In addition, under the help of our ARA-C01 exam questions, the pass rate among our customers has reached as high as 98% to 100%. We are look forward to become your learning partner in the near future.

Snowflake SnowPro Advanced Architect Certification Sample Questions (Q159-Q164):

NEW QUESTION # 159

When using the copy into <table> command with the CSV file format, how does the match_by_column_name parameter behave?

- A. The parameter will be ignored.
- B. The command will return an error.
- C. The command will return a warning stating that the file has unmatched columns.
- D. It expects a header to be present in the CSV file, which is matched to a case-sensitive table column name.

Answer: D

NEW QUESTION # 160

A company needs to have the following features available in its Snowflake account:

1. Support for Multi-Factor Authentication (MFA)
2. A minimum of 2 months of Time Travel availability
3. Database replication in between different regions
4. Native support for JDBC and ODBC
5. Customer-managed encryption keys using Tri-Secret Secure
6. Support for Payment Card Industry Data Security Standards (PCI DSS)

In order to provide all the listed services, what is the MINIMUM Snowflake edition that should be selected during account creation?

- A. Enterprise
- **B. Business Critical**
- C. Standard
- D. Virtual Private Snowflake (VPS)

Answer: B

Explanation:

According to the Snowflake documentation¹, the Business Critical edition offers the following features that are relevant to the question:

Support for Multi-Factor Authentication (MFA): This is a standard feature available in all Snowflake editions¹.

A minimum of 2 months of Time Travel availability: This is an enterprise feature that allows users to access historical data for up to 90 days¹.

Database replication in between different regions: This is an enterprise feature that enables users to replicate databases across different regions or cloud platforms¹.

Native support for JDBC and ODBC: This is a standard feature available in all Snowflake editions¹.

Customer-managed encryption keys using Tri-Secret Secure: This is a business critical feature that provides enhanced security and data protection by allowing customers to manage their own encryption keys¹.

Support for Payment Card Industry Data Security Standards (PCI DSS): This is a business critical feature that ensures compliance with PCI DSS regulations for handling sensitive cardholder data¹.

Therefore, the minimum Snowflake edition that should be selected during account creation to provide all the listed services is the Business Critical edition.

NEW QUESTION # 161

What are characteristics of the use of transactions in Snowflake? (Select TWO).

- **A. The autocommit setting can be changed inside a stored procedure.**
- B. A transaction can be started explicitly by executing a begin transaction statement and end explicitly by executing an end transaction statement.
- C. Explicit transactions should contain only DML statements and query statements. All DDL statements implicitly commit active transactions.
- D. A transaction can be started explicitly by executing a begin work statement and end explicitly by executing a commit work statement.
- **E. Explicit transactions can contain DDL, DML, and query statements.**

Answer: A,E

NEW QUESTION # 162

The following DDL command was used to create a task based on a stream:

```
CREATE TASK ts_insert_new_customers
WAREHOUSE = MY_WH
Schedule = '5 minute'
WHEN
  System$STREAM_HAS_DATA('MYSTREAM')
AS
  INSERT INTO new_customers(id, name) SELECT id, name
FROM mystream WHERE METADATA$ACTION = 'INSERT';
```

Assuming MY_WH is set to auto_suspend - 60 and used exclusively for this task, which statement is true?

- A. The warehouse MY_WH will only be active when there are results in the stream.
- B. The warehouse MY_WH will automatically resize to accommodate the size of the stream.
- C. The warehouse MY_WH will be made active every five minutes to check the stream.
- D. The warehouse MY_WH will never suspend.

Answer: C

NEW QUESTION # 163

A company has an inbound share set up with eight tables and five secure views. The company plans to make the share part of its production data pipelines.

Which actions can the company take with the inbound share? (Choose two.)

- A. Create a table from the shared database.
- B. Create additional views inside the shared database.
- C. Grant modify permissions on the share.
- D. Clone a table from a share.
- E. Create a table stream on the shared table.

Answer: A,E

NEW QUESTION # 164

.....
