# 100% Pass Quiz Authoritative Analytics-DA-201 - Valid Salesforce Certified Tableau Data Analyst Test Dumps

What's more, part of that Getcertkey Analytics-DA-201 dumps now are free: https://drive.google.com/open?id=1Vx7m_T_0k7ImbQwb8eajzIv9bsKOnlGF

Salesforce Certified Tableau Data Analyst has introduced practice test (desktop and web-based) for the students so they can practice anytime in an easy way. The Salesforce Certified Tableau Data Analyst (Analytics-DA-201) practice tests are customizable which means the students can set the time and questions according to their needs. The Analytics-DA-201 Practice Tests have unlimited tries so that the users don't make extra mistakes when giving it the next time. Candidates can access the previously given tries from the history and avoid making mistakes in the final examination.

Salesforce Analytics-DA-201 Exam Syllabus Topics:

| Topic	Details
Topic 1	• ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S • 4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP.
Topic 2	• Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S • 4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.
Topic 3	• ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud.
Topic 4	• Object-Oriented Design: This section of the exam evaluates the SAP ABAP Cloud Developer's understanding of object-oriented principles in the ABAP context. It focuses on class-based programming, inheritance, interfaces, and polymorphism, all crucial for building modular and maintainable ABAP cloud applications.
Topic 5	• ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.

Why do you need to Trust Getcertkey Salesforce Analytics-DA-201 Exam Questions?

Working in IT field, you definitely want to prove your ability by passing IT certification test. Moreover, the colleagues and the friends with IT certificate have been growing. In this case, if you have none, you will not be able to catch up with the others. For example like Salesforce Analytics-DA-201 Certification Exam, it is a very valuable examination, which must help you realize your wishes.

Salesforce Certified Tableau Data Analyst Sample Questions (Q155-Q160):
NEW QUESTION # 155

You have a Tableau Prep flow that joins a dataset named Global Indicators to a dataset named Price Indices.
In which step can you transform rows of monthly data into rows of yearly data"

Answer:

Explanation:

NEW QUESTION # 156

You have the Mowing two tables that contains data about the books in a library.

Table2

Book Title	Publication Year
Great Expectations	1860
To Kill a Mockingbird	1960
Don Quixote	1615
Jane Eyre	1847

Both tables are incomplete so there are books missing from the tables.

You need to combine the tables. The solution must ensure that all the data is retained Which type of join should you use?

- A. Full outer join
- B. Right join
- C. left join
- D. Inner join

Answer: A

Explanation:

To combine the two tables that contain data about books in a library and ensure that all the data is retained, you should use a full outer join. A full outer join is a type of join that returns all rows from both tables, regardless of whether there is a match or not. If there is no match, null values are filled in for the missing fields.

To perform a full outer join, you need to do the following steps:

* Connect to both tables as your data sources in Tableau. You can use either live or extract connections.

* Drag one table to the canvas and drop it on top of another table. This will create a join between them based on a common field.

* Click on the join icon between the tables and select Full Outer Join from the drop-down list. This will change the join type to full outer join and show all rows from both tables.

* Optionally, you can add or remove join clauses by clicking on Add or Remove buttons next to each clause. You can also change or rename fields by clicking on them.

The other types of joins are not correct for this scenario. An inner join returns only the rows that have a match in both tables, which will exclude any books that are missing from either table. A left join returns all rows from the left table and only the matching rows from the right table, which will exclude any books that are only in the right table. A right join returns all rows from the right table and only the matching rows from the left table, which will exclude any books that are only in the left table. References:

/current/pro/desktop/en-us/joining_tables.htm https://help.tableau.com/current/pro/desktop/en-us/join_types.
htm

When combining two datasets that are both incomplete and where it's important to retain all data from both sources, a full outer join is appropriate. This type of join ensures that all records from both tables are included in the combined dataset, even if there are no matching records in the other table.

NEW QUESTION # 157

Open the link to Book1 found on the desktop. Use the Superstore data source.

Split the Customer Name field into two fields named First Name and Last Name.

Answer:

Explanation:
check the steps below in explanation.
Explanation:
To split the Customer Name field into two fields named First Name and Last Name, you need to do the following steps:
* Open the link to Book1 found on the desktop. This will open the Tableau workbook that uses the Superstore data source.
* Go to the Data Source tab at the bottom of the workbook to see the data source page. You will see a table that shows the fields and values from the Superstore data source.
* Right-click on Customer Name in the table and select Split from the menu. This will split the field into two fields based on a separator, which is a space by default. You will see two new fields named Customer Name - Split 1 and Customer Name - Split 2 in the table.
* Right-click on Customer Name - Split 1 and select Rename from the menu. Type First Name as the new name and press Enter. This will rename the field as First Name.
* Right-click on Customer Name - Split 2 and select Rename from the menu. Type Last Name as the new name and press Enter. This will rename the field as Last Name.
References: https://help.tableau.com/current/pro/desktop/en-us/datasource_prepare.htm https://help.tableau.com/current/pro/desktop/en-us/split.htm https://help.tableau.com/current/pro/desktop/en-us/renamefield.htm

NEW QUESTION # 158
You have the following tiled dashboard that has one sheet.
You want to replace the sheet with Sheet2.
What should you do?

- A. Right-click Sheet2 and select Add to Dashboard.
- B. Drag Sheet2 to the dashboard.
- C. From the context menu of Sheet3, select Remove Dashboard Item.
- D. From the context menu of Sheet3, select Deselect.
- E. Select Sheet3 and click the Swap Sheet button next to Sheet2.

Answer: B

Explanation:
In Tableau, to replace a sheet on a dashboard, you can simply drag the desired sheet (Sheet2 in this case) from the sheets list onto the dashboard where the current sheet (Sheet3) is. This will replace the existing visualization with the new one.

NEW QUESTION # 159

You have the following line chart that shows the average sales by month.

Which month had the biggest increase in swage sales compared to me previous month in 2019?

- A. August
- B. November
- C. October
- D. December

Answer: B

Explanation:
Based on the line chart provided, each point on the line chart represents the average sales for a given month, and the percentage values indicate the change in average sales compared to the previous month. The month of November shows a significant increase from the month of October, indicated by a large upward spike on the chart and a high percentage increase.

NEW QUESTION # 160
