

100% Pass Quiz 2026 Accurate Oracle 1Z0-182: Oracle Database 23ai Administration Associate Official Cert Guide

2025 Latest CertkingdomPDF 1Z0-182 PDF Dumps and 1Z0-182 Exam Engine Free Share: <https://drive.google.com/open?id=1v6ucY2CWdl521QzXrJ3qF7b82Y9SEJwQ>

1Z0-182 study dumps have a pass rate of 98% to 100% because of the high test hit rate. So our exam materials are not only effective but also useful. If our candidates have other things, time is also very valuable. It is very difficult to take time out to review the 1Z0-182 Exam. But if you use 1Z0-182 exam materials, you will learn very little time and have a high pass rate. Our 1Z0-182 study materials are worthy of your trust.

Oracle 1Z0-182 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Describe Managing Database Instances: This section tests the knowledge of Database Administrators in performing essential tasks for managing database instances. It includes starting and shutting down databases, utilizing dynamic performance views, managing initialization parameter files, and using the Automatic Diagnostic Repository (ADR) for troubleshooting.
Topic 2	<ul style="list-style-type: none">Moving Data: This section evaluates the expertise of Data Migration Specialists in moving data within Oracle databases. It includes using external tables, executing Oracle Data Pump operations, and distinguishing SQL*Loader commands for importing data efficiently.
Topic 3	<ul style="list-style-type: none">Managing Users, Roles, and Privileges: This domain evaluates the expertise of Security Administrators in implementing user security measures. It focuses on creating and managing users, roles, and privileges to ensure secure access to Oracle databases.
Topic 4	<ul style="list-style-type: none">Managing Undo: This domain measures the skills of Database Administrators in using undo data effectively. It compares undo data with redo data and explains temporary undo usage for efficient transaction management.

Topic 5	<ul style="list-style-type: none"> Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.
Topic 6	<ul style="list-style-type: none"> Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.
Topic 7	<ul style="list-style-type: none"> Configuring Oracle Net Services: This section measures the skills of Network Administrators and Database Administrators in configuring Oracle Net Services. It includes identifying administration components, describing connection methods, and ensuring seamless communication between clients and databases.
Topic 8	<ul style="list-style-type: none"> Introduction to Performance: This section evaluates the expertise of Performance Analysts in summarizing Oracle database performance management techniques. It includes measuring database performance using SQL execution plans, directives, and advisors to ensure optimal system efficiency.
Topic 9	<ul style="list-style-type: none"> Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization.
Topic 10	<ul style="list-style-type: none"> Describe Oracle Database Architecture: This section of the exam measures the skills of Database Administrators and System Architects in understanding the Oracle database architecture. It covers the configurations of Oracle database instances, memory structures like SGA and PGA, and process structures such as background processes. It also explains the logical and physical database structures, including datafiles, control files, and redo log files.
Topic 11	<ul style="list-style-type: none"> Introduction to Auditing: This domain tests the abilities of Compliance Specialists in implementing database auditing practices. It includes creating, modifying, and maintaining auditing policies while applying value-based auditing techniques like Fine-Grained Auditing (FGA).

New 1Z0-182 Test Testking, 1Z0-182 Valid Test Syllabus

In order to let customers understand our Oracle Database 23ai Administration Associate exam dumps better, our company will provide customers with a trail version. All customers have the opportunity to download our trail version. More importantly, the trail version is free for customers. The trail version will offer demo to customers, it means customers can study the demo of our 1Z0-182 exam torrent for free. If you use our 1Z0-182 test quiz, we believe you will know fully well that our product is of superior quality, other products can't be compared with it. If you are hesitating to buy our 1Z0-182 Test Quiz, if you are anxious about whether our product is suitable for you or not, we think you can download the trail version. We believe our Oracle Database 23ai Administration Associate exam dumps will help you make progress and improve yourself.

Oracle Database 23ai Administration Associate Sample Questions (Q68-Q73):

NEW QUESTION # 68

Which three statements are true about using SQL*Plus?

- A. It has both command-line and graphical user interfaces (GUI).
- B. It must be downloaded from the Oracle Technology Network (OTN).
- C. It has its own commands that are separate from any SQL statements.
- D. It can run Recovery Manager (RMAN) commands.
- E. It can run scripts passed to it by a shell script.
- F. It can run scripts entered at the SQL prompt.

Answer: C,E,F

Explanation:

- A .True. sqlplus @script.sql works from shell scripts.
- B .False. RMAN uses its own client, not SQL*Plus.
- C .False. Bundled with Oracle DB software.
- D .False. Command-line only; no GUI in 23ai.
- E .True. @script runs scripts interactively.
- F .True. Commands like SHOW PARAMETER are unique.

NEW QUESTION # 69

Your database instance is started with an SPFILE. A PFILE is also available. You execute this command: ALTER SYSTEM SET DB_CACHE_SIZE=100K; Where does the value change?

- A. Only in the SPFILE
- B. In the SPFILE, PFILE, and memory
- C. Only in memory
- D. In the SPFILE and PFILE
- E. In the SPFILE and memory

Answer: E

Explanation:

B .True. Without SCOPE, ALTER SYSTEM defaults to BOTH (memory and SPFILE); PFILE isn't updated unless manually recreated.

NEW QUESTION # 70

What are the three components of Oracle Database Automatic Maintenance Tasks?

- A. A diagnostic system that collects database error logs and details about database failures that can be found to diagnose complete file.
- B. A packaging system that allows you to combine all error and failure logs to share with Oracle Support.
- C. A database alert log that stores details about major database operations and errors, which is used to manage cluster performance.
- D. The maintenance windows managed by Oracle Database Scheduler, which are predefined time intervals permitting scheduled tasks.
- E. Oracle Database Resource Manager, which enables you to manage and configure system resources used by the Automatic Maintenance Tasks.
- F. A set of tasks that are started automatically at regular intervals to perform maintenance operations on the database.

Answer: D,E,F

Explanation:

- A .False. Diagnostic collection is ADR, not AMT.
- B .True. Resource Manager allocates resources to AMTs.
- C .True. Scheduler defines maintenance windows.
- D .False. Packaging is IPS/ADR, not AMT.
- E .False. Alert log is separate from AMTs.
- F .True. Tasks like stats collection are AMTs.

NEW QUESTION # 71

You have connected to a PDB to perform the administration operations of changing and verifying a system parameter that is PDB_MODIFIABLE. What is the appropriate mode to open the PDB to achieve this?

- A. READ ONLY
- B. READ WRITE
- C. RESTRICTED READ ONLY
- D. RESTRICTED WRITE ONLY

Answer: B

Explanation:

To change a PDB_MODIFIABLE parameter, the PDB must be in READ WRITE mode, allowing ALTER SYSTEM commands to modify parameters stored in the PDB's SPFILE or memory. READONLY modes prevent modifications, and no RESTRICTED WRITE ONLY mode exists.

NEW QUESTION # 72

Which statement is true about database links?

- A. A database link can be created only between two Oracle databases.
- B. Private database link creation requires the same user to exist in both the local and the remote databases.
- **C. A database link created in a database allows a connection from that database's instance to the target database's instance, but not vice versa.**
- D. A public database link can be created only by SYS.
- E. A public database link can be used by a user connected to the local database instance to connect to any schema in the remote database instance.

Answer: C

Explanation:

Database links enable cross-database queries in Oracle. Let's analyze each option with extensive detail:

A . A public database link can be created only by SYS.

False. Any user with the CREATE PUBLIC DATABASE LINK privilege (not just SYS) can create a public link (e.g., CREATE PUBLIC DATABASE LINK remote_db CONNECT TO scott IDENTIFIED BY tiger USING 'orcl'). While SYS typically has this privilege, it's not exclusive to SYS.

Mechanics:Privilege is granted via GRANT CREATE PUBLIC DATABASE LINK TO user;. Public links are accessible to all users in the local DB.

Why Incorrect:Overly restrictive; Oracle's security model allows delegation.

B . A database link can be created only between two Oracle databases.

False. Database links can connect to non-Oracle databases using Oracle Heterogeneous Services or gateways (e.g., ODBC or JDBC drivers), such as linking to SQL Server. Example: CREATE DATABASE LINK mssql_link USING 'hsodbc';.

Mechanics:Requires configuration of hs_ parameters in init.ora and a gateway listener.

Historical Note:Heterogeneous links were introduced in 8i, expanded in 23ai for cloud integration.

C . A database link created in a database allows a connection from that database's instance to the target database's instance, but not vice versa.

True. A database link is unidirectional; it enables queries from the local instance to the remote instance (e.g., SELECT * FROM emp@remote_db), but the remote instance can't use it to query back unless a separate link is created there.

Mechanics:Stored in DBA_DB_LINKS, the link defines a one-way connection via a TNS alias or connect string.

Practical Use:Ensures controlled access; bidirectional access requires explicit configuration.

Edge Case:Loops are prevented unless explicitly designed with mutual links.

D . A public database link can be used by a user connected to the local database instance to connect to any schema in the remote database instance.

False. Public links allow all local users to use them, but access to remote schemas depends on the link's credentials (e.g., CONNECT TO scott) and the user's remote privileges. "Any schema" overstates it; access is limited to what the link's user can see.

Why Incorrect:Misrepresents privilege scope; remote schema access isn't universal.

E . Private database link creation requires the same user to exist in both the local and the remote databases.

False. A private link (e.g., CREATE DATABASE LINK my_linkCONNECT TO scott IDENTIFIED BY tiger USING 'orcl') requires the remote user (scott) to exist, but the local creator (e.g., HR) need not match. The link is owned locally and authenticated remotely.

Mechanics:Only the CREATE DATABASE LINK privilege is needed locally.

NEW QUESTION # 73

.....

Pass rate is 98.65% for 1Z0-182 exam cram, and we can help you pass the exam just one time. 1Z0-182 training materials cover most of knowledge points for the exam, and you can have a good command of these knowledge points through practicing, and you can also improve your professional ability in the process of learning. In addition, 1Z0-182 Exam Dumps have free demo for you to

have a try, so that you can know what the complete version is like. We offer you free update for one year, and the update version will be sent to your mail automatically.
