Verified EC-COUNCIL Latest 712-50 Questions With Interarctive Test Engine & Efficient Valid 712-50 Dumps

In your day-to-day life, things look like same all the time. Sometimes you feel the life is so tired, do the same things again and again every day. Doing the same things and living on the same life make you very bored. So hurry to prepare for 712-50 Exam, we believe that the 712-50 exam will help you change your present life. It is possible for you to start your new and meaningful life in the near future, if you can pass the 712-50 exam and get the certification.

The CCISO certification program covers a wide range of topics related to information security management, including risk management, governance, compliance, strategic planning, and financial management. The program is designed to help individuals gain a deeper understanding of the various aspects of information security management, and to develop the skills and knowledge needed to be an effective CISO.

The CCISO certification exam is designed to help the candidates demonstrate their skills in five key domains, including governance and risk management, information security controls, security program management and operations, information security core competencies, and strategic planning and finance. 712-50 Exam validates the candidate's ability to develop, implement, and manage an organization's information security program while aligning it with the business objectives.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q176-Q181):

NEW QUESTION # 176

A recent audit has identified a few control exceptions and is recommending the implementation of technology and processes to address the finding. Which of the following is the MOST likely reason for the organization to reject the implementation of the recommended technology and processes?

- A. The organization has purchased cyber insurance
- B. The CIO of the organization disagrees with the finding
- C. The auditors have not followed proper auditing processes
- D. **The risk tolerance of the organization permits this risk**

Answer: D

Explanation:

Risk Tolerance and Control Exceptions:

- * Organizations define their risk tolerance levels based on strategic objectives and resources.
- * If a risk is within acceptable tolerance, additional controls may not be necessary.

Why This is Correct:

- * The decision aligns with the organization's established risk management framework and priorities.

Why Other Options Are Incorrect:

- * A. Improper Audit Process: Unlikely; audits follow structured methodologies.
- * B. CIO Disagreement: Decisions are based on risk tolerance, not individual opinions.
- * D. Cyber Insurance: Mitigates financial loss but doesn't eliminate risk.

References: EC-Council emphasizes that risk tolerance guides decisions on implementing controls, ensuring alignment with organizational objectives.

NEW QUESTION # 177

After a risk assessment is performed, a particular risk is considered to have the potential of costing the organization 1.2 Million USD. This is an example of

- A. Risk Tolerance
- B. Risk Appetite
- C. Qualitative risk analysis
- D. **Quantitative risk analysis**

Answer: D

NEW QUESTION # 178

A CISO sees abnormally high volumes of exceptions to security requirements and constant pressure from business units to change security processes.

Which of the following represents the MOST LIKELY cause of this situation?

- A. A lack of executive presence within the security program
- B. **Poor alignment of the security program to business needs**
- C. This is normal since business units typically resist security requirements
- D. Poor audit support for the security program

Answer: B

Explanation:

Explanation/Reference:

NEW QUESTION # 179

The remediation of a specific audit finding is deemed too expensive and will not be implemented.

Which of the following is a TRUE statement?

- A. The audit findings is incorrect
- B. The asset is more expensive than the remediation
- C. The remediation costs are irrelevant; it must be implemented regardless of cost.
- D. **The asset being protected is less valuable than the remediation costs**

Answer: D

NEW QUESTION # 180

An organization has a stated requirement to block certain traffic on networks. The implementation of controls will disrupt a manufacturing process and cause unacceptable delays, resulting in severe revenue disruptions. Which of the following is MOST likely to be responsible for accepting the risk until mitigating controls can be implemented?

- A. Audit and Compliance
- B. The CISO
- C. The CFO
- D. The business owner

Answer: D

NEW QUESTION # 181
