture purposes.
- C. Create a Microsoft Form from the Actions menu for managing all the requirements.
- D. Create a dynamic form (dform) where common data can be synced with the project header through customization.

Answer: D

NEW QUESTION # 15

Which document must be returned to SAP before a Deployment Lead can be assigned to the project?

- A. Solution Design Matrix
- B. Enablement Workbook
- C. Delivery Engagement Readiness Checklist
- D. Deployment Overview

Answer: C

Explanation:

The Delivery Engagement Readiness Checklist is a critical gatekeeper document that confirms all prerequisites and readiness criteria have been met before SAP assigns a Deployment Lead to a project. This checklist ensures project scope, resourcing, access, and other foundational elements are in place to proceed.

Other documents like Deployment Overview and Enablement Workbook are informative or internal project management tools but do not formally trigger Deployment Lead assignment. The Solution Design Matrix is a design artifact and not a staffing gating document.

This process supports structured project governance and resource allocation within SAP.

NEW QUESTION # 16

Which of the following can be used to define relation types and establish a custom relationship? Note: There are 2 correct answers to this question.

- A. A custom Enumeration such as Contracts_Contract Type
- B. A custom Flex Master Data Template such as vrealm 1936find_58984.Hospital
- C. A custom Form Template such as vrealm 1936.formDoc_18697.Lessons Learned
- D. A standard class such as ariba.basic.core.CommodityCode

Answer: B,C

NEW QUESTION # 17

.....

If you choose our C_ACDET_2506 exam question for related learning and training, the system will automatically record your actions and analyze your learning effects. simulation tests of our C_ACDET_2506 learning materials have the functions of timing and mocking exams, which will allow you to adapt to the exam environment in advance and it will be of great benefit for subsequent exams. After you complete the learning task, the system of our C_ACDET_2506 Test Prep will generate statistical reports based on

your performance so that you can identify your weaknesses and conduct targeted training and develop your own learning plan. For the complex part of our C_ACDET_2506 exam question, you may be too cumbersome, but our system has explained and analyzed this according to the actual situation to eliminate your doubts and make you learn better.
