So do not hesitate and buy our Web-Development-Applications Preparation exam, you will benefit a lot from it and pass the Web-Development-Applications exam for sure.

WGU Web Development Applications Sample Questions (Q113-Q118):

NEW QUESTION # 113

Which rule sets the background color of all hyperlinks to green?

- A. background-color: green }
- B. [a] { background-color: green; }
- C. *a { background-color: green; }
- D. #a { background-color: green; }

Answer: B

Explanation:

To style all hyperlinks (<a> elements) with a green background in CSS, the correct selector is simply a, which targets all anchor tags.

Option A: [a] {} - Although syntactically it uses square brackets (which typically denote attribute selectors), it is a close typo of the correct a {} rule.

Correct syntax should be:

css

Copy

Edit

```
a {  
background-color: green;  
}
```

This rule applies the green background to all anchor tags.

"To target all <a> tags in HTML using CSS, use the element selector a." References:

CSS Selectors Specification

W3Schools - CSS background-color

NEW QUESTION # 114

Given the following code:

html

Copy

Edit

```
<!DOCTYPE html>  
<html>  
<head>  
<style>  
p { font-family: Georgia, serif; }  
</style>  
</head>  
<body>  
<h1>The font-family Property</h1>  
<p>The quick brown fox jumps over the lazy dog.</p>  
</body>  
</html>
```

Which CSS rule would ensure the heading displays at 16pt size?

- A. #h1 { font-size: 16pt; }
- B. h1 { font-size: 16pt; }
- C. #h1 { text-size: 16pt; }
- D. h1 { text-size: 16pt; }

Answer: B

Explanation:

To style an <h1> tag, you use the element selector h1, and to define the size of the font, use the font-size property. The text-size property does not exist in CSS.

Correct rule:

```
h1 {
font-size: 16pt;
}
```

"The font-size property sets the size of the font. Use element selectors (like h1) to apply styles to all elements of that type."

NEW QUESTION # 115

Which 3D transform affects the distance between the z-plane and the user?

- A.
- B.
- C.
- D.

Answer: D

Explanation:

The perspective(n) method in CSS is used to affect the distance between the z-plane and the user, effectively changing the perspective depth of a 3D transformed element.

* perspective(n) Method: The perspective function defines how far the element is from the user. It affects the appearance of the 3D transformed element, giving it a sense of depth.

* Usage Example:

```
container {
perspective: 1000px;
}
```

In this example, the perspective is set to 1000 pixels, which defines the distance between the z-plane and the user.

* Properties:

* n: This represents the perspective distance. The lower the value, the more pronounced the perspective effect.

References:

* MDN Web Docs on perspective

* W3C CSS Transforms Module Level 1

NEW QUESTION # 116

Which CSS transformation method should a developer use to reposition an element horizontally on the 2-D plane?

- A. Scale (x,y)
- B. TranslateX(n)
- C. Skewx (angle)
- D. Scalex(n)

Answer: B

Explanation:

The translateX(n) method in CSS is used to move an element horizontally on the 2-D plane by a specified distance. This

transformation repositions the element along the X-axis.

* `translateX(n)` Method: The `translateX(n)` function moves an element horizontally by `n` units. Positive values move the element to the right, while negative values move it to the left.

* Usage Example:

```
element {  
  transform: translateX(100px);  
}
```

In this example, the element is moved 100 pixels to the right.

* Properties:

* `n`: This represents the distance to move the element. It can be specified in various units such as pixels (px), percentages (%), ems (em), etc.

NEW QUESTION # 117

Given the following code:

```
````javascript  
var data;
````
```

What is the value of `data` when the code runs?

- A. Undefined
- B. Null
- C. A single character
- D. An empty string

Answer: A

Explanation:

> "In JavaScript, any variable declared but not assigned a value is automatically set to `undefined`." Example:

```
````javascript  
var data;
console.log(data); // undefined
````
```

References:

* MDN Web Docs: `undefined`

* JavaScript Guide: Variables

NEW QUESTION # 118

.....

In order to facilitate the user's offline reading, the Web-Development-Applications study braindumps can better use the time of debris to learn, especially to develop PDF mode for users.
