Brain Cisco 300-610 Exam - 300-610 Latest Learning Material

Probably many people have told you how difficult the 300-610 exam is; however, our PracticeVCE just want to tell you how easy

to pass 300-610 exam. Our strong IT team can provide you the 300-610 exam software which is absolutely make you satisfied; what you do is only to download our free demo of 300-610 t have a try, and you can rest assured t purchase it. We can be along with you in the development of IT industry. Give you a helping hand.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q172-Q177):

NEW QUESTION # 172

Drag and drop the SAN components from the left onto the correct design considerations on the right.

fabric logins	used to logically separate a SAN fabric
ISL	must be considered for the end-to-end oversubscription ratio
VSAN	these exchanges increase as a result of server virtualization
zone	must be considered when implementing access control

Answer:

Explanation:

fabric logins	VSAN
ISL	ISL
VSAN	fabric logins
zone	zone

NEW QUESTION # 173

An engineer must connect a storage array directly to an existing Cisco UCS Fabric Interconnect.

The customer requires a solution that provides IP-based storage that does not need to be connected through an external switch. Also, the operations team wants to have the ability to have direct access to the files stored on the storage array from their Linux hosts.

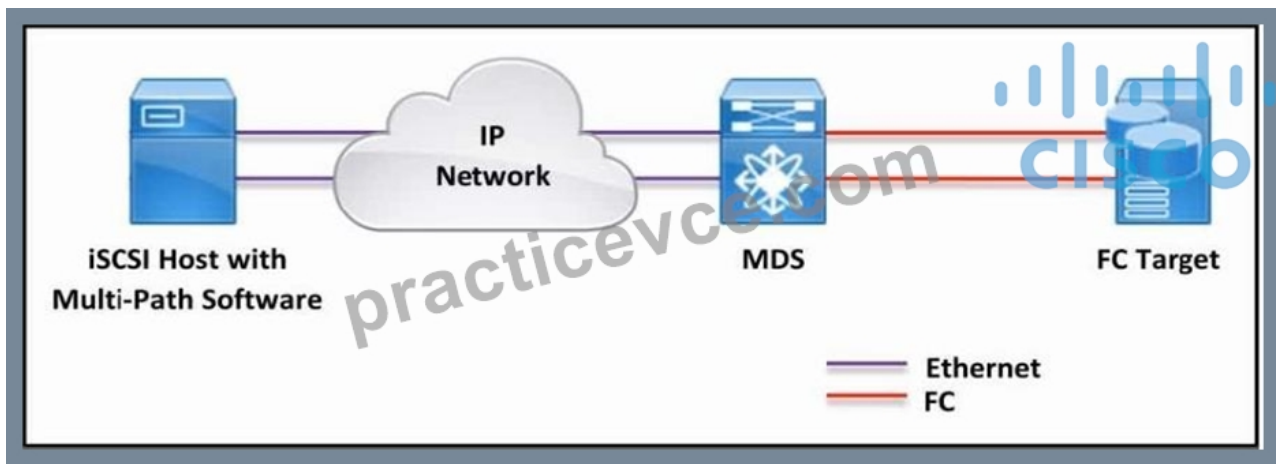

Which storage technology meets these requirements?

- A. FCoE
- B. SAN
- **C. NAS**
- D. iSCSI

Answer: C

NEW QUESTION # 174

Refer to the exhibit. A company plans to implement high availability between the iSCSI host and the Fibre Channel target. Which solution must the company implement to recover from a failure of a host NIC, MDS IP storage port, or Fibre Channel target port?

- A. Map the Fibre Channel target ports to one IP storage port
- B. Configure FCoE between the host NICs and MDS ports
- C. Set up IP storage ports to export the two Fibre Channel target ports
- D. Implement HSRP on the MDS IP storage ports

Answer: A

NEW QUESTION # 175

A company needs a solution to virtualize their legacy desktop computers. The solution must be highly resilient and able to withstand the loss of a data center site. Each compute node requires a minimum of 20 disk drives.

Which solution meets these requirements?

- A. data center site with a strict security policy that provides access to users using a bespoke software client solution based on Cisco HX240 compute nodes
- B. virtual desktop infrastructure solution installed in multiple data centers that are close to the end users solution based on Cisco HX240 compute nodes
- C. dedicated virtual machine per hypervisors for each user in a centralized data center
- D. thin client installed at each user's end station with a separate profile to retrieve sensitive data using the RDP protocol solution based on Cisco HX220 compute nodes

Answer: B

NEW QUESTION # 176

Refer to the exhibit.

The Cisco Nexus Series Switch with hostname Nexus1 is the default gateway for server A and server B. Both servers must have reachability to the internet; however, server A internet traffic must pass through the firewall for deep packet inspection. Also, the firewall must inspect any communication between server A and server B. Which solution must be applied to separate the data plane path for server A and server B?

- A. VLAN
- B. VDC
- **C. VRF**
- D. VXLAN

Answer: C

NEW QUESTION # 177

.....

Certification 300-610 exam on the first attempt. The demand of the Designing Cisco Data Center Infrastructure exam is growing at a rapid pace day by day and almost everyone is planning to pass it so that they can improve themselves for better futures in the PracticeVCE sector. 300-610 has tried its best to make this learning material the most user-friendly so the applicants don't face excessive issues.
