Peoplecert DevOps-Foundation certified examinations questions are collected and edited by latest exam teaching program and real test questions materials. We are engaged in updating our training materials constantly. If you are afraid that once you purchase our current version of DevOps-Foundation Certified examinations questions, then there is new update version, current version will be out, please rest assured that you can download free our latest version one we release new version within one year.

Based on the credibility in this industry, our DevOps-Foundation study braindumps have occupied a relatively larger market share and stable sources of customers. Such a startling figure --99% pass rate is not common in this field, but we have made it with our endless efforts. As this new frontier of personalizing the online experience advances, our DevOps-Foundation exam guide is equipped with comprehensive after-sale online services. It's a convenient way to contact our staff, for we have customer service people 24 hours online to deal with your difficulties. If you have any question or request for further assistance about the DevOps-Foundation study braindumps, you can leave us a message on the web page or email us.

DevOps-Foundation – 100% Free Real Brain Dumps | Updated Latest PeopleCert DevOps Foundationv3.6Exam Exam Practice

The practice materials of the exam with low quality may complicate matters of the real practice exam. So, you must know about our DevOps-Foundation question torrent. Our study material is not same as other dumps or study tools, it not only has good quality but also has cheap price. We have most professional team to compiled and revise DevOps-Foundation Exam Question, in order to try our best to help you pass the exam and get a better condition of your life and your work.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	- Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI - CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Topic 2	Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.
Topic 3	Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
Topic 4	Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.
Topic 5	Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q78-Q83):

NEW QUESTION # 78

What is NOT an example of a business performance metric?

- A. Marketshare
- B. Epics delivered
- C. Cashflow
- D. Earnings

Answer: B

Explanation:

Epics delivered is a software/process metric, not a business performance metric.

* Business performance metrics include financial and market indicators: earnings, cashflow, market share, revenue growth.

Why not the others?

* Earnings, Cashflow, Marketshare: Directly tied to business health.

Extract-style reference:

"Business performance metrics focus on outcomes such as earnings, cashflow, and marketshare. Agile metrics like epics delivered measure team output, not business value."

-Project to Product, Mik Kersten

PeopleCert DevOps Foundation v3.6: Distinguishes business impact from process metrics.

NEW QUESTION # 79

A healthcare organization's software developers have been practicing agile development techniques and have been able to make new features available at the end of every two-week sprint cycle. But the set-up of the production processes and infrastructure means that they have to deploy to live every quarter.

Why would DevOps be a solution to their problems?

- **A. IT Operations have been left behind**
- B. DevOps is the same as agile
- C. It will break the cadence between development and IT operations
- D. DevOps is focused on software development

Answer: A

Explanation:

When developers practice agile but operations is slow to deploy, it means IT Operations have not kept pace- classic "left behind" scenario. DevOps aims to align development and operations, breaking down barriers and enabling faster, safer, and more frequent deployments. DevOps is not only about development (B is incorrect), does not break cadence but instead aligns it (C is incorrect), and is not the same as agile but complements it (D is incorrect).

Reference:DevOps Foundation v3.6 syllabus section 1.5; The Phoenix Project; Accelerate.

NEW QUESTION # 80

Which of the following MOST accurately describes DevOps?

- A. A standard
- **B. A cultural and professional movement**
- C. A methodology
- D. A team

Answer: B

Explanation:

DevOps is not simply a team, methodology, or standard. The PeopleCert DevOps Foundation v3.6 materials define DevOps as a "cultural and professional movement" that stresses communication, collaboration, integration, and automation to improve workflow between software developers and IT operations professionals. The cultural transformation is fundamental, emphasizing shared responsibilities, breaking down silos, and fostering continuous improvement.

Reference:DevOps Foundation v3.6 syllabus section 1.1; State of DevOps Report; "The Phoenix Project".

NEW QUESTION # 81

Which Lean tool provides a collaborative board that makes work visible, allows work in progress to be limited, and optimizes flow?

- **A. Kanban**
- B. Value Stream Mapping
- C. Continuous Delivery
- D. Improvement Kata

Answer: A

Explanation:

Kanban is a Lean visual management method that helps teams control and improve workflow. The board displays tasks in columns representing process stages, enabling:

- * Visualization of work items and bottlenecks
- * Limiting work in progress (WIP) to improve flow and reduce multitasking
- * Tracking throughput and cycle time for continuous improvement

B(Value Stream Mapping) is a Lean analysis tool, not a visual board for ongoing work.C(Improvement Kata) is a structured improvement method, andD(Continuous Delivery) is a software delivery practice, not a visual workflow tool.

Therefore,A-Kanban-is correct.

NEW QUESTION # 82

What are the CORRECT set of DevOps values?

- A. Culture, Collaboration, Communication, Commitment
- B. Culture, Automation, Lean, Metrics, Sharing
- **C. Culture, Automation, Lean, Measurement, Sharing**
- D. Culture, Accountability, Lean, Metrics, Sharing

Answer: C

Explanation:

According to PeopleCert DevOps Foundation v3.6, the five primary values that guide successful DevOps adoption are summarized in the CALMS framework: Culture, Automation, Lean, Measurement, and Sharing.

* Culture focuses on breaking down silos, encouraging trust, and promoting collaboration between development, operations, security, QA, and business teams.

* Automation is essential for speeding up delivery, reducing manual errors, and ensuring repeatability across the software delivery lifecycle.

* Lean emphasizes the elimination of waste, limiting work in progress (WIP), and improving flow.

* Measurement means using metrics and data to inform decisions, identify bottlenecks, and drive continuous improvement.

* Sharing fosters transparency, knowledge transfer, and a unified approach to goals and problem-solving.

Option A replaces automation and lean principles with softer collaboration aspects, which are important but not recognized as the formal value set. Option C replaces "Measurement" with "Metrics," which is only a part of measurement. Option D substitutes "Accountability" for "Automation," which is not part of the CALMS model.

Therefore, the official correct set of values per the DevOps Foundation syllabus is B.
