Which configuration can be changed through Enterprise Manager?

- A. Manages user login
- B. Start and Stop BI Services
- C. Minimum Number of Rows to Download to Excel
- D. The default BI Server Repository

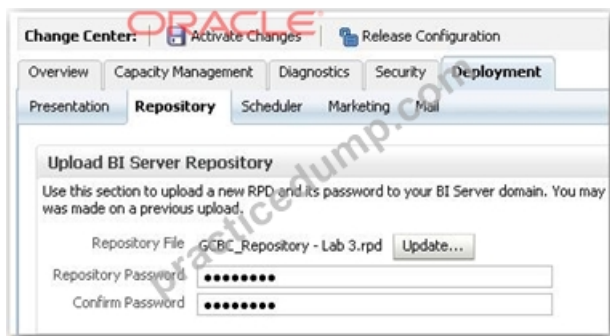

Answer: D

Explanation:

Explanation/Reference:

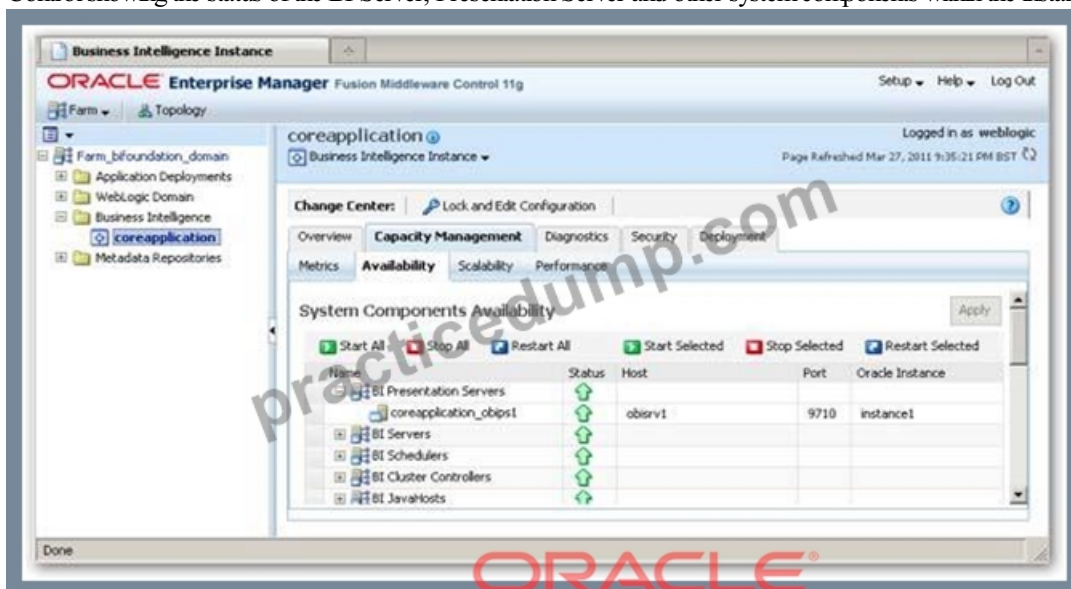

The Repository can be configured within the Enterprise Manager. See Note 1 below.

Note 1: Once you've locked the Oracle BI Domain, you would then use the same screen back in Enterprise Manager to browse and select the RPD file, and then enter the password, twice.

Once you've entered these details you would then press the Apply button, to save the changes. At this point, the RPD gets a sequence number after it, and it's displayed as the current default online repository for the Oracle BI Domain.

Note 2: An OBIEE 11g system (or "Oracle BI Domain") is generally managed through a combination of Oracle Enterprise Manager Fusion Middleware Control, part of the Enterprise Manager "family", or through WebLogic Server Scripting Tool (WLST) scripts. Each Fusion Middleware Control instance as shipped with OBIEE 11g controls a single Oracle BI Domain (DEV, or PROD for example), and is installed along with WebLogic Server Admin Console in the WebLogic Admin Server, one of the two JVMs (the other being the managed server) that gets installed by default with OBIEE 11g. The screenshot below shows Fusion Middleware Control showing the status of the BI Server, Presentation Server and other system components within the installation.
