P.S. Free 2025 Salesforce Identity-and-Access-Management-Architect dumps are available on Google Drive shared by DumpsFree: <https://drive.google.com/open?id=1Foy-VXPet7-wyX6tHGY8UNiFurkipP7F>

Our Identity-and-Access-Management-Architect Study Materials are recognized as the standard and authorized study materials and are widely commended at home and abroad. Our Identity-and-Access-Management-Architect study materials boost superior advantages and the service of our products is perfect. We choose the most useful and typical questions and answers which contain the key points of the test and we try our best to use the least amount of questions and answers to showcase the most significant information.

To be eligible for the Salesforce Identity-and-Access-Management-Architect certification exam, candidates must have a strong understanding of Salesforce technologies, as well as experience in designing and implementing identity and access management solutions. Candidates must also have a deep understanding of security and privacy best practices, as well as the ability to communicate effectively with stakeholders across the organization.

Salesforce Certified Identity and Access Management Architect certification is an excellent investment for architects who want to specialize in Salesforce IAM. It demonstrates to employers and clients that you have the skills and knowledge required to design and implement complex IAM solutions in a Salesforce environment. It is also an excellent way to differentiate yourself from other architects and to advance your career in the Salesforce ecosystem. If you are an experienced architect with a strong background in Salesforce security and IAM, the Salesforce Certified Identity and Access Management Architect certification is a natural next step in your career progression.

Salesforce Certified Identity and Access Management Architect (IAM) Exam is a certification program designed for professionals who specialize in identity and access management solutions. Identity-and-Access-Management-Architect Exam is an advanced-level certification that validates an individual's expertise in designing and implementing security solutions using Salesforce's Identity and Access Management platform. Salesforce Certified Identity and Access Management Architect certification is ideal for professionals who have extensive experience in security architecture, identity management, and access control.

During your installation, our Identity-and-Access-Management-Architect study guide is equipped with a dedicated staff to provide you with free remote online guidance.

## Salesforce Certified Identity and Access Management Architect Sample Questions (Q90-Q95):

### NEW QUESTION # 90

Universal Containers (UC) is setting up delegated authentication to allow employees to log in using their corporate credentials. UC's security team is concerned about the risks of exposing the corporate login service on the internet and has asked that a reliable trust mechanism be put in place between the login service and Salesforce.

What mechanism should an Architect put in place to enable a trusted connection between the login service and Salesforce?

- A. Enforce mutual authentication between systems using SSL.
- **B. Require the use of Salesforce security tokens on passwords.**
- C. Set up a proxy service for the login service in the DMZ.
- D. Include Client Id and Client Secret in the login header callout.

**Answer: B**

### NEW QUESTION # 91

Universal Containers wants to secure its Salesforce APIs by using an existing Security Assertion Markup Language (SAML) configuration supports the company's single sign-on process to Salesforce, Which Salesforce OAuth authorization flow should be used?

- A. OAuth 2.0 SAML Bearer Assertion Flow
- B. OAuth 2.0 User-Agent Flow
- C. OAuth 2.0 JWT Bearer Flow
- **D. A SAML Assertion Row**

**Answer: D**

### NEW QUESTION # 92

Northern Trail Outfitters recently acquired a company. Each company will retain its Identity Provider (IdP).

Both companies rely extensively on Salesforce processes that send emails to users to take specific actions in Salesforce.

How should the combined company's employees collaborate in a single Salesforce org, yet authenticate to the appropriate IdP?

- **A. Enable each IdP as a login option in the MyDomain Authentication Service settings. Users will then click on the appropriate IdP button.**
- B. Configure unique MyDomains for each company and have generated links use the appropriate MyDomain in the URL.
- C. Have generated links be prefixed with the appropriate IdP URL to invoke an IdP-initiated Security Assertion Markup Language flow when clicked.
- D. Have generated links append a querystring parameter indicating the IdP. The login service will redirect to the appropriate IdP.

**Answer: A**

Explanation:

Explanation

To allow employees to collaborate in a single Salesforce org, yet authenticate to the appropriate IdP, the identity architect should enable each IdP as a login option in the MyDomain Authentication Service settings.

Users will then click on the appropriate IdP button. MyDomain is a feature that allows administrators to customize the Salesforce login URL with a unique domain name. Authentication Service is a setting that allows administrators to enable different authentication options for users, such as social sign-on or single sign-on with an external IdP. By enabling each IdP as a login option in the MyDomain Authentication Service settings, the identity architect can provide a user-friendly and secure way for employees to log in to Salesforce using their preferred IdP. References: MyDomain, Authentication Service

### NEW QUESTION # 93

Universal Containers (UC) would like to enable self-registration for their Salesforce Partner Community Users. UC wants to capture some custom data elements from the partner user, and based on these data elements, wants to assign the appropriate Profile and Account values.

Which two actions should the Architect recommend to UC?

Choose 2 answers

- A. Configure Registration for Communities to use a custom Visualforce Page.

- B. Configure Registration for Communities to use a custom Apex Controller.
- C. Modify the SelfRegistration trigger to assign Profile and Account.
- D. Modify the CommunitiesSelfRegController to assign the Profile and Account.

**Answer: B,D**

Explanation:

To enable self-registration for partner community users, UC should modify the CommunitiesSelfRegController class to assign the Profile and Account values based on the custom data elements captured from the partner user. UC should also configure Registration for Communities to use a custom Apex controller that extends the CommunitiesSelfRegController class and overrides the default registration logic.

References:

Customize Self-Registration

#### NEW QUESTION # 94

Containers (UC) uses an internal system for recruiting and would like to have the candidates' info available in the Salesforce automatically when they are selected. UC decides to use OAuth to connect to Salesforce from the recruiting system and would like to do the authentication using digital certificates. Which two OAuth flows should be considered to meet the requirement? Choose 2 answers

- A. Web Service flow
- B. JWT Bearer Token flow
- C. Refresh Token flow
- D. SAML Bearer Assertion flow

**Answer: B,D**

#### NEW QUESTION # 95

.....
