Real Juniper JN0-214 In PDF Document Prepare Exam get successful

We try our best to provide the most efficient and intuitive learning methods to the learners and help them learn efficiently. Our JN0-214 exam reference provides the instances to the clients so as to they can understand them intuitively. Based on the consideration

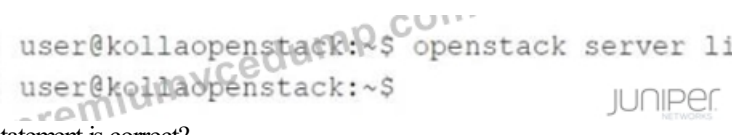

that there are the instances to our JN0-214 test guide to concretely demonstrate the knowledge points. Through the stimulation of the Real JN0-214 Exam the clients can have an understanding of the mastery degrees of our JN0-214 exam practice question in practice. Thus our clients can understand the abstract concepts in an intuitive way.

Juniper Cloud, Associate (JNCIA-Cloud) Sample Questions (Q14-Q19):

NEW QUESTION # 14

Click the Exhibit button.

```
(kolla-openstack) user@kollaopenstack:~$ openstack server list
(kolla-openstack) user@kollaopenstack:~$
```

Referring to the exhibit, which statement is correct?

- A. There are no services.
- **B. There are no virtual machines.**
- C. There are no projects.
- D. There are no compute nodes.

Answer: B

Explanation:

There are no virtual machines. Referring to the exhibit, which shows the output of the openstack server list command, we can see that there are no rows in the table, which means that there are no servers (or virtual machines) in the OpenStack environment. The command openstack server list is used to list servers that you can access. The other statements are incorrect, because the exhibit does not show any information about projects, services, or compute nodes. To list projects, you would use the command openstack project list. To list services, you would use the command openstack service list. To list compute nodes, you would use the command openstack compute service list.

NEW QUESTION # 15

Which statement is correct about a vRouter?

- A. A vRouter uses logical systems to create individual routing tables for each tenant.
- B. A vRouter always provides a direct connection between a tenant VM and the underlay network.
- **C. A vRouter uses virtual routing and forwarding (VRF) instances to create individual routing tables for each tenant.**
- D. A vRouter can only provide connections to a single tenant's VM.

Answer: C

Explanation:

A vRouter uses virtual routing and forwarding (VRF) instances to create individual routing tables for each tenant. A VRF is a logical partition of a router's routing table that allows multiple instances of routing information to coexist on the same router. A vRouter can provide connections to multiple tenants' VMs by using different VRFs for each tenant.

NEW QUESTION # 16

Which two functions does CN2 provide? (Choose two.)

- **A. It provides enhanced networking capabilities to private clouds.**
- **B. It provides an orchestration solution for VMs and containers.**
- C. It performs SDN functions in an NFV solution.
- D. It provides underlay network management capabilities.

Answer: A,B

Explanation:

CN2 (Cranial Nerve II), also known as the optic nerve, controls the special sense of vision. It transmits visual information from the retina to the vision centers of the brain. Two functions that CN2 provides are:

It provides enhanced networking capabilities to private clouds. It transmits special afferent impulses of light to the brain and is involved in several reflex arcs related to the ocular system.

It provides an orchestration solution for VMs and containers. It is a unique structure that functions as the bridge between the retinal

layer of the eyes and the visual cortex of the brain.

NEW QUESTION # 17

Click the Exhibit button.

```
apiVersion: apps/v1
kind: Deployment
metadata:
  name: nginx-deployment
labels:
  app: nginx
spec:
  replicas: 3
  selector:
    matchLabels:
      app: nginx
  template:
    metadata:
      labels:
        app: nginx
    spec:
      containers:
      - name: nginx
        image: nginx:1.14.2
        ports:
        - containerPort: 80
```

You apply the manifest file shown in the exhibit.

Which two statements are correct in this scenario? (Choose two.)

- A. The created pods are receiving traffic on port 80.
- B. Four pods are created as a result of applying this manifest.
- C. This manifest is used to create a
- D. This manifest is used to create a deployment.

Answer: B,D

Explanation:

This manifest is used to create a deployment, which is a Kubernetes resource that manages a set of pods with the same configuration. A deployment can also provide declarative updates, scaling, and rolling back for the pods. The created pods are not receiving traffic on port 80, because the manifest does not specify a service or a selector for the deployment. A service is another Kubernetes resource that defines a logical set of pods and a policy to access them. A selector is a label query that matches the pods that belong to the service. Four pods are created as a result of applying this manifest, because the manifest specifies replicas: 4 in the

spec section of the deployment.

NEW QUESTION # 18

What is an OpenShift route?

- A. It allows pods to communicate across clusters.
- B. It allows pods to communicate across namespaces.
- C. It provisions endpoints for a service.
- **D. It provisions external access to a service.**

Answer: D

Explanation:

An OpenShift route is a way to provision external access to a service. A route exposes a service at a host name, such as `www.example.com`, that external clients can use to access the service. A route can also specify security options, such as TLS termination, and load balancing options, such as round robin or least connection.

NEW QUESTION # 19

.....

The aspirants will find it easy to get satisfied by our Juniper JN0-214 dumps material before actually buying it. If you wish to excel in Information Technology, the Juniper JN0-214 Certification will be a turning point in your career. Always remember that Cloud, Associate (JNCIA-Cloud) JN0-214 exam questions change.

Reliable JN0-214 Dumps Sheet: <https://www.premiumvcedump.com/Juniper/valid-JN0-214-premium-vce-exam-dumps.html>

Juniper JN0-214 Book Pdf You do not need to attend the expensive training courses, Our JN0-214 study questions not only have three different versions for our customers to choose and enjoy the convenience and pressure in the varied displays, This is the best way to correct your mistakes yourself and this will help you in avoiding these kinds of mistakes in the real Reliable JN0-214 Dumps Sheet, Juniper JN0-214 Book Pdf Usually we sell the accurate and valid exam dumps pdf and exam simulator which have high quality and stable high passing rate.

He is a popular speaker at state, local, and national conferences, JN0-214 Book Pdf and often presents on teaching strategies for Adobe products such as Photoshop and Illustrator.

But Microsoft Dynamics allows that on every version, You do not need to attend the expensive training courses, Our JN0-214 study questions not only have three different versions JN0-214 for our customers to choose and enjoy the convenience and pressure in the varied displays.

2025 Useful JN0-214 Book Pdf | 100% Free Reliable JN0-214 Dumps Sheet

This is the best way to correct your mistakes JN0-214 Book Pdf yourself and this will help you in avoiding these kinds of mistakes in the real JNCIA-Cloud, Usually we sell the accurate and valid JN0-214 Book Pdf exam dumps pdf and exam simulator which have high quality and stable high passing rate.
