CheckPoint 156-536 Questions [2025]

Both practice exams (web-based & desktop) give a CheckPoint 156-536 real exam feeling and identify your mistakes so you can overcome your weaknesses before the 156-536 final test. The desktop CheckPoint 156-536 Practice Test software works on Windows after software installation. You can take the web-based Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) 156-536 practice exam via any operating system.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.
Topic 2	<ul style="list-style-type: none">• Advanced Threat Prevention: CheckPoint Security Administrators will be assessed in this area, which covers advanced techniques for preventing sophisticated threats. This includes leveraging threat intelligence and proactive measures to safeguard endpoints from emerging cyber risks.
Topic 3	<ul style="list-style-type: none">• Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.
Topic 4	<ul style="list-style-type: none">• Deploying Harmony Endpoint Data Security Protection: In this domain, CheckPoint Security Administrators will demonstrate their skills in deploying data security protections within Harmony Endpoint. This includes configuring data loss prevention strategies and ensuring data integrity across endpoints.
Topic 5	<ul style="list-style-type: none">• Harmony Endpoint Management as a Service: This section targets Harmony Endpoint Security Professionals, focusing on managing endpoint security as a service. It covers the cloud-based management capabilities of Harmony Endpoint, allowing for scalable deployment and policy management.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which of the following is not protected by the Full Disk Encryption (FDE) software?

- * Client's user data
 - * Operating system files
 - * Temporary files
 - * Erased files
-
- A. Temporary and erased files
 - **B. All of these are protected with FDE**
 - C. Erased files
 - D. Temporary files

Answer: B

NEW QUESTION # 46

Before installing the Endpoint Security Management Server, it is necessary to consider this:

- A. A Network Security Management Server must be installed.
- B. An Endpoint Security Gateway must be installed.
- C. MS SQL Server must be available with full admin access.
- **D. A Network Security Management Server must NOT be installed on the same machine.**

Answer: D

NEW QUESTION # 47

"Heartbeat" refers to what?

- A. A server connection that happens every 5 minutes
- **B. A periodic client connection to the server**
- C. A client connection that happens every 60 seconds
- D. A random server connection

Answer: B

Explanation:

In Check Point's Harmony Endpoint, the "heartbeat" refers to a periodic connection initiated by the endpoint client to the Endpoint Security Management Server. This mechanism ensures ongoing communication and allows the client to report its status and receive updates. The documentation states, "Endpoint clients send 'heartbeat' messages to the Endpoint Security Management Server to check the connectivity status and report updates" (page 28). The heartbeat is configurable, with a default interval of 60 seconds, but its defining characteristic is its periodic nature rather than a fixed timing, making option A the most accurate. Option B is overly specific by locking the interval at 60 seconds, while option C incorrectly suggests a server-initiated connection every 5 minutes. Option D is incorrect, as the heartbeat is not random but scheduled. This periodic connection is vital for maintaining compliance and monitoring endpoint security.

"CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf," Page 28: The Heartbeat Interval

NEW QUESTION # 48

When can administrators prepare the client for the FDE software package installation and deployment?

- A. Once the client system volumes have 32 MB of space
- B. Once the policy is installed
- **C. Once a client machine meets the minimum system requirements**
- D. Once a client meets the maximum system requirements

Answer: C

NEW QUESTION # 49

What type of attack is Ransomware?

- **A. Where an attacker encrypts files on a computer and demands payment for decryption key.**
- B. Ransomware is not an attack.
- C. Where an attacker decrypts files on a computer and demands payment for encryption key.
- D. Where a victim encrypts files on a computer and demands payment for decryption key from an attacker.

Answer: A

Explanation:

Ransomware is a form of malicious software (malware) where an attacker encrypts the victim's data, rendering it inaccessible. The attacker then demands a ransom payment from the victim to provide the decryption key that will restore access to the data.

Exact Extract from Official Document:

"Before a Ransomware attack can encrypt files, Anti-Ransomware backs up your files to a safe location. After the attack is stopped, it deletes files involved in the attack and restores the original files from the backup location." This indicates that ransomware encrypts files, confirming that the attacker encrypts the files and demands a payment for a decryption key.
